

Table of Contents

Towards Reactive Multi-Context Systems	1
<i>Gerhard Brewka</i>	
Logic Programming in the 1970s	11
<i>Robert Kowalski</i>	
Integrating Temporal Extensions of Answer Set Programming	23
<i>Felicidad Aguado, Gilberto Pérez, and Concepción Vidal</i>	
Forgetting under the Well-Founded Semantics	36
<i>José Júlio Alferes, Matthias Knorr, and Kewen Wang</i>	
The Fourth Answer Set Programming Competition: Preliminary Report	42
<i>Mario Alviano, Francesco Calimeri, Günther Charwat, Minh Dao-Tran, Carmine Dodaro, Giovambattista Ianni, Thomas Krennwallner, Martin Kronegger, Johannes Oetsch, Andreas Pfandler, Jörg Pührer, Christoph Redl, Francesco Ricca, Patrik Schneider, Martin Schwengerer, Lara Katharina Spendier, Johannes Peter Wallner, and Guohui Xiao</i>	
WASP: A Native ASP Solver Based on Constraint Learning	54
<i>Mario Alviano, Carmine Dodaro, Wolfgang Faber, Nicola Leone, and Francesco Ricca</i>	
The Complexity Boundary of Answer Set Programming with Generalized Atoms under the FLP Semantics	67
<i>Mario Alviano and Wolfgang Faber</i>	
ARVis: Visualizing Relations between Answer Sets	73
<i>Thomas Ambroz, Günther Charwat, Andreas Jusits, Johannes Peter Wallner, and Stefan Woltran</i>	
Symbolic System Synthesis Using Answer Set Programming	79
<i>Benjamin Andres, Martin Gebser, Torsten Schaub, Christian Haubelt, Felix Reimann, and Michael Glaß</i>	
Accurate Computation of Sensitizable Paths Using Answer Set Programming	92
<i>Benjamin Andres, Matthias Sauer, Martin Gebser, Tobias Schubert, Bernd Becker, and Torsten Schaub</i>	

HEX Semantics via Approximation Fixpoint Theory	102
<i>Christian Antić, Thomas Eiter, and Michael Fink</i>	
Encoding Higher Level Extensions of Petri Nets in Answer Set Programming	116
<i>Saadat Anwar, Chitta Baral, and Katsumi Inoue</i>	
CPLUS2ASP: Computing Action Language C+ in Answer Set Programming	122
<i>Joseph Babb and Joohyung Lee</i>	
Towards Answer Set Programming with Sorts	135
<i>Evgenii Balai, Michael Gelfond, and Yuanlin Zhang</i>	
Prolog and ASP Inference under One Roof	148
<i>Marcello Balduccini, Yuliya Lierler, and Peter Schüller</i>	
Event-Object Reasoning with Curated Knowledge Bases: Deriving Missing Information	161
<i>Chitta Baral and Nguyen H. Vo</i>	
Towards Query Answering in Relational Multi-Context Systems	168
<i>Rosamaria Barilaro, Michael Fink, Francesco Ricca, and Giorgio Terracina</i>	
Spectra in Abstract Argumentation: An Analysis of Minimal Change . . .	174
<i>Ringo Baumann and Gerhard Brewka</i>	
Normalizing Cardinality Rules Using Merging and Sorting Constructions	187
<i>Jori Bomanson and Tomi Janhunen</i>	
Experience Based Nonmonotonic Reasoning	200
<i>Daniel Borchmann</i>	
An ASP Application in Integrative Biology: Identification of Functional Gene Units	206
<i>Philippe Bordron, Damien Eveillard, Alejandro Maass, Anne Siegel, and Sven Thiele</i>	
Evaluating Answer Set Clause Learning for General Game Playing	219
<i>Timothy Cereszke, Orkunt Sabuncu, and Michael Thielscher</i>	
VCWC: A Versioning Competition Workflow Compiler	233
<i>Günther Charwat, Giovambattista Ianni, Thomas Krennwallner, Martin Kronegger, Andreas Pfandler, Christoph Redl, Martin Schwengerer, Lara Katharina Spendier, Johannes Peter Wallner, and Guohui Xiao</i>	

