

Table of Contents

Simultaneous Tensor and Fiber Registration (STFR) for Diffusion Tensor Images of the Brain	1
<i>Zhong Xue and Stephen T.C. Wong</i>	
Real-Time Marker-Free Patient Registration and Image-Based Navigation Using Stereovision for Dental Surgery	9
<i>Junchen Wang, Hideyuki Suenaga, Liangjing Yang, Hongen Liao, Etsuko Kobayashi, Tsuyoshi Takato, and Ichiro Sakuma</i>	
Segmentation of 3D Transesophageal Echocardiograms by Multi-cavity Active Shape Model and Gamma Mixture Model	19
<i>Alexander Haak, Gonzalo Vegas-Sanchez-Ferrero, Harriët H. Mulder, Hortense A. Kirisli, Nora Baka, Coert Metz, Stefan Klein, Ben Ren, Gerard van Burken, Antonius F.W. van der Steen, Josien P.W. Pluim, Theo van Walsum, and Johan G. Bosch</i>	
Automatic and Real-Time Identification of Breathing Pattern from Ultrasound Liver Images	27
<i>Jiaze Wu, Yanling Chi, Cheng Li, Bien Soo Tan, London Lucien Ooi, Satheesh Ramamurthy, and Jimin Liu</i>	
Simultaneous Tracking, 3D Reconstruction and Deforming Point Detection for Stereoscope Guided Surgery	35
<i>Bingxiong Lin, Adrian Johnson, Xiaoning Qian, Jaime Sanchez, and Yu Sun</i>	
Hybrid Multimodal Deformable Registration with a Data-Driven Deformation Prior	45
<i>Yongning Lu, Ying Sun, Rui Liao, and Sim Heng Ong</i>	
Planning of Middle Hepatic Vein-Guided Hemihepatectomy: Resection Pathway Construction and Optimization	55
<i>Wenyu Chen, Jiayin Zhou, Weimin Huang, Yanling Chi, Wei Xiong, Sudhakar Kundapur Venkatesh, Stephen Kin Yong Chang, Jimin Liu, and Qi Tian</i>	
Cascaded Shape Regression for Automatic Prostate Segmentation from Extracorporeal Ultrasound Images	65
<i>Jierong Cheng, Wei Xiong, Ying Gu, Shue Ching Chia, and Yue Wang</i>	

Evaluation of Endoscopic Image Enhancement for Feature Tracking: A New Validation Framework	75
<i>Faiçal Selka, Stéphane A. Nicolau, Vincent Agnus, Abdel Haffid Bessaid, Jacques Marescaux, and Luc Soler</i>	
Intensity-Based 3D-2D Mesh-to-Image Registration Using Mesh-Based Digitally Reconstructed Radiography	86
<i>Shun Miao, Tri Huynh, Cyprien Adnet, Marcus Pfister, and Rui Liao</i>	
Toward Accurate and Robust 2-D/3-D Registration of Implant Models to Single-Plane Fluoroscopy	97
<i>Shun Miao, Rui Liao, Joseph Lucas, and Christophe Chef d'hotel</i>	
Ultrasound Image-Guided Mapping of Endoscopic Views on a 3D Placenta Model: A Tracker-Less Approach	107
<i>Liangjing Yang, Junchen Wang, Etsuko Kobayashi, Hongen Liao, Ichiro Sakuma, Hiromasa Yamashita, and Toshio Chiba</i>	
An Augmented Reality Approach for Initializing 2D/3D Registration ...	117
<i>Ren Hui Gong, Özgür Güler, John Lovejoy, and Ziv Yaniv</i>	
Surface Reconstruction from Tracked Endoscopic Video Using the Structure from Motion Approach	127
<i>Deyu Sun, Jiquan Liu, Cristian A. Linte, Huilong Duan, and Richard A. Robb</i>	
Towards CT Enhanced Ultrasound Guidance for Off-pump Beating Heart Mitral Valve Repair	136
<i>Feng P. Li, Martin Rajchl, James A. White, Aashish Goela, and Terry M. Peters</i>	
A Bayesian Approach for Construction of Sparse Statistical Shape Models Using Dirichlet Distribution	144
<i>Ali Gooya, Elaheh Mousavi, Christos Davatzikos, and Hongen Liao</i>	
Brain-Cloud: A Generalized and Flexible Registration Framework for Brain MR Images	153
<i>Minjeong Kim, Guorong Wu, Qian Wang, and Dinggang Shen</i>	
Realtime Wide-Baseline Registration of the Uterus in Laparoscopic Videos Using Multiple Texture Maps	162
<i>Toby Collins, Daniel Pizarro, Adrien Bartoli, Michel Canis, and Nicolas Bourdel</i>	
3D Robotic Catheter Shape Reconstruction and Localisation Using Appearance Priors and Adaptive C-Arm Positioning	172
<i>Alessandro Vandini, Stamatia Giannarou, Su-Lin Lee, and Guang-Zhong Yang</i>	

Uncertainty-Encoded Augmented Reality for Robot-Assisted Partial Nephrectomy: A Phantom Study	182
<i>Alborz Amir-Khalili, Masoud S. Nosrati, Jean-Marc Peyrat, Ghassan Hamarneh, and Rafeef Abugharbieh</i>	
Quantized Local Edge Distribution: A Descriptor for B-mode Ultrasound Images	192
<i>Wing-Yin Chan, Yim-Pan Chui, and Pheng-Ann Heng</i>	
Registration of Preoperative Liver Model for Laparoscopic Surgery from Intraoperative 3D Acquisition	201
<i>Jordan Bano, Stéphane A. Nicolau, Alexandre Hostettler, Christophe Doignon, Jacques Marescaux, and Luc Soler</i>	
Volume Visualization for Neurovascular Augmented Reality Surgery	211
<i>Marta Kersten-Oertel, Simon Drouin, Sean J.S. Chen, and D. Louis Collins</i>	
Reinforcement Learning Based Model Selection and Parameter Estimation for Pharmacokinetic Analysis in Drug Selection	221
<i>Fei Gao, Jingjia Xu, Huafeng Liu, and Pengcheng Shi</i>	
Delineating 3D Angiogenic Sprouting in OCT Images via Multiple Active Contours	231
<i>Ting Xu, Fengqiang Li, Duc-Huy T. Nguyen, Christopher S. Chen, Chao Zhou, and Xiaolei Huang</i>	
The Role of Augmented Reality in Training the Planning of Brain Tumor Resection	241
<i>Kamyar Abhari, John S.H. Baxter, Elvis S. Chen, Ali R. Khan, Chris Wedlake, Terry M. Peters, Roy Eagleson, and Sandrine de Ribaupierre</i>	
Matching Functional Connectivity Patterns for Spatial Correspondence Detection in fMRI Registration	249
<i>Zhenyu Tang, Di Jiang, Hongming Li, and Yong Fan</i>	
Calibration and Stereo Tracking of a Laparoscopic Ultrasound Transducer for Augmented Reality in Surgery	258
<i>Philip Edgcumbe, Christopher Ngan, and Robert Rohling</i>	
Evaluation of Multiple Voxel-Based Morphometry Approaches and Applications in the Analysis of White Matter Changes in Temporal Lobe Epilepsy	268
<i>Wenjing Li, Huiguang He, Jingjing Lu, Bin Lv, Meng Li, and Zhengyu Jin</i>	
Author Index	277
