1	Introduction	1
1.1	Overview	1
1.2	Contributions	3
1.3	Organization	5
	References	7
2	Background Review	9
2.1	QoS Evaluation of Web Services	9
2.2	QoS Prediction of Web Services	10
2.3	Fault-Tolerant Web Services	11
	References	12
3	QoS Evaluation of Web Services	19
3.1	Overview	19
3.2	Distributed QoS Evaluation Framework	20
3.2.1	QoS Model of Web Services	20
3.2.2	System Architecture	21
3.3	Evaluation 1: Amazon Web Services	23
3.4	Evaluation 2: Internet Web Services	25
3.4.1	Information of Web Services	26
3.4.2	Generating Java Codes for Web Services	28
3.4.3	Failure Probability	30
3.4.4	Response Time and Throughput	35
3.5	Summary	38
	References	38
4	Neighborhood-Based QoS Prediction of Web Services	41
4.1	Overview	41
4.2	User-Collaborative QoS Collection	42
4.3	Similarity Computation	44
4.3.1	Pearson Correlation Coefficient	44
4.3.2	Significance Weighting	45

4.4	QoS Value Prediction	46
4.4.1	Similar Neighbors Selection	46
4.4.2	Missing Value Prediction	47
4.4.3	Prediction for Active Users	49
4.4.4	Web Service Recommendation	49
4.4.5	Computational Complexity Analysis	50
4.5	Implementation and Experiments	52
4.5.1	Implementation	52
4.5.2	Experimental Setup	54
4.5.3	Performance Comparison	54
4.5.4	Impact of the Missing Value Prediction	56
4.5.5	Impact of the Significance Weight	58
4.5.6	Impact of the Confidence Weight	58
4.5.7	Impact of Enhanced Top-K	59
4.5.8	Impact of λ	61
4.6	Summary	63
	References	63
5	Model-Based QoS Prediction of Web Services	65
5.1	Overview	65
5.2	Model-Based QoS Prediction	67
5.2.1	Problem Description	67
5.2.2	Neighborhood Similarity Computation	68
5.2.3	Neighborhood-Integrated Matrix Factorization	69
5.2.4	Complexity Analysis	71
5.3	Experiments	71
5.3.1	Dataset Description	72
5.3.2	Metrics	73
5.3.3	Comparison	73
5.3.4	Impact of Parameter α	75
5.3.5	Impact of Matrix Density	77
5.3.6	Impact of Top-K	78
5.3.7	Impact of Dimensionality	79
5.4	Summary	80
	References	80
6	Ranking-Based QoS Prediction of Web Services	83
6.1	Overview	83
6.2	Quality Ranking Framework	84
6.2.1	Ranking Similarity Computation	84
6.2.2	Find Similar Users	85
6.2.3	Preference Function	86
6.2.4	Greedy Order Algorithm	86
6.3	Experiments	88
6.3.1	Dataset Description	88
6.3.2	Evaluation Metric	89

6.3.3	User-Based and Item-Based Models	89
6.3.4	Performance Comparison	91
6.3.5	Impact of Parameters	93
6.4	Summary	94
	References	95
7	QoS-Aware Fault Tolerance for Web Services	97
7.1	Overview	97
7.2	QoS-Aware Middleware	98
7.2.1	Basic Concepts	98
7.2.2	Middleware Architecture	99
7.3	Basic Fault Tolerance Strategies	101
7.4	User Requirements and QoS Model	104
7.4.1	User Requirement Model	104
7.4.2	Service Community	105
7.5	Adaptive Fault Tolerance Strategy Configuration	106
7.5.1	Notations	106
7.5.2	Scalable RTT Prediction	106
7.5.3	Adaptive Fault Tolerance Strategy	108
7.6	Experiments	110
7.6.1	Experimental Setup	110
7.6.2	Studies of the Typical Examples	111
7.6.3	Studies of Different User Requirements	114
7.6.4	Studies of Different Faults	115
7.7	Summary	117
	References	117
8	QoS-Aware Selection Framework for Web Services	119
8.1	Overview	119
8.2	Motivating Example	120
8.3	System Architecture	122
8.3.1	QoS Properties of Web Services	123
8.3.2	Fault Tolerance Strategies	123
8.3.3	Service Composition Model	124
8.3.4	Consistency Checking	125
8.4	Fault Tolerance Strategy Selection	128
8.4.1	Notations and Utility Function	128
8.4.2	Selection Candidates	129
8.4.3	Optimal Selection with Local Constraints	130
8.4.4	Optimal Selection with Global Constraints	131
8.4.5	Heuristic Algorithm FT-HEU	133
8.4.6	Dynamic Reconfiguration	138
8.5	Experiments	138
8.5.1	Case Study	139
8.5.2	Performance Study	141

8.6 Summary	143
References	143
9 Conclusion and Future Work	145
9.1 Conclusion	145
9.2 Future Work	146
