

1	Introduction	1
1.1	Development of Corneal Surgery	1
1.1.1	Brief History of Corneal Transplantation	1
1.1.2	Brief History of Refractive Laser Surgery	1
1.2	Anatomy of the Cornea and Conjunctiva	2
1.2.1	Corneal Structures	2
1.2.2	Corneal Innervation	4
1.2.3	Corneal Healing	4
1.2.4	Conjunctiva	4
1.3	Anaesthesia for Corneal Surgery	5
1.3.1	Topical Anaesthesia	5
1.3.2	Local Block	6
1.3.3	General Anaesthesia	7
1.4	Suturing	8
1.4.1	Needles	8
1.4.2	Suture Material	8
1.4.3	General Principles	8
1.4.4	Interrupted Sutures	8
1.4.5	Continuous Sutures	9
1.4.6	Suture Adjustment	10
1.4.7	Suture Removal	11
1.4.8	Sutureless Surgery	11
1.5	Corneal Examination	11
1.5.1	Slit-Lamp Examination	11
1.5.2	Schirmer Test	13
1.5.3	Tear Break-Up Time	13
1.5.4	Corneal Sensitivity	13
1.5.5	Pachymetry	13
1.5.6	Keratometry	14
1.5.7	Corneal Topography (Placido Ring Based)	15
1.5.8	Corneal Topography (Scheimpflug)	17
1.5.9	Aberrometry	19
1.5.10	Ocular Response Analyser (ORA)	22
1.5.11	Optical Coherence Tomography (OCT)	24
1.5.12	Confocal Microscopy	26
1.5.13	Specular Microscopy	26

2	Ocular Surface and Reconstructive Surgery	29
2.1	Management of Corneal Foreign Bodies	29
2.1.1	Superficial Foreign Bodies	29
2.1.2	Embedded Foreign Bodies	30
2.2	Management of Corneal Perforations	31
2.2.1	Gluing	31
2.2.2	Suturing	32
2.2.3	Tectonic Graft	34
2.3	Pterygium	35
2.3.1	Surgical Removal	35
2.3.2	Antimetabolites	37
2.4	Phototherapeutic Keratectomy	37
2.4.1	Indications and Contraindications	38
2.4.2	Technique	38
2.4.3	Aftercare	39
2.4.4	Complications	39
2.5	Superficial Keratectomy	40
2.5.1	Indications	40
2.5.2	Technique	40
2.5.3	Complications	40
2.6	Conjunctival Flap	40
2.6.1	Indications and Contraindications	40
2.6.2	Technique	40
2.7	Amniotic Membrane Transplantation (AMT)	41
2.7.1	Indication	43
2.7.2	Technique	43
2.8	Tarsorrhaphy	44
2.8.1	Temporary Tarsorrhaphy	44
2.8.2	Permanent Tarsorrhaphy	45
2.8.3	Tarsorrhaphy Removal	45
2.8.4	Alternative Treatment Options	45
2.9	Lacrimal Occlusion	46
2.9.1	Temporary Lacrimal Occlusion	46
2.9.2	Permanent Lacrimal Occlusion	46
2.10	Stem Cell Transplantation	46
2.11	Corneal Cross-Linking	46
2.11.1	Indications and Contraindications	47
2.11.2	Technique	48
2.11.3	Complications	48
3	Corneal Transplantation	49
3.1	Indications and Techniques	49
3.2	Patient Consent	49
3.3	Specific Equipment	50
3.3.1	Ophthalmic Viscoelastic Devices	50
3.3.2	Scleral Rings	52
3.3.3	Corneal Trephines	53
3.3.4	Cutting Blocks	55
3.3.5	Anterior Lamellar Dissection	55
3.3.6	Posterior Lamellar Dissection	55
3.3.7	Artificial Anterior Chamber	56