A Sequential Model for Reasoning about Bargaining in Logic Programs	239
<i>Wu Chen, Dongmo Zhang, and Maonian Wu</i>	
Extending the Metabolic Network of <i>Ectocarpus Siliculosus</i> Using Answer Set Programming	245
<i>Guillaume Collet, Damien Eveillard, Martin Gebser, Sylvain Prigent, Torsten Schaub, Anne Siegel, and Sven Thiele</i>	
Negation as a Resource: A Novel View on Answer Set Semantics	257
<i>Stefania Costantini and Andrea Formisano</i>	
AGM-Style Belief Revision of Logic Programs under Answer Set Semantics	264
<i>James Delgrande, Pavlos Peppas, and Stefan Woltran</i>	
Efficient Approximation of Well-Founded Justification and Well-Founded Domination	277
<i>Christian Drescher and Toby Walsh</i>	
Approximate Epistemic Planning with Postdiction as Answer-Set Programming	290
<i>Manfred Eppe, Mehul Bhatt, and Frank Dylla</i>	
Combining Equilibrium Logic and Dynamic Logic	304
<i>Luis Fariñas del Cerro, Andreas Herzig, and Ezgi Iraz Su</i>	
ActHEX: Implementing HEX Programs with Action Atoms	317
<i>Michael Fink, Stefano Germano, Giovambattista Ianni, Christoph Redl, and Peter Schüller</i>	
Debugging Answer-Set Programs with Ouroboros – Extending the SeaLion Plugin	323
<i>Melanie Frühstück, Jörg Pührer, and Gerhard Friedrich</i>	
Game Semantics for Non-monotonic Intensional Logic Programming	329
<i>Chrysida Galanaki, Christos Nomikos, and Panos Rondogiannis</i>	
Matchmaking with Answer Set Programming	342
<i>Martin Gebser, Thomas Glase, Orkunt Sabuncu, and Torsten Schaub</i>	
Ricochet Robots: A Transverse ASP Benchmark	348
<i>Martin Gebser, Holger Jost, Roland Kaminski, Philipp Obermeier, Orkunt Sabuncu, Torsten Schaub, and Marius Schneider</i>	
Decidability and Implementation of Parametrized Logic Programs	361
<i>Ricardo Gonçalves and José Júlio Alferes</i>	

Non-monotonic Temporal Goals	374
<i>Ricardo Gonçalves, Matthias Knorr, João Leite, and Martin Slota</i>	
On Equivalent Transformations of Infinitary Formulas under the Stable Model Semantics (Preliminary Report)	387
<i>Amelia Harrison, Vladimir Lifschitz, and Miroslaw Truszczyński</i>	
An Application of ASP to the Field of Second Language Acquisition . . .	395
<i>Daniela Incelesan</i>	
Turner's Logic of Universal Causation, Propositional Logic, and Logic Programming	401
<i>Jianmin Ji and Fangzhen Lin</i>	
Concrete Results on Abstract Rules	414
<i>Markus Krötzsch, Despoina Magka, and Ian Horrocks</i>	
Linear Logic Programming for Narrative Generation	427
<i>Chris Martens, Anne-Gwenn Bosser, João F. Ferreira, and Marc Cavazza</i>	
Implementing Informal Semantics of ASP	433
<i>Artur Mikitiuk and Miroslaw Truszczyński</i>	
Implementing Belief Change in the Situation Calculus and an Application	439
<i>Maurice Pagnucco, David Rajaratnam, Hannes Strass, and Michael Thielscher</i>	
Debugging Non-ground ASP Programs with Choice Rules, Cardinality and Weight Constraints	452
<i>Axel Polleres, Melanie Frühstück, Gottfried Schenner, and Gerhard Friedrich</i>	
Conflict-Based Program Rewriting for Solving Configuration Problems	465
<i>Anna Ryabokon, Gerhard Friedrich, and Andreas A. Falkner</i>	
Program Updating by Incremental and Answer Subsumption Tabling . .	479
<i>Ari Saptawijaya and Luís Moniz Pereira</i>	
Characterization Theorems for Revision of Logic Programs	485
<i>Nicolas Schwind and Katsumi Inoue</i>	
Flexible Combinatory Categorical Grammar Parsing Using the CYK Algorithm and Answer Set Programming	499
<i>Peter Schüller</i>	
Early Recovery in Logic Program Updates	512
<i>Martin Slota, Martin Baláz, and João Leite</i>	

Preference Handling for Belief-Based Rational Decisions	518
<i>Samy Sá and João Alcântara</i>	
Logic-Based Techniques for Data Cleaning: An Application to the Italian National Healthcare System	524
<i>Giorgio Terracina, Alessandra Martello, and Nicola Leone</i>	
Justifications for Logic Programming	530
<i>Carlos Viegas Damásio, Anastasia Analyti, and Grigoris Antoniou</i>	
Belief Change in Nonmonotonic Multi-Context Systems	543
<i>Yisong Wang, Zhiqiang Zhuang, and Kewen Wang</i>	
On Optimal Solutions of Answer Set Optimization Problems	556
<i>Ying Zhu and Mirosław Truszczyński</i>	
Author Index	569
