

Table of Contents

Theoretical Considerations

Tutorial: Graphical Calculus for Quantum Circuits	1
<i>Bob Coecke and Ross Duncan</i>	
One-Way Reversible Multi-head Finite Automata	14
<i>Martin Kutrib and Andreas Malcher</i>	
A Deterministic Two-Way Multi-head Finite Automaton Can Be Converted into a Reversible One with the Same Number of Heads	29
<i>Kenichi Morita</i>	
Undecidability of the Surjectivity of the Subshift Associated to a Turing Machine	44
<i>Rodrigo Torres, Nicolas Ollinger, and Anahí Gajardo</i>	

Reversible Software and Languages

Isomorphic Interpreters from Logically Reversible Abstract Machines . .	57
<i>Roshan P. James and Amr Sabry</i>	
Synthesizing Loops for Program Inversion	72
<i>Cong Hou, Daniel Quinlan, David Jefferson, Richard Fujimoto, and Richard Vuduc</i>	
Frugal Encoding in Reversible <i>MOQA</i> : A Case Study for Quicksort . . .	85
<i>Diarmuid Early, Ang Gao, and Michel Schellekens</i>	
Towards a General-Purpose, Reversible Language for Controlling Self-reconfigurable Robots	97
<i>Ulrik Pagh Schultz</i>	

Reversible and Quantum Circuits

Reversible and Quantum Circuit Optimization: A Functional Approach	112
<i>Zahra Sasanian and D. Michael Miller</i>	
Properties of Quantum Templates	125
<i>Md. Mazder Rahman and Gerhard W. Dueck</i>	
Optimal 4-bit Reversible Mixed-Polarity Toffoli Circuits	138
<i>Marek Szyprowski and Paweł Kerntopf</i>	

Design of an Online Testable Ternary Circuit from the Truth Table	152
<i>Noor M. Nayeem and Jacqueline E. Rice</i>	

Physical Realizations and Design

Garbageless Reversible Implementation of Integer Linear Transformations	160
<i>Stéphane Burignat, Kenneth Vermeirsch, Alexis De Vos, and Michael Kirkedal Thomsen</i>	

Garbage-Free Reversible Integer Multiplication with Constants of the Form $2^k \pm 2^l \pm 1$	171
<i>Holger Bock Axelsen and Michael Kirkedal Thomsen</i>	

Property Checking of Quantum Circuits Using Quantum Multiple-Valued Decision Diagrams	183
<i>Julia Seiter, Mathias Soeken, Robert Wille, and Rolf Drechsler</i>	

Using π DDs in the Design of Reversible Circuits (Work-In-Progress)	197
<i>Mathias Soeken, Robert Wille, Shin-ichi Minato, and Rolf Drechsler</i>	

Distributed Systems

A Verification Technique for Reversible Process Algebra	204
<i>Jean Krivine</i>	

A Reversible Process Calculus and the Modelling of the ERK Signalling Pathway	218
<i>Iain Phillips, Irek Ulidowski, and Shoji Yuen</i>	

Controlled Reversibility and Compensations	233
<i>Ivan Lanese, Claudio Antares Mezzina, and Jean-Bernard Stefani</i>	

Author Index	241
