

Contents

1	Vector Algebra and Coordinate Systems.....	1
1.1	Vectors and Vector Field.....	2
1.2	Vector Algebra.....	4
1.2.1	Vector Addition and Subtraction.....	4
1.2.2	Vector Scaling.....	6
1.2.3	Scalar or Dot Product.....	7
1.2.4	Vector or Cross Product.....	11
1.2.5	Scalar and Vector Triple Products.....	14
1.3	Orthogonal Coordinate Systems.....	16
1.3.1	Cartesian Coordinate System.....	17
1.3.2	Cylindrical Coordinate System.....	27
1.3.3	Spherical Coordinate System.....	36
1.4	Coordinate Transformation.....	45
1.4.1	Cartesian-Cartesian Transformation.....	45
1.4.2	Cylindrical-Cartesian Transformation.....	48
1.4.3	Spherical-Cartesian Transformation.....	50
2	Vector Calculus.....	61
2.1	Line and Surface Integrals.....	62
2.1.1	Curves.....	62
2.1.2	Line Integral.....	65
2.1.3	Surface Integral.....	71
2.2	Directional Derivative and Gradient.....	74
2.3	Flux and Flux Density.....	82
2.4	Divergence and Divergence Theorem.....	84
2.4.1	Divergence of a Flux Density.....	85
2.4.2	Divergence Theorem.....	89
2.5	Curl and Stokes's Theorem.....	94
2.5.1	Curl of a Vector Field.....	94
2.5.2	Stokes's Theorem.....	101
2.6	Dual Operations of ∇	104
2.7	Helmholtz's Theorem.....	107
3	Electrostatics.....	117
3.1	Coulomb's Law.....	118
3.2	Electric Field Intensity.....	122
3.2.1	Electric Field due to Discrete Charges.....	123

3.2.2	Electric Field due to a Continuous Charge Distribution	126
3.3	Electric Flux Density and Gauss's Law	133
3.3.1	Electric Flux Density	133
3.3.2	Gauss's Law	136
3.4	Electric Potential	144
3.4.1	Work Done in Moving a Charge	144
3.4.2	Electric Potential due to a Charge Distribution	145
3.4.3	Conservative Field	150
3.4.4	$\mathbf{E}$ as the Negative Gradient of V	152
3.5	Dielectric in a Static Electric Field	156
3.5.1	Electric Polarization	157
3.5.2	Dielectric Constant	160
3.5.3	Boundary Conditions at a Dielectric Interface	164
3.6	Perfect Conductor in a Static Electric Field	168
3.7	Electrostatic Potential Energy	172
3.8	Electrostatic Boundary Value Problems	176
3.8.1	Poisson's and Laplace's Equations	176
3.8.2	Uniqueness Theorem	178
3.8.3	Examples of Boundary Values Problems	180
3.8.4	Method of Images	185
3.9	Capacitance and Capacitors	191
3.9.1	Parallel-Plate Capacitor	193
3.9.2	Examples of Capacitors	194
4	Steady Electric Current	211
4.1	Convection Current	212
4.2	Conduction Current and Ohm's Law	215
4.3	Resistance	218
4.4	Equation of Continuity	221
4.4.1	Relaxation Time Constant	223
4.5	Power Dissipation and Joules's Law	225
4.6	Steady Currents at an Interface	227
4.7	Analogy between $\mathbf{D}$ and $\mathbf{J}$	230
5	Magnetostatics	237
5.1	Lorentz Force Equation	238
5.2	The Biot-Savart Law	240
5.3	Ampere's Circuital Law	247
5.4	Magnetic Flux Density	253
5.5	Vector Magnetic Potential	257
5.5.1	Ampere's Circuital Law from the Biot-Savart Law	259
5.6	The Magnetic Dipole	265
5.7	Magnetic Materials	269
5.7.1	Magnetization and Equivalent Current Densities	270
5.7.2	Permeability	274
5.7.3	Hysteresis of a Ferromagnetic Material	281

