

Table of Contents – Part I

Workshop on Geographical Analysis, Urban Modeling, Spatial Statistics (GEO-AN-MOD 2010)

Real Estate Values, Urban Centrality, Economic Activities. A GIS Analysis on the City of Swindon (UK)	1
<i>Francesco Battaglia, Giuseppe Borruso, and Andrea Porceddu</i>	
Analysis of Positional Aspects in the Variation of Real Estate Values in an Italian Southern Metropolitan Area	17
<i>Silvestro Montrone, Paola Perchinunno, and Carmelo Maria Torre</i>	
A Network Based Kernel Density Estimator Applied to Barcelona Economic Activities	32
<i>Produit Timothée, Lachance-Bernard Nicolas, Strano Emanuele, Porta Sergio, and Joost Stéphane</i>	
The Application of Spatial Filtering Technique to the Economic Convergence of the European Regions between 1995 and 2007	46
<i>Francesco Pecci and Nicola Pontarollo</i>	
Spatial Autocorrelation Analysis for the Evaluation of Migration Flows: The Italian Case	62
<i>Grazia Scardaccione, Francesco Scorza, Giuseppe Las Casas, and Beniamino Murgante</i>	
Using Cellular Automata Model to Simulate the Impact of Urban Growth Policy on Environment in Danshuei Township, Taiwan	77
<i>Feng-Tyan Lin and Wan-Yu Tseng</i>	
Improving the Calibration of the MOLAND Urban Growth Model with Land-Use Information Derived from a Time-Series of Medium Resolution Remote Sensing Data	89
<i>Tim Van de Voorde, Johannes van der Kwast, Inge Uljee, Guy Engelen, and Frank Canters</i>	
Design of a Dynamic Land-Use Change Probability Model Using Spatio-temporal Transition Matrix	105
<i>Yongjin Joo, Chulmin Jun, and Soohong Park</i>	
Forecasting Space-Time Land Use Change in the Paochiao Watershed of Taiwan Using Demand Estimation and Empirical Simulation Approaches	116
<i>Hone-Jay Chu, Yu-Pin Lin, and Chen-Fa Wu</i>	

Should Neighborhood Effect Be Stable in Urban Geosimulation Model?
A Case Study of Tokyo 131
Yaolong Zhao, Fei Dong, and Hong Zhang

A Fuzzy Cellular Automata Modeling Approach – Accessing Urban
Growth Dynamics in Linguistic Terms 140
Lefteris A. Mantelas, Thomas Hatzichristos, and Poulicos Prastacos

Computer-Based Methods for a Socially Sustainable Urban and
Regional Planning - CoMStaR 152
*Jens Steinhöfel, Frauke Anders, Hermann Köhler,
Dominik Kalisch, and Reinhard König*

A Comparison of Evolutionary Algorithms for Automatic Calibration
of Constrained Cellular Automata..... 166
Ivan Blecic, Arnaldo Cecchini, and Giuseppe A. Trunfio

The Calculation Method of Heating and Cooling Energy Saving
Potential in Urban District 182
Shin Do Kim, Im Hack Lee, and Sung Moon Cheon

GIS-Based Estimation of Wetland Conservation Potentials in Europe ... 193
Christine Schleupner

G.I.S. to Support Environmental Sustainability in Manufacturing
Areas. Case Study of the Apulian Region in Southern Italy 210
Francesco Selicato, Grazia Maggio, and Francesco Mancini

Estimating and Classifying Spatial and Temporal Distributions of Flow
Conditions for Fish Habitats by Using Geostatistical Approaches with
Measured Flow and Fish Data 224
*Yu-Pin Lin, Cheng-Long Wang, Hsiao-Hsuan Yu, and
Yung-Chieh Wang*

Service Path Attribution Networks (SPANs): Spatially Quantifying the
Flow of Ecosystem Services from Landscapes to People 238
*Gary W. Johnson, Kenneth J. Bagstad, Robert R. Snapp, and
Ferdinando Villa*

Facing the Archaeological Looting in Peru by Using Very High
Resolution Satellite Imagery and Local Spatial Autocorrelation
Statistics 254
Rosa Lasaponara and Nicola Masini

U-City: New Trends of Urban Planning in Korea Based on Pervasive
and Ubiquitous Geotechnology and Geoinformation 262
Myungjun Jang and Soon-Tak Suh

