

Contents

1 Electrode Potentials	1
György Inzelt	
2 Reference Redox Systems in Nonaqueous Systems and the Relation of Electrode Potentials in Nonaqueous and Mixed Solvents to Standard Potentials in Water	25
Gerhard Gritzner	
3 Liquid Junction Potentials	33
Galina Tsirlina	
4 Salt Bridges and Diaphragms	49
Fritz Scholz and Takashi Kakiuchi	
5 Reference Electrodes for Aqueous Solutions	77
Petra Spitzer, Samuel Wunderli, Krzysztof Maksymiuk, Agata Michalska, Anna Kisiel, Zbigniew Galus, and Günter Tauber	
6 Reference Electrodes for Use in Nonaqueous Solutions	145
Kosuke Izutsu	
7 Reference Electrodes for Ionic Liquids and Molten Salts	189
Anand I. Bhatt and Graeme A. Snook	
8 Reference Electrodes in Oxidic Glass Melts	229
Friedrich G.K. Baucke	
9 Reference Electrodes for Solid-Electrolyte Devices	243
Vladislav V. Kharton and Ekaterina V. Tsipis	
10 Direct Solid Contact in Reference Electrodes	279
Andrzej Lewenstam	
11 Micro-reference Electrodes	289
Heike Kahlert	

12	Conducting Polymer-Based Reference Electrodes	305
	Jan Migdalski and Andrzej Lewenstam	
13	Screen-Printed Disposable Reference Electrodes	325
	Agata Michalska, Anna Kisiel, and Krzysztof Maksymiuk	
14	Pseudo-reference Electrodes	331
	György Inzelt	
15	The Kelvin Probe Technique as Reference Electrode for Application on Thin and Ultrathin Electrolyte Films	333
	Michael Rohwerder	
	Index	341
