Part I Plenary Presentations

Equidistribution and Optimal Approximation Class <i>Constantin Bacuta, Long Chen, Jinchao Xu</i>	3
Some Recent Tools and a BDDC Algorithm for 3D Problems in $H(\text{curl})$ <i>Clark R. Dohrmann, Olof B. Widlund</i>	15
Symbolic Techniques for Domain Decomposition Methods <i>T. Cluzeau, V. Dolean, F. Nataf, and A. Quadrat</i>	27
Scalable Domain Decomposition Algorithms for Contact Problems: Theory, Numerical Experiments, and Real World Problems <i>Z. Dostál, T. Kozubek, T. Brzobohatý, A. Markopoulos, M. Sadowská and V. Vondrák</i>	39
Robust Coarsening in Multiscale PDEs <i>Robert Scheichl</i>	51
Multi-level Decompositions of Electronic Wave Functions <i>Harry Yserentant</i>	63
A Substructuring Preconditioner for Three-Dimensional Maxwell's Equations <i>Qiya Hu, Shi Shu, Jun Zou</i>	73

Part II Minisymposia

A Two-Level Schwarz Preconditioner for Heterogeneous Problems <i>V. Dolean, F. Nataf, R. Scheichl and N. Spillane</i>	87
---	----

Heterogeneous Domain Decomposition Methods for Eddy Current Problems	
<i>Ana Alonso Rodríguez</i>	95
Mesh Regularization in Bank-Holst Parallel hp-Adaptive Meshing	
<i>Randolph E. Bank, Hieu Nguyen</i>	103
Robust Parameter-Free Multilevel Methods for Neumann Boundary Control Problems	
<i>Etereldes Gonçalves, Marcus Sarkis</i>	111
An Overlapping Domain Decomposition Method for a 3D PEMFC Model	
<i>Cheng Wang, Mingyan He, Ziping Huang, Pengtao Sun</i>	119
Multigrid Methods for the Biharmonic Problem with Cahn-Hilliard Boundary Conditions	
<i>Susanne C. Brenner, Shiyuan Gu, Li-yeng Sung</i>	127
A Two-Level Additive Schwarz Preconditioner for C^0 Interior Penalty Methods for Cahn-Hilliard Equations	
<i>Kening Wang</i>	135
An Algebraic Multigrid Method Based on Matching in Graphs	
<i>James Brannick, Yao Chen, Johannes Kraus, and Ludmil Zikatanov</i>	143
Shifted Laplacian RAS Solvers for the Helmholtz Equation	
<i>Jung-Han Kimn, Marcus Sarkis</i>	151
A Subspace Correction Method for Nearly Singular Linear Elasticity Problems	
<i>E. Karer, J. K. Kraus, L. T. Zikatanov</i>	159
Adaptive Finite Element Methods with Inexact Solvers for the Nonlinear Poisson-Boltzmann Equation	
<i>Michael Holst, Ryan Szypowski, Yunrong Zhu</i>	167
Preconditioning for Mixed Finite Element Formulations of Elliptic Problems	
<i>Tim Wildey, Guangxi Xue</i>	175
Multigrid Preconditioner for Nonconforming Discretization of Elliptic Problems with Jump Coefficients	
<i>Blanca Ayuso De Dios, Michael Holst, Yunrong Zhu, Ludmil Zikatanov</i>	183
Domain Decomposition Methods of Stochastic PDEs	
<i>Waad Subber, Abhijit Sarkar</i>	191
Improving the Convergence of Schwarz Methods for Helmholtz Equation	
<i>Murthy N Guddati, Senganal Thirunavukkarasu</i>	199

