Contents

1 Stochastic Cooling of Particle Beams 1
1.1 Introduction 1

2 Simplified Theory, Time-Domain Picture 5
2.1 The Basic Set-Up 5
2.2 Notion of Beam Samples 7
2.3 Coherent and Incoherent Effects 9
2.4 First Approximation 12
2.5 Towards a Better Evaluation of the Incoherent Term 12
2.6 A Second Approximation to the Cooling Rate 14
2.7 Alternative Derivation 16
2.8 A Refinement to Include System Noise 18
2.9 Third Approximation to the Cooling Rate (with Mixing) 20
2.10 Practical Details 24
2.11 Momentum Cooling (Palmer Method) 25
2.12 Betatron Oscillation Cooling 26
2.13 Hereward Cooling 28
2.14 Momentum Cooling, Thorndahl's, Kells's and Möhl's Methods . . 30

3 Pickup and Kicker Impedance 35
3.1 Definitions 35
3.2 Geometry Factors 38
3.3 Frequency Response 40
3.4 Matching to the Cooling Loop 43
3.5 Signal Combination 44

4 Frequency-Domain Picture 47
4.1 Schottky Noise Signals from a Coasting Beam 47
4.2 Cooling by Harmonics 54
4.3 Noise-to-Signal Ratio by Harmonics 57
4.4 Mixing Pickup to Kicker 59

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

5 A More Detailed Derivation of Betatron Cooling 61
5.1 Betatron Equation 61
5.2 Orbit Equation for a Localised Kick 62
5.3 Coherent Effect 65
5.4 Noise 69
5.5 Beam Response to a Noisy Kicker 72
5.6 Back to Transverse Cooling, the Influence Schottky Noise and Amplifier Noise 74
5.7 Cooling Rate, Interplay of Coherent and Incoherent Effects 76

6 Feedback via the Beam-Signal Shielding 79
6.1 Transverse Motion 79
6.2 Longitudinal Beam Feedback 87

7 The Distribution Function and Fokker-Planck Equations 91
7.1 Distribution Functions and Particle Flux 91
7.2 Simple Example and Asymptotic Distributions 96
7.3 Calculation of the Coefficients F and D for Filter Cooling 97
7.4 Stochastic Stacking 99
7.5 Calculation of the Coefficients F and D for Transverse Cooling . . 103

8 Other Special Applications 105
8.1 Cooling of Bunched Beams 105
8.2 Halo Cleaning 109

Appendix A Transfer Function and Power Requirement for Filter Cooling 115
A.1 Transfer Function 115
A.2 Power Requirement for Filter Cooling 116

Appendix B Gain and Power Requirement for Palmer System 119
B.1 Gain 119
B.2 Power Requirement 120

Appendix C Power Requirement for Transverse Cooling 123

Appendix D Dispersion Integrals 125

Appendix E Longitudinal Beam Response to a Gap Voltage 127

Appendix F Non-linear Pickup and Kicker 129
