

Table of Contents

Invited Paper

Executing Specifications Using Synthesis and Constraint Solving	1
<i>Viktor Kuncak, Etienne Kneuss, and Philippe Suter</i>	

Regular Papers

Informative Types and Effects for Hybrid Migration Control	21
<i>Ana Almeida Matos and Jan Cederquist</i>	
Monitoring of Temporal First-Order Properties with Aggregations	40
<i>David Basin, Felix Klaedtke, Srdjan Marinovic, and Eugen Zălinescu</i>	
From Propositional to First-Order Monitoring	59
<i>Andreas Bauer, Jan-Christoph Küster, and Gil Vegliach</i>	
Right-Universality of Visibly Pushdown Automata	76
<i>Véronique Bruyère, Marc Ducobu, and Olivier Gauwin</i>	
Distributed Finite-State Runtime Monitoring with Aggregated Events	94
<i>Kevin Falzon, Eric Bodden, and Rahul Purandare</i>	
Synthesising Correct Concurrent Runtime Monitors (Extended Abstract)	112
<i>Adrian Francalanza and Aldrin Seychell</i>	
Practical Interruptible Conversations: Distributed Dynamic Verification with Session Types and Python	130
<i>Raymond Hu, Rumyana Neykova, Nobuko Yoshida, Romain Demangeon, and Kohei Honda</i>	
Runtime Verification with Particle Filtering	149
<i>Kenan Kalajdzic, Ezio Bartocci, Scott A. Smolka, Scott D. Stoller, and Radu Grosu</i>	
An Optimized Memory Monitoring for Runtime Assertion Checking of C Programs	167
<i>Nikolai Kosmatov, Guillaume Petiot, and Julien Signoles</i>	
Impartiality and Anticipation for Monitoring of Visibly Context-Free Properties	183
<i>Normann Decker, Martin Leucker, and Daniel Thoma</i>	

Accelerating Data Race Detection Utilizing On-Chip Data-Parallel Cores	201
<i>Vineeth Mekkat, Anup Holey, and Antonia Zhai</i>	
Efficient Model to Query and Visualize the System States Extracted from Trace Data	219
<i>Alexandre Montplaisir, Naser Ezzati-Jivan, Florian Wininger, and Michel Dagenais</i>	
Repair Abstractions for More Efficient Data Structure Repair	235
<i>Razieh Nokhbeh Zaeem, Muhammad Zubair Malik, and Sarfraz Khurshid</i>	
To Run What No One Has Run Before: Executing an Intermediate Verification Language	251
<i>Nadia Polikarpova, Carlo A. Furia, and Scott West</i>	
Optimizing Nop-shadows Typestate Analysis by Filtering Interferential Configurations	269
<i>Chengsong Wang, Zhenbang Chen, and Xiaoguang Mao</i>	
A Causality Analysis Framework for Component-Based Real-Time Systems	285
<i>Shaohui Wang, Anaheed Ayoub, BaekGyu Kim, Gregor Gössler, Oleg Sokolsky, and Insup Lee</i>	
Reducing Monitoring Overhead by Integrating Event- and Time-Triggered Techniques	304
<i>Chun Wah Wallace Wu, Deepak Kumar, Borzoo Bonakdarpour, and Sebastian Fischmeister</i>	
Short Papers	
A Scala DSL for Rete-Based Runtime Verification	322
<i>Klaus Havelund</i>	
A Late Treatment of C Precondition in Dynamic Symbolic Execution Testing Tools	328
<i>Mickaël Delahaye and Nikolai Kosmatov</i>	
Towards a Generic Non-intrusive Fault Detection Framework	334
<i>Jukka Julku and Mika Rautila</i>	
A Witnessing Compiler: A Proof of Concept	340
<i>Kedar S. Namjoshi, Giacomo Tagliabue, and Lenore D. Zuck</i>	

Runtime Monitoring of Temporal Logic Properties in a Platform Game	346
<i>Simon Varvaressos, Dominic Vaillancourt, Sébastien Gaboury, Alexandre Blondin Massé, and Sylvain Hallé</i>	

Tool Papers

SMock—A Test Platform for Monitoring Tools	352
<i>Christian Colombo, Ruth Mizzi, and Gordon J. Pace</i>	
SPY: Local Verification of Global Protocols	358
<i>Rumyana Neykova, Nobuko Yoshida, and Raymond Hu</i>	

Tutorials

Instrumenting Android and Java Applications as Easy as abc	364
<i>Steven Arzt, Siegfried Rasthofer, and Eric Bodden</i>	
On Signal Temporal Logic	382
<i>Alexandre Donzé</i>	
Runtime Verification and Refutation for Biological Systems	384
<i>Hillel Kugler</i>	
A Lesson on Runtime Assertion Checking with Frama-C	386
<i>Nikolai Kosmatov and Julien Signoles</i>	
With Real-Time Performance Analysis and Monitoring to Timing Predictable Use of Multi-core Architectures	400
<i>Kai Lampka</i>	
Dynamic Analysis and Debugging of Binary Code for Security Applications	403
<i>Lixin Li and Chao Wang</i>	
Author Index	425
