1	Delicious and Healthy Tea: An Overview	1
1.1	Development of the Global Tea Industry.....	1
1.2	Botanical Characteristics	2
1.3	Genetics and Breeding	4
1.4	Physiology and Biochemistry	5
1.5	Kinds of Tea and Manufacture.....	8
1.6	Tea and Human Health	8
1.6.1	Antisenile Activity	9
1.6.2	Improvement in Immunity	9
1.6.3	Anticaries	9
1.6.4	Reduction in Blood-Cholesterol and Prevention of Cardiovascular Disorders.....	9
1.6.5	Anticarcinogenic Activity	10
	References.....	11
2	Tea Germplasm and Breeding in China.....	13
2.1	General Introduction to the Chinese Tea Industry	14
2.1.1	Historical Development of the Tea Industry.....	14
2.1.2	Location and Distribution of Tea Areas.....	15
2.1.3	Tea Production and Its Global Standing	17
2.2	Collection, Conservation, Appraisal and Utilization of Tea Germplasm.....	19
2.2.1	Collection and Conservation.....	19
2.2.2	Appraisal and Utilization	22
2.3	Tea Breeding and Selection Techniques	37
2.3.1	Breeding Techniques	38
2.3.2	Selection Techniques Used for Yield, Quality and Resistance.....	42
2.3.3	Local Adaptability Tests and Registration.....	45
2.4	Propagation and Extension System of New Cultivars	51
2.4.1	Propagation Techniques.....	52
2.4.2	Extension Systems	54
2.4.3	Strategy for Promotion of New Cultivars	54

2.4.4	The Intellectual Property Protection of New Cultivars	54
2.5	Developments and Prospects for Tea Breeding	55
2.5.1	Precise Appraisal of Tea Germplasms	55
2.5.2	Isolation and Application of Functional Genes	56
2.5.3	Marker-Assisted Selection	56
2.5.4	Genetic Transformation	57
2.6	Conclusions	57
	Acknowledgements	58
	References	58
3	Breeding of the Tea Plant (<i>Camellia sinensis</i>) in India	69
3.1	General Introduction to the Indian Tea Industry	70
3.1.1	Historical Introduction to the Tea Industry	70
3.1.2	Global Standing	72
3.1.3	Type of Tea Produced	74
3.1.4	Climate	76
3.2	Tea Germplasm Collection, Conservation, Appraisal	78
3.2.1	Collection and Conservation	78
3.2.2	Appraisal and Utilization	84
3.2.3	Assam Tea and Its Quality	86
3.3	Tea Breeding and Selection Techniques	87
3.3.1	Breeding Techniques	87
3.3.2	Selection Techniques Used for Yield, Resistance and Quality ..	98
3.3.3	Local Adaptability Tests and Registration Systems	102
3.3.4	Value Added Products and Cultivars Used	102
3.4	Propagation and Extension System of New Cultivars	103
3.4.1	Propagation Techniques	103
3.4.2	Extension Organization and Structure	115
3.4.3	Strategy for Promotion of New Cultivars	115
3.4.4	Cultivar Specific Issues	116
3.5	Research and Development	117
3.5.1	R&D Institutions	117
3.5.2	Success Stories of Research in Breeding and Selection	118
3.6	Conclusions	119
	Acknowledgements	120
	References	120
4	Tea Plant (<i>Camellia sinensis</i>) Breeding in Sri Lanka	125
4.1	General Introduction to the Sri Lanka Tea Industry	126
4.1.1	Tea Growing Areas in Sri Lanka	126
4.1.2	Historical Introduction to Sri Lanka Tea	127
4.1.3	Climate, Soil Conditions and Productivity Levels of Tea Growing Area	128
4.1.4	Sri Lankan Tea Industry in the International Market	130
4.1.5	Types of Tea Produced	131

4.2	Tea Germplasm Collection, Conservation and Appraisal	133
4.2.1	Origin of Planting Materials Used in the Country	134
4.2.2	Collection and Conservation Efforts.....	134
4.2.3	Characterization and Evaluation of Germplasm	137
4.2.4	Germplasm Utilization.....	141
4.2.5	Germplasm Enhancement and Pre-Breeding	142
4.2.6	Other Issues Related to the Germplasm	143
4.3	Tea Breeding and Selection	143
4.3.1	Early Attempts at Tea Improvement.....	144
4.3.2	Conventional Breeding and Selection Program	144
4.3.3	Screening and Evaluation	150
4.3.4	Multi-Location Adaptability Trials and Recommended Tea Cultivars.....	153
4.3.5	Dissemination of Planting Material to the Growers.....	158
4.3.6	Non-Conventional Approaches to Tea Breeding	158
4.3.7	Application of Biotechnological Tools for Breeding.....	159
4.3.8	Genomics to Aid Tea Breeding.....	160
4.4	Propagation and Extension System of New Cultivars	161
4.4.1	Propagation Techniques.....	161
4.4.2	Extension System in the Country	164
4.4.3	Strategy for Promotion of New Cultivars	164
4.4.4	Cultivar Specific Issues.....	164
4.5	Future Trends and Goals for Breeding and Selection	165
4.5.1	Cultivars with Expanded List of Traits	166
4.5.2	Diversifying Breeding Objectives.....	166
4.5.3	Handling Climate Change.....	166
4.5.4	Complementary and Cost-Effective Strategies in Germplasm Management.....	167
4.5.5	Application of Molecular Markers and Genomics.....	167
4.5.6	Decentralized Approach in Cultivar Selection.....	169
4.5.7	Perspectives for the Future.....	170
	References.....	170
5	Tea Improvement in Kenya.....	177
5.1	General Introduction to the Kenya Tea Industry.....	178
5.1.1	Introduction of Tea to Africa	178
5.1.2	Introduction of Tea to Kenya	179
5.1.3	Economic Importance of Tea in Kenya	180
5.1.4	History of Tea Improvement in Kenya	180
5.2	Collection, Appraisal and Utilization of Tea Germplasm.....	184
5.2.1	The Collection and Introduction of Tea Cultivars	185
5.2.2	The Relative Tea Species.....	186
5.3	Current Tea Breeding Strategies	186
5.3.1	Breeding and Clonal Selection.....	194
5.3.2	Combining Abilities.....	200

5.3.3	Registration for Plant Breeders' Rights and Adoption of New Cultivars	201
5.4	Future Strategies and Opportunities	203
5.4.1	Tissue Culture	204
5.4.2	Mutation Breeding	205
5.4.3	Genetic Transformation in Tea	205
5.4.4	Breeding for Medicinal Tea	206
5.4.5	Quantitative Trait Loci (QTLs) Mapping	209
5.4.6	From Conventional to Molecular Breeding	210
5.4.7	Participatory Crop Improvement: Involvement of Farmers in Tea Improvement	211
5.5	Conclusions	216
