Part I Definition and Classification of Acute Kidney Failure

1.1 Definition and Classification of Acute Kidney Injury	3
Vijay Karajala and John A. Kellum	
1.1.1 Introduction	3
1.1.2 What Is Acute Kidney Injury? Current Controversies	3
1.1.3 Renal “Failure” or Renal “Success”	4
1.1.4 Oliguria and Anuria	4
1.1.5 Prerenal Azotemia and Acute Tubular Necrosis	4
1.1.6 Limitations of Biomarkers	5
1.1.7 Renal Failure Defined by RIFLE Criteria	5
1.1.8 The Concept of Acute Kidney Injury: A Paradigm Shift.	6
1.1.9 Validation Studies Using RIFLE	6
1.1.10 Conceptual Development and Future Directions	8
1.1.11 Conclusions	8
References	8

Part II Overview of Pathophysiology, Etiology and Epidemiology

2.1 Mechanisms of Acute Kidney Injury and Repair	13
Joseph V. Bonventre	
2.1.1 Introduction	13
2.1.2 Injury	14
2.1.3 Inflammation	15
2.1.4 Paracrine Effects of Bone Marrow–Derived Stem Cells	17
2.1.5 Other Mechanisms to Limit or Stop Inflammation	17
2.1.6 Repair	18
2.1.7 Conclusions	18
References	19
2.2 Uremic Toxins	21
Griet Glorieux, Wim Van Biesen, Norbert Lameire, and Raymond Vanholder	
2.2.1 Introduction	21
2.2.2 Interfering Factors Due to Renal Replacement Therapy	21
2.2.3 Biochemical Alterations	22

2.2.4	Factors Responsible for the Uremic Syndrome	23
2.2.5	Major Low-Molecular-Weight Uremic Retention Products.	24
2.2.6	Middle Molecules	27
2.2.7	Factors Influencing Plasma Concentration of Uremic Solutes.	28
2.2.8	Conclusions and Therapeutic Implications	28
	References	28
2.3	Prerenal Acute Kidney Failure	33
	Eric A. J. Hoste	
2.3.1	Introduction	33
2.3.2	Pathophysiology.	34
2.3.3	Causes of Prerenal Acute Kidney Failure	34
2.3.4	Diagnosis of Prerenal Acute Kidney Injury.	35
2.3.5	Epidemiology of Prerenal Acute Kidney Failure.	35
	References	36
2.4	Intrinsic Acute Kidney Injury	39
	Norbert Lameire	
2.4.1	Epidemiology of AKI in the ICU Focusing on Non-ATN Etiologies	40
2.4.2	Clinical Evaluation of the Critically Ill Patient with AKI	41
2.4.3	Summary of General Therapeutic Principles of AKI in the ICU	50
	References	51
2.5	Urinary Tract Obstruction	53
	Angela D'Angelo and Dorella Del Prete	
2.5.1	Introduction	53
2.5.2	Causes of Obstruction	54
2.5.3	Renal Damage Induced by Urinary Tract Obstructions.	56
2.5.4	Clinical Signs.	57
2.5.5	Diagnostic Approach	58
2.5.6	Instrumental Diagnostics	58
2.5.7	Radiologic Investigations.	59
2.5.8	Renal Function After the Removal of an Obstruction	60
2.5.9	Treatment	60
	References	61
2.6	Epidemiology of Acute Kidney Injury	63
	Tariq Ali and Paul Roderick	
2.6.1	History	63
2.6.2	Incidence	64
2.6.3	Outcomes	67
2.6.4	Summary	71
	References	71

2.7	Economic Impact of Acute Kidney Failure	75
	Joseph F. Dasta and Sandra L. Kane-Gill	
2.7.1	Quantifying Costs in the Intensive Care Unit	75
2.7.2	Overview of Studies Reporting Costs Associated with Acute Kidney Injury	75
2.7.3	Clinical Studies of Costs Associated with AKI	78
2.7.4	Take Home Pearls	80
	References	80
 Part III Diagnostic Evaluation and Procedures		
3.1	Clinical and Laboratory Evaluation	83
	Robert J. Anderson	
	Objectives to Understand	83
3.1.1	Introduction	83
3.1.2	Presenting Manifestations of AKI	83
3.1.3	Causes of AKI	86
3.1.4	Evaluation of AKI	87
3.1.5	Summary	91
	References	91
3.2	Kidney Function Tests and Urinalysis	95
	Sean M. Bagshaw	
	Objectives to Understand	95
3.2.1	Introduction	95
3.2.2	Overview of Kidney Function	96
3.2.3	Assessment of Kidney Function	96
3.2.4	Summary	105
	References	105
3.3	Renal Ultrasound	109
	Vicki E. Noble, Andrew Liteplo, and David F. M. Brown	
3.3.1	Introduction	109
3.3.2	Ultrasound Basics	110
3.3.3	Anatomy	110
3.3.4	Scanning Techniques	111
3.3.5	Applications	111
3.3.6	Summary	115
	References	116
3.4	Management of Acute Kidney Problems: Indications for Renal Biopsy in Acute Renal Disease	117
	Alan D. Salama	
3.4.1	Introduction	117
3.4.2	Renal Biopsy in Acute Renal Failure	119
3.4.3	Complications of Biopsies	120
3.4.4	Biopsy Processing and Adequacy	121

3.4.5	Conclusions	122
3.4.6	Take Home Pearls	122
	References	122
 Part IV Prevention and Conservative Therapy of Acute Kidney Failure		
4.1	Volume Resuscitation and Management	125
	Jean-Louis Vincent and Barbara Ceradini	
4.1.1	Introduction	125
4.1.2	Risk of Hypervolemia	125
4.1.3	Potential Errors in Fluid Management in the Patient with, or at Risk of, Acute Renal Failure	126
4.1.4	How to Assess Fluid Status?	127
4.1.5	Types of Fluids.	128
4.1.6	Conclusion	129
4.1.7	Take Home Pearls	129
	References	130
4.2	Management of Electrolyte Disorders	131
	Michael Oppert	
4.2.1	Sodium	131
4.2.2	Potassium	134
4.2.3	Calcium	135
4.2.4	Phosphate	137
4.2.5	Conclusions	138
	References	138
4.3	Acid–Base Balance	139
	John A. Kellum	
4.3.1	Introduction	139
4.3.2	The Henderson–Hasselbalch Equation	139
4.3.3	Water and Physical Chemistry	140
4.3.4	Strong Ions	141
4.3.5	Regulation of Plasma Strong Ion Difference	141
4.3.6	Pathophysiology of Strong Ion Imbalance	142
4.3.7	Weak Acids	143
4.3.8	Unmeasured Anions	144
4.3.9	Conclusions	145
	References	145
4.4	Monitoring and Management of Systemic Hemodynamics	147
	Non Wajanaponsan and Michael R. Pinsky	
4.4.1	Epidemiology	147
4.4.2	Renal Hemodynamic Management Perspective	147
4.4.3	Renal Perfusion Pressure	147
4.4.4	Hemodynamic Management and Resuscitation	148

4.4.5	Evaluation for Preload Responsiveness	150
4.4.6	Vasopressor Treatment	150
4.4.7	Inotropic Therapy	152
4.4.8	Improve Patient Outcome with Optimizing Oxygen Delivery	153
4.4.9	Conclusion	153
	References	153
