Part I Basic Concept

1	Introduction	3
1.1	Relaxation Time Approximation (RTA) and Current Vertex Correction (CVC).	3
1.2	Non-Fermi-Liquid-Like Transport Phenomena in Cuprate High- T_c Cuprates	5
1.3	Non-Fermi Liquid Transport Phenomena in $CeMIn_5$ ($M = Co, Rh, \text{ or } Ir$) and κ -(BEDT-TTF)	8
1.4	Fermi Liquid or Non-Fermi Liquid?	9
	References	10
2	Fluctuation Theory	15
2.1	Phenomenological Spin Fluctuation Model	15
2.2	Model Hamiltonian and FLEX Approximation	16
2.3	Hot/Cold-Spot Structure and T -Linear Resistivity in Nearly AF Metals	20
2.4	Validity of the Spin Fluctuation Theories	24
	References	25
3	Anomalous Transport Phenomena in Nearly AF Fermi Liquids	27
3.1	Boltzmann Transport Theory and RTA	27
3.2	The Variational Principle and CVC	31
3.3	Analysis of the CVC Based on the Fermi Liquid Theory	33
3.4	CVC and Ward Identity	40
3.5	CVC in Nearly AF Fermi Liquids	44
	References	48

4	Anomalous Hall Effect (AHE) and Spin Hall Effect (SHE)	51
4.1	Relation Between AHE and SHE	51
4.2	AHE in Two-Orbital Tight-Binding Model	52
4.3	General Expression for the AHC and SHC	60
	References	62

Part II Recent Advances

5	Transport Phenomena in Cuprate HTSCs Above T^*	65
5.1	FLEX+CVC Approximation	65
5.2	Resistivity and Hall Coefficient	67
5.3	Magnetoresistance	71
5.4	Thermoelectric Power	74
5.5	Comments on Over-Doped HTSCs and Other Transport Coefficients	76
5.6	Summary of This Chapter	78
	References	79
6	Transport Phenomena in HTSCs Below T^*	81
6.1	Mechanism of Pseudo-Gap Phenomena: Suppression of ρ , R_H and S Below T^*	81
6.2	Enhancement of Nernst Coefficient and Magnetoresistance Below T^*	85
6.3	Fermi Arc Picture and Transport Phenomena	88
6.4	Summary and Future Problems	89
	References	90
7	AC Transport Phenomena in HTSCs	93
7.1	AC Hall Effect in Hole-Doped Systems	94
7.2	AC Hall Effect in Electron-Doped Systems	98
	References	101
8	Impurity Effects in Nearly AF Metals	103
8.1	Hall Coefficient in the Presence of “Weak” Local Impurities	104
8.2	Effect of “Strong” Local Impurities Near AF QCP	106
	References	112
9	Anomalous Transport Behaviors in Heavy Fermions and Organic Superconductors	115
9.1	$CeMIn_5$ ($M = Co, Rh, Ir$)	115
9.2	κ -(BEDT-TTF)	120
	References	123

10	Multiorbital Systems.	125
10.1	Heavy Fermion Systems: Grand Kadowaki-Woods Relation	125
10.2	Fe-Based Superconductors	133
	References	142
11	AHE and SHE in Multiorbital Systems	145
11.1	SHE in Transition Metals	145
11.2	AHE in Transition Metals	151
11.3	Spin-Structure-Driven AHE in Pyrochlore Compounds	152
11.4	AHE and SHE in Heavy Fermion Systems	159
11.5	Summary of This Chapter	164
	References	167
	Appendix A: Proof of Variational Formula	169
	Appendix B: Expression of $\mathcal{T}^{ij}(\epsilon, \epsilon'; \omega)$.	171