A Domain Decomposition Solver for the Discontinuous Enrichment Method for the Helmholtz Equation <i>Charbel Farhat, Radek Tezaur, Jari Toivanen</i>	207
Domain Decomposition Methods for the Helmholtz Equation: A Numerical Investigation <i>Martin J. Gander, Hui Zhang</i>	215
Stable BETI Methods in Electromagnetics <i>Olaf Steinbach, Markus Windisch</i>	223
Preconditioning High-Order Discontinuous Galerkin Discretizations of Elliptic Problems <i>Paola F. Antonietti, Paul Houston</i>	231
A Block Solver for the Exponentially Fitted IIPG-0 Method <i>Blanca Ayuso de Dios, Ariel Lombardi, Paola Pietra, Ludmil Zikatanov</i>	239
A Nonoverlapping DD Preconditioner for a Weakly Over-Penalized Symmetric Interior Penalty Method <i>Andrew T. Barker, Susanne C. Brenner, Eun-Hee Park, Li-Yeng Sung</i>	247
Sharp Condition Number Estimates for the Symmetric 2-Lagrange Multiplier Method <i>Stephen W. Drury, Sébastien Loisel</i>	255
Time Domain Maxwell Equations Solved with Schwarz Waveform Relaxation Methods <i>Yves Courvoisier, Martin J. Gander</i>	263
Comparison of a One and Two Parameter Family of Transmission Conditions for Maxwell's Equations with Damping <i>M. El Bouajaji, V. Dolean, M. J. Gander and S. Lanteri</i>	271
Hybrid Domain Decomposition Solvers for the Helmholtz and the Time Harmonic Maxwell's Equation <i>M. Huber, A. Pechstein, J. Schöberl</i>	279
Multiscale Domain Decomposition Preconditioners for Anisotropic High-Contrast Problems <i>Yalchin Efendiev, Juan Galvis, Raytcho Lazarov, Svetozar Margenov and Jun Ren</i>	289
A Robust FEM-BEM Solver for Time-Harmonic Eddy Current Problems <i>Michael Kolmbauer, Ulrich Langer</i>	297

Domain Decomposition Methods for Auxiliary Linear Problems of an Elliptic Variational Inequality <i>Jungho Lee</i>	305
New Theoretical Coefficient Robustness Results for FETI-DP <i>Clemens Pechstein, Marcus Sarkis, Robert Scheichl</i>	313
Monotone Multigrid Methods Based on Parametric Finite Elements <i>Thomas Dickopf, Rolf Krause</i>	321
TFETI Scalable Solvers for Transient Contact Problems <i>T. Kozubek, Z. Dostál, T. Brzobohatý, A. Markopoulos, O. Vlach</i>	329
Model of Imperfect Interfaces in Composite Materials and Its Numerical Solution by FETI Method <i>Jaroslav Kruis, Jan Zeman, Pavel Gruber</i>	337
A Comparison of TFETI and TBETI for Numerical Solution of Engineering Problems of Contact Mechanics <i>D. Lukáš, M. Sadowská, T. Kozubek, A. Markopoulos, and T. Brzobohatý</i>	345
FETI-DP for Elasticity with Almost Incompressible Material Components <i>Sabrina Gippert, Axel Klawonn, Oliver Rheinbach</i>	353
An Alternative Coarse Space Method for Overlapping Schwarz Preconditioners for Raviart-Thomas Vector Fields <i>Duk-Soon Oh</i>	361
A Simultaneous Augmented Lagrange Approach for the Simulation of Soft Biological Tissue <i>Dirk Böse, Sarah Brinkhues, Raimund Erbel, Axel Klawonn, Oliver Rheinbach, Jörg Schröder</i>	369
Techniques for Locally Adaptive Time Stepping Developed over the Last Two Decades <i>Martin J. Gander, Laurence Halpern</i>	377
Newton-Schwarz Optimised Waveform Relaxation Krylov Accelerators for Nonlinear Reactive Transport <i>Florian Haeberlein, Laurence Halpern, Anthony Michel</i>	387
Alternating and Linearized Alternating Schwarz Methods for Equidistributing Grids <i>Martin J. Gander, Ronald D. Haynes, Alexander J.M. Howse</i>	395
Stability Analysis of the Matrix-Free Linearly Implicit Euler Method <i>Adrian Sandu, Amik St-Cyr</i>	403