3.4	Eye Banking	57
3.4.1	Tissue Retrieval and Preparation	57
3.4.2	Tissue Typing and Matching	58
3.4.3	Tissue Preservation	59
3.5	Penetrating Keratoplasty	59
3.5.1	Technique	60
3.5.2	PKP Triple Procedure	63
3.5.3	Postoperative Refractive Error	64
3.6	Superficial Anterior Lamellar Keratoplasty	64
3.7	Deep Anterior Lamellar Keratoplasty	65
3.7.1	Melles' Technique	65
3.7.2	Big-Bubble Technique	66
3.8	Posterior Lamellar Keratoplasty	66
3.8.1	Descemet's Stripping Automated Endothelial Keratoplasty	68
3.8.2	Descemet's Membrane Endothelial Keratoplasty	71
3.8.3	DSAEK Triple Procedure	72
3.9	Aftercare	73
3.9.1	Treatment and Follow-Up	73
3.9.2	Additional Treatment and Medication	74
3.10	Complications	76
3.10.1	Intraoperative Complications of PKP	76
3.10.2	Intraoperative Complications of DALK	77
3.10.3	Intraoperative Complications of DSEK	78
3.10.4	Postoperative Complications of PKP	79
3.10.5	Postoperative Complications of DALK	82
3.10.6	Postoperative Complications of DSEK	83
3.10.7	Management of Corneal Astigmatism	84
3.11	Outcomes of Keratoplasty	87
3.11.1	Graft Survival	87
3.11.2	Refractive Outcomes	88
3.11.3	Visual Outcomes	88
4	Refractive Corneal Surgery	91
4.1	Incisional Corneal Surgery	91
4.1.1	Radial Keratotomy	91
4.1.2	Arcuate Keratotomy	92
4.1.3	Ruiz Procedure	93
4.1.4	Limbal Relaxing Incisions	93
4.1.5	Complications of Arcuate or Limbal Relaxing Incisions	94
4.2	Corneal Implants	94
4.2.1	Introduction	94
4.2.2	Types of Implants	94
4.2.3	Technique	95
4.2.4	Combination Procedures	96
4.3	Refractive Laser Surgery	96
4.3.1	Patient Selection	96
4.3.2	Pre-assessment	97

4.3.3	Surgical Planning	99
4.3.4	Technique of LASIK	102
4.3.5	Surface Treatments (PRK and LASEK)	104
4.3.6	Aftercare	106
4.3.7	Intraoperative Complications	107
4.3.8	Postoperative Complications	109
4.3.9	Enhancements	111
4.4	Equipment for Corneal Flap Creation	113
4.4.1	Microkeratomes	113
4.4.2	Femtosecond Lasers	114
4.5	Refractive Laser Platforms	116
4.5.1	Alcon Laser Platform (WaveLight)	116
4.5.2	AMO Laser Platform (VISX)	117
4.5.3	Technolas Laser Platform	120
4.5.4	Schwind Laser Platform (Amaris)	121
4.5.5	Zeiss Laser Platform (MEL 80)	123
4.5.6	Nidek Laser Platform	124
4.5.7	iVIS Laser Platform (iRES)	125
4.6	Alternative Procedures	126
4.6.1	Clear Lens Extraction (Refractive Lens Exchange, RLE)	126
4.6.2	Phakic Lenses	126
4.6.3	Intracor	127
4.6.4	SupraCor	127
4.6.5	Conductive Keratoplasty (CK)	128
4.6.6	Technique of Femtosecond Lenticule Extraction	129
4.6.7	Microwave Thermokeratoplasty (Keraflex)	130
4.7	Refractive Outcome Analysis (IBRA, Nomograms)	130
5	Wet Lab	135
5.1	Introduction	135
5.2	Wet Lab Requirements and Maintenance	135
5.2.1	Physical Space	136
5.2.2	Establishing Appropriate Teachers and Curriculum	136
5.2.3	Obtaining Practice Material	137
5.2.4	Stabilising the Eye	138
5.2.5	Preparing the Eye	139
5.2.6	Funding the Wet Lab	139
5.2.7	Wet Lab Etiquette	140
5.3	Corneal Wet Lab	140
5.3.1	Corneal Punch	140
5.3.2	Lamellar Dissection	140
5.3.3	Corneal Suturing	141
5.3.4	Flap Creation	142
	Index	143
