Preoperative Imaging Studies in Neurosurgery

K. L. Gupta, E. R. Duvall, J. J. Vitek, and J. H. Garcia

INTRODUCTION	1
SKULL	2
Size and Configuration of the Skull	2
Thickness and Texture of Bones	2
Cranial Sutures	4
Vascular Grooves and Channels	4
Sella Turcica	4
Calcification	5
COMPUTED TOMOGRAPHY	5
Cranial CT Scan Technique	9
Congenital and Developmental Disorders	12
Hydrocephalus	12
Inflammatory Diseases	13
Abscesses	13
Metastatic Tumors	14
Primary Brain Tumors	14
Cerebellopontine Angle Lesions	14
Brain Stem Gliomas and Fourth Ventricle Ependymomas	17
Third Ventricle Lesions	19
Choroid Plexus Papillomas	19
Meningioma	19
Subarachnoid Hemorrhage	20
Arteriovenous Malformations	20

CT Findings in Brain Infarction	20
Intracerebral Hemorrhage	27
Spine	29
MYELOGRAPHY	30
Techniques of Myelography	30
Myelographic Complications	30
Hydrosyringomyelia	31
Ependymoma of the Cauda Equina	33
Meningiomas	34
Schwannomas	34
Arteriovenous Malformations	35
Herniation of Spinal Discs	35
Metastatic Disease	35
CEREBRAL ANGIOGRAPHY	35
Patient Preparation and Technique of Cerebral Angiography	36
Complications of Cerebral Angiography	38
Indications for Cerebral Angiography	39
Angiography of Various Tumors	39
Meningiomas	40
Astrocytomas	40
Glioblastomas	40
Hemangioblastomas	42
Subarachnoid Hemorrhage and Aneurysms	42
Angiomatous Malformations	44
NUCLEAR MAGNETIC RESONANCE	44
REFERENCES	47

The Neurosurgical Biopsy 49

J. M. Bonnin

INTRODUCTION	49
INDICATIONS FOR NEUROSURGICAL BIOPSIES	50
PLANNING	50
RAPID DIAGNOSIS VERSUS ROUTINE TISSUE PROCESSING	51
SMEAR TECHNIQUE VERSUS FROZEN SECTION	51
FROZEN SECTIONS OF PREVIOUSLY UNFIXED TISSUES	51
THE SMEAR TECHNIQUE	52
PROCESSING A NEUROSURGICAL BIOPSY	56
FIXATIVES IN NEUROSURGICAL PATHOLOGY	56
STAINING	57
The Nissl Method	57
Stains for Neurofibrils and Axons	57
Staining for Glial Fibrils	58
Myelin Staining	59
Staining for Neutral Lipids	60
Demonstration of Connective Tissue Fibers	60
Other Stains	60
IMMUNOHISTOCHEMISTRY	61
Glial Fibrillary Acidic (GFA) Protein	61
S-100 Protein	63
Neurofilaments (NF) Proteins	63
Neuron-Specific Enolase (NSE)	63
Vimentin, Desmin, and Cytokeratins	63
Alpha-fetoprotein and Human Chorionic Gonadotropin	65

Other Markers for CNS Tumors	65
Special Viral Antisera	65
TISSUE CULTURE	65
SPECIAL STUDIES REQUIRED IN SOME TYPES OF NEUROSURGICAL BIOPSIES	66
Dementias	66
Lymphoreticular Processes in the CNS	67
Blood Clots from Intracerebral Hematomas	67
CNS Abscesses and Other Infectious Processes	67
Pituitary Adenomas	68
REFERENCES	69

Tumors of the Central Nervous System (I) 73

U. Sandbank, J. H. Garcia, J. Escalona-Zapata, and J. M. Bonnin

INTRODUCTION	73
TUMOR CLASSIFICATION	74
EPIDEMIOLOGY OF BRAIN TUMORS	76
TUMORS OF THE ORBIT AND NASAL CAVITY	77
Intraocular Tumors	77
Retrobulbar Tumors That Cause Unilateral Exophthalmus	82
Nasal Tumors of Neural Derivation	88
BENIGN TUMORS OF THE SKULL	89
Hemangioma	89
Giant-cell Tumor (Osteoclastoma)	89
Meningioma	89
MALIGNANT TUMORS OF THE SKULL	90
Chordoma	90
Metastatic Tumors to the Skull	90
Lymphoma	91
Osteosarcoma	91
Multiple Myeloma	92
Fibrosarcoma and Ewing's Tumor	92
CONDITIONS SIMULATING CALVARIAL NEOPLASMS	92
Fibrous Dysplasia	92
Aneurysmal Bone Cyst	92
Epidermoid Cysts	93
Histiocytosis X	93
Paget's Disease of Bone	95
MENINGEAL AND EXTRAPARENCHYMAL TUMORS	96
Meningiomas	96
Meningeal Infiltration by Lymphoma, Leukemia, Plasmacytoma	110
Meningeal Xanthomatosis/Hand-Schueller-Christian Disease	114
Carcinoma	114
Cysts	115
Lipoma	115
Angiomas and Angiomatous Malformations	116
Gliomatous Infiltration of Meninges	116
Primary Leptomeningeal Melanosis	117
TUMORS OF THE PINEAL REGION	117
Germ Cell Tumors	118
Pinealomas	121
Glial Neoplasms and Other Tumors	121
Cysts	121
REFERENCES	122