5.7.4	Magnetic Boundary Conditions.....	284
5.8	Inductance and Inductors	288
5.9	Magnetic Energy	297
5.9.1	Magnetic Energy in an Inductor	298
5.9.2	Magnetic Energy in Terms of Magnetic Field.....	300
5.10	Magnetic Force and Torque	305
5.10.1	Magnetic Force on a Current-Carrying Conductor.....	305
5.10.2	Magnetic Force Involved in a Virtual Work	307
5.10.3	Magnetic Torque	309
6	Time-Varying Fields and Maxwell's Equations.....	325
6.1	Faraday's Law	326
6.1.1	Transformer emf.....	328
6.1.2	Motional emf.....	332
6.1.3	A Loop Moving in a Time-Varying Magnetic Field	336
6.2	Displacement Current Density	339
6.3	Maxwell's Equations.....	342
6.3.1	Maxwell's Equations in Integral Form.....	344
6.3.2	Electromagnetic Boundary Conditions.....	345
6.4	Retarded Potentials.....	348
7	Wave Motion.....	357
7.1	One-Dimensional Waves.....	357
7.1.1	Harmonic Waves	361
7.1.2	Complex Form of a Harmonic Wave	364
7.2	Plane Waves in Three-Dimensional Space.....	370
7.3	Electromagnetic Plane Waves	375
7.3.1	Transverse Electromagnetic Waves	378
8	Time-Harmonic Electromagnetic Waves.....	385
8.1	Phasors	385
8.1.1	Maxwell's Equations in Phasor Form	388
8.2	Waves in Homogenous Media	390
8.2.1	Uniform Plane Wave in a Lossless Dielectric	390
8.2.2	Poynting Vector and Power Flow.....	395
8.2.3	Polarization of a Uniform Plane Wave.....	399
8.2.3.1	Linearly Polarized Wave.....	399
8.2.3.2	Circularly Polarized Wave	401
8.2.3.3	Elliptically Polarized Wave.....	403
8.2.4	Uniform Plane Wave in a Lossy Medium	406
8.2.4.1	Lossy Dielectric with a Damping Force.....	407
8.2.4.2	Lossy Dielectric of a Low Conductivity	410
8.2.4.3	Good Conductors	414
8.3	Plane Waves at an Interface	420
8.3.1	Normal Incidence of a Plane Wave	420
8.3.1.1	Standing Wave Ratio.....	423

8.3.1.2	Interface Involving a Perfect Conductor	428
8.3.2	Oblique Incidence of a Plane Wave	432
8.3.2.1	Perpendicular Polarization	436
8.3.2.2	Parallel Polarization	439
8.3.2.3	Brewster Angle	444
8.3.3	Total Internal Reflection.....	447
8.3.4	Reflectance and Transmittance.....	449
8.4	Waves in Dispersive Media.....	452
9	Transmission Lines.....	463
9.1	Transmission Line Equations	465
9.1.1	Phasor Form of Transmission Line Equations.....	467
9.1.2	Relationship between Parameters	468
9.2	Transmission Line Parameters	469
9.2.1	Coaxial Transmission Lines	470
9.2.2	Two-Wire Transmission Lines	471
9.2.3	Parallel-Plate Transmission Lines	472
9.3	Infinite Transmission Lines.....	473
9.3.1	Lossless Transmission Lines	475
9.3.2	Distortionless Transmission Lines	476
9.3.3	Power Transmission and Power Loss	478
9.4	Finite Transmission Lines	480
9.4.1	Input Impedance	481
9.4.2	Reflection Coefficient and Standing Wave Ratio.....	484
9.4.3	Short-Circuited and Open-Circuited Lines.....	490
9.4.3.1	Short-Circuited Line ($Z_L = 0$).....	491
9.4.3.2	Open-Circuited Line ($Z_L = \infty$).....	491
9.5	The Smith Chart	493
9.5.1	Relationship between Γ and Z_L	494
9.5.2	Relationship between Γ and Z_{in}	496
9.5.3	Relationship between Γ and Standing Wave Ratio.....	499
9.5.4	Admittances on the Smith Chart.....	501
9.5.5	Impedance Matching with a Single-Stub.....	505
10	Waveguides.....	513
10.1	Parallel-Plate Waveguides.....	514
10.1.1	Transverse Electromagnetic(TEM) Waves	514
10.1.2	Transverse Electric(TE) Waves.....	515
10.1.3	Transverse Magnetic(TM) Waves	520
10.2	Rectangular Waveguides.....	524
10.2.1	Transverse Magnetic(TM) Modes.....	527
10.2.1.1	Longitudinal Field Component of a TM Mode.....	528
10.2.1.2	Transverse Field Components of a TM Mode.....	532
10.2.1.3	Orthonormal Set in TM Modes	535

10.2.2 Transverse Electric(TE) Modes.....539

10.2.2.1 Orthonormal Set in TE Modes543

10.2.3 Power Attenuation.....548