Settlement-Preference Patterns and Characteristics of Households in Urban Renewal Area	271
<i>Jin-Kyung Lee, Seungil Lee, and Kyu-Il Kim</i>	
Ontologies for Urban Regeneration Could Be Useful for Managing Cohesion Policies?	283
<i>Francesco Rotondo</i>	
The Effect of School Facility Allocation to City Center Development Base on Dynamic Spatial Structure Model	293
<i>Shyh-Haw Chyan, Hsiao-Lan Liu, and Feng-Tyan Lin</i>	
A Fuzzy Reasoning Based Approach for Determining Suitable Paths between Two Locations on a Transport Network	309
<i>Indira Mukherjee and S.K. Ghosh</i>	
Assessing Macroseismic Data Reliability through Rough Set Theory: The Case of Rapolla (Basilicata, Southern Italy)	320
<i>Fabrizio Gizzi, Nicola Masini, Maria Rosaria Potenza, Cinzia Zotta, Lucia Tilio, Maria Danese, and Beniamino Murgante</i>	
Utilization of LiDAR and IKONOS Satellite Data for Security Hotspot Analysis Based on Realism of 3D City Model	331
<i>Mazlan Hashim, Maged Marghany, Mohd Rizaludin Mahmud, and Mohd Hafiz Anuar</i>	
Towards 3D Tactical Intelligence Assessments for Crime Scene Analysis	346
<i>Markus Wolff and Hartmut Asche</i>	
On the Estimation of Fire Severity Using Satellite ASTER Data and Spatial Autocorrelation Statistics	361
<i>Rosa Coluzzi, Nicola Masini, Antonio Lanorte, and Rosa Lasaponara</i>	
Spatial Analysis of the 2008 Influenza Outbreak of Hong Kong.....	374
<i>Poh-chin Lai and Kim-hung Kwong</i>	
Spatial Components in Disease Modelling	389
<i>Kim-hung Kwong and Poh-chin Lai</i>	
Ordered Polyline Trees for Efficient Search of Objects Moving on a Graph	401
<i>Thuy Thi Thu Le and Bradford G. Nickerson</i>	
Compactness in Spatial Decision Support: A Literature Review	414
<i>Pablo Vanegas, Dirk Cattrysse, and Jos Van Orshoven</i>	
An Architecture and a Metamodel for Processing Analytic and Geographic Multilevel Queries	430
<i>Diego Martins Vieira Barros and Robson do Nascimento Fidalgo</i>	

Transferring Indicators into Different Partitions of Geographic Space	445
<i>Christine Plumejeaud, Julie Prud'homme, Paule-Annick Davoine, and Jérôme Gensel</i>	
A Model Driven Process for Spatial Data Sources and Spatial Data Warehouses Reconciliation	461
<i>Octavio Glorio, Jose-Norberto Mazón, and Juan Trujillo</i>	
ISATEM: An Integration of Socioeconomic and Spatial Models for Mineral Resources Exploitation	476
<i>Fenintsoa Andriamasinoro, Daniel Cassard, and Bruno Martel-Jantin</i>	
Scale-Dependency and Sensitivity of Hydrological Estimations to Land Use and Topography for a Coastal Watershed in Mississippi	491
<i>Vladimir J. Alarcon and Charles G. O'Hara</i>	
Using MODIS Land-Use/Land-Cover Data and Hydrological Modeling for Estimating Nutrient Concentrations	501
<i>Vladimir J. Alarcon, William McAnally, Gary Ervin, and Christopher Brooks</i>	
Geometrical DCC-Algorithm for Merging Polygonal Geospatial Data	515
<i>Silvija Stankute and Hartmut Asche</i>	
Geospatial Semantics: A Critical Review	528
<i>Pasquale Di Donato</i>	
General Track on Advanced and Emerging Applications	
Modelling Sea Surface Salinity from MODIS Satellite Data	545
<i>Maged Marghany, Mazlan Hashim, and Arthur P. Cracknell</i>	
Skeleton of a Multi-ribbon Surface	557
<i>Ivan Mekhedov and Leonid Mestetskiy</i>	
Multi-criteria Optimization in GIS: Continuous K-Nearest Neighbor Search in Mobile Navigation	574
<i>Kushan Ahmadian, Marina Gavrilova, and David Taniar</i>	
The Application of Disturbance Observer to Propulsion Control of Sub-mini Underwater Robot	590
<i>Yuqi Zhai, Liang Liu, Wenjie Lu, Yu Li, Shiliang Yang, and Francesco Villecco</i>	

On the Security Enhancement of an Efficient and Secure Event Signature Protocol for P2P MMOGs	599
<i>Chun-Ta Li, Cheng-Chi Lee, and Lian-Jun Wang</i>	
A Stable Skeletonization for Tabletop Gesture Recognition	610
<i>Andoni Beristain and Manuel Graña</i>	
Author Index	623