Augmented Interface Systems for the Darcy-Stokes Problem <i>Marco Discacciati</i>	411
Mortar Coupling for Heterogeneous Partial Differential Equations <i>Pablo Blanco, Paola Gervasio, Alfio Quarteroni</i>	419
Heterogeneous Substructuring Methods for Coupled Surface and Subsurface Flow <i>Heiko Berninger, Ralf Kornhuber, Oliver Sander</i>	427
An Asymptotic Approach to Compare Coupling Mechanisms for Different Partial Differential Equations <i>Martin J. Gander, Véronique Martin</i>	435
Coupling Geometrically Exact Cosserat Rods and Linear Elastic Continua <i>Oliver Sander</i>	443
Parareal Schwarz Waveform Relaxation Methods <i>Martin J. Gander, Yao-Lin Jiang, Rong-Jian Li</i>	451
A Parallel Overlapping Time-Domain Decomposition Method for ODEs <i>Stefan Güttel</i>	459
Two-Grid LNKs for Distributed Control of Unsteady Incompressible Flows <i>Haijian Yang, Xiao-Chuan Cai</i>	467
On the Applicability of Lions' Energy Estimates in the Analysis of Discrete Optimized Schwarz Methods with Cross Points <i>Martin J. Gander, Felix Kwok</i>	475
Non Shape Regular Domain Decompositions: An Analysis Using a Stable Decomposition in H_0^1 <i>Martin J. Gander, Laurence Halpern, Kévin Santugini Repiquet</i>	485
Overlapping Domain Decomposition: Convergence Proofs <i>Minh-Binh Tran</i>	493
Part III Contributed Presentations	
FETI Methods for the Simulation of Biological Tissues <i>Christoph Augustin, Olaf Steinbach</i>	503
Fast Summation Techniques for Sparse Shape Functions in Tetrahedral hp-FEM <i>Sven Beuchler, Veronika Pillwein, Sabine Zaglmayr</i>	511

A Non-overlapping Quasi-optimal Optimized Schwarz Domain Decomposition Algorithm for the Helmholtz Equation <i>Y. Boubendir, X. Antoine, C. Geuzaine</i>	519
A Continuous Approach to FETI-DP Mortar Methods: Application to Dirichlet and Stokes Problem <i>E. Chacón Vera, D. Franco Coronil, A. Martínez Gavara</i>	527
One-Shot Domain Decomposition Methods for Shape Optimization Problems <i>Rongliang Chen, Xiao-Chuan Cai</i>	535
A Schur Complement Method for Compressible Navier-Stokes Equations <i>Thu-Huyen Dao, Michael Ndjinga, Frédéric Magoulès</i>	543
Numerical Study of the Almost Nested Case in a Multilevel Method Based on Non-nested Meshes <i>Thomas Dickopf, Rolf Krause</i>	551
BDDC for Higher-Order Discontinuous Galerkin Discretizations <i>Laslo Diosady, David Darmofal</i>	559
ARAS2 Preconditioning Technique for CFD Industrial Cases <i>Thomas Dufaud, Damien Tromeur-Dervout</i>	569
An Implicit and Parallel Chimera Type Domain Decomposition Method <i>B. Eguzkitza, G. Houzeaux, R. Aubry, O. Peredo</i>	577
Optimized Schwarz Waveform Relaxation for Porous Media Applications <i>Caroline Japhet, Pascal Omnes</i>	585
On Block Preconditioners for Generalized Saddle Point Problems <i>Piotr Krzyżanowski</i>	593
Optimal Control of the Convergence Rate of Schwarz Waveform Relaxation Algorithms <i>Florian Lemarié, Laurent Debreu, Eric Blayo</i>	599
A New Distributed Optimization Approach for Solving CFD Design Problems Using Nash Game Coalition and Evolutionary Algorithms <i>Jyri Leskinen, Jacques Périaux</i>	607
A Neumann-Dirichlet Preconditioner for FETI-DP Method for Mortar Discretization of a Fourth Order Problems in 2D <i>Leszek Marcinkowski</i>	615
A DG Space–Time Domain Decomposition Method <i>Martin Neumüller, Olaf Steinbach</i>	623

Parallel Adaptive Deflated GMRES

Désiré Nuentza Wakam, Jocelyne Erhel, William D. Gropp 631

Quasi-optimality of BDDC Methods for MITC Reissner-Mindlin Problems

L. Beirão da Veiga, C. Chinosi, C. Lovadina, L.F. Pavarino, J. Schöberl 639

Penalty Robin-Robin Domain Decomposition Schemes for Contact Problems of Nonlinear Elasticity

Ihor I. Prokopyshyn, Ivan I. Dyyak, Rostyslav M. Martynyak, Ivan A. Prokopyshyn 647

Domain Decomposition Method for Stokes Problem with Tresca Friction

Mohamed Khaled Gdoura, Jonas Koko, Taoufik Sassi 655

A Hybrid Discontinuous Galerkin Method for Darcy-Stokes Problems

Herbert Egger, Christian Waluga 663

A Parallel Monolithic Domain Decomposition Method for Blood Flow Simulations in 3D

Yuqi Wu, Xiao-Chuan Cai 671

A Fully Implicit Compressible Euler Solver for Atmospheric Flows

Chao Yang, Xiao-Chuan Cai 679
