

Contents

Part I Introductory Chapters

| | |
|--|-----------|
| 1. Basic Notions of Critical Ultrasound..... | 3 |
| Preliminary Note on Knobology..... | 3 |
| Step 1: Learning to Interpret Spatial Dimensions..... | 3 |
| Step 2: Understanding the Composition of the Image..... | 6 |
| Step 3: Ultrasound Anatomy – Descriptive Step..... | 9 |
| Step 4: Interpretation of the Image | 10 |
| 2. The Ultrasound Equipment | 11 |
| A Short Version for the Hurried Reader | 11 |
| A Longer Version: The Seven Requirements We Ask of an Ultrasound Machine Devoted to Critical Use..... | 12 |
| How to Practically Afford a Machine in One's ICU..... | 17 |
| Which Solutions for Teams Already Equipped with Small-Sized Technologies?..... | 17 |
| References..... | 18 |
| 3. Specific Notions of Critical Ultrasound in the Critically Ill..... | 19 |
| Limitations Due to the Patient | 19 |
| Limitations Due to Equipment..... | 19 |
| Strength of Ultrasound in the Critically Ill Patient | 19 |
| Driving an Ultrasound Examination | 21 |
| Disinfection of the Kit | 21 |
| Indications for an Ultrasound Examination | 23 |
| References..... | 24 |

Part II Organ by Organ Analysis

| | |
|---|-----------|
| 4. Introduction to Abdominal Ultrasound: Normal Patterns | 27 |
| Diaphragm..... | 27 |
| Peritoneum | 27 |
| Lumbar Rachis..... | 28 |
| Large Vessels..... | 28 |
| Liver | 29 |
| Gallbladder..... | 29 |
| Kidneys | 30 |

| | |
|--|-----------|
| Bladder..... | 30 |
| Pancreas and Celiac Area..... | 31 |
| Spleen..... | 31 |
| Normal Ultrasound Anatomy in a Patient in Intensive Care..... | 31 |
| Reference | 31 |
| 5. Peritoneum..... | 33 |
| Positive Diagnosis of Peritoneal Effusion..... | 33 |
| Diagnosis of the Nature of the Effusion..... | 35 |
| Hemoperitoneum..... | 37 |
| Peritonitis | 37 |
| Pneumoperitoneum | 38 |
| Interventional Ultrasound | 40 |
| References..... | 40 |
| 6. Gastrointestinal Tract..... | 43 |
| Normal Ultrasound Patterns..... | 43 |
| Small and Large Bowel: Introduction | 48 |
| Small Bowel: Acute Ischemic Disorders | 49 |
| Large Bowel: Acute Ischemic Disorders | 50 |
| References..... | 52 |
| 7. Liver | 53 |
| Portal Gas..... | 53 |
| Hepatic Abscess | 54 |
| Isolated Hepatomegaly..... | 54 |
| Diffuse Infectious Disorders | 55 |
| Cholestasis | 55 |
| Hepatic Veins | 56 |
| Hepatic Tumors..... | 57 |
| Trauma | 57 |
| Interventional Ultrasound | 57 |
| References..... | 57 |
| 8. Gallbladder..... | 59 |
| Classical Signs of Acute Acalculous Cholecystitis | 59 |
| Our Observations of Acute Acalculous Cholecystitis..... | 60 |
| Chronic Subacute Cholecystitis | 60 |
| Common Gallbladder Patterns Seen in the Intensive Care Unit..... | 61 |
| A Distinctive Feature: Major Wall Thickening of the Cardiac Gallbladder | 63 |
| How to Improve the Diagnosis of Acute Acalculous Cholecystitis..... | 64 |
| CT | 65 |
| Dynamic Cerulein Test and Scintigraphy | 65 |
| Other Pathological Patterns of the Gallbladder..... | 67 |
| Interventional Ultrasound | 67 |
| References..... | 67 |

| | |
|---|-----------|
| 9. Urinary Tract..... | 69 |
| Renal Parenchyma..... | 69 |
| Dilatation of the Renal Pelvis | 71 |
| Renal Vessels | 72 |
| Bladder..... | 72 |
| Uterus, Adnexa, Fertility Organs | 73 |
| Interventional Ultrasound | 75 |
| References..... | 75 |
| 10. Various Targets in the Abdomen | |
| (Spleen, Adrenals, Pancreas, Lymph Nodes)..... | 77 |
| Spleen..... | 77 |
| Adrenals | 79 |
| Pancreas | 79 |
| Enlarged Lymph Nodes..... | 81 |
| References..... | 81 |
| 11. Aorta..... | 83 |
| Thoracic Aorta | 83 |
| Thoracic Aortic Dissection | 84 |
| Thoracic Aortic Aneurism | 85 |
| Abdominal Aortic Aneurism..... | 85 |
| Abdominal Aortic Dissection | 87 |
| Retroperitoneal Hematoma and Other Disorders..... | 88 |
| 12. Principles of Examination of the Deep Veins | |
| in the Critically Ill..... | 89 |
| Before Beginning: How We Hold and Move | |
| the Probe for Venous Analysis..... | 89 |
| First Step: Recognizing the Vascular Couple..... | 90 |
| How We Distinguish the Vein from the Artery | 91 |
| Before Puncturing: How We Recognize the Patency of the Vein | 91 |
| Ultrasound-Enlightened Catheterization..... | 93 |
| Before the Next, Invasive Step: How to Train Safely | 93 |
| Subclavian Vein, Normal Pattern | 93 |
| Ultrasound-Guided Catheterization of the Subclavian Vein | 94 |
| When the Procedure Is Over | 96 |
| Why the Subclavian Vein Rather Than the Internal Jugular | 96 |
| Philosophic Considerations and Others | 97 |
| How What About the Other Sites?..... | 97 |
| Emergency Life-Saving Insertion of a Short | |
| Central Endovenous Catheter..... | 97 |
| References..... | 98 |
| 13. Principles of Examination of the Deep Veins in the | |
| Critically Ill..... | 99 |
| The 10 Peculiarities of Venous Ultrasound in the BLUE Protocol..... | 99 |
| The Principle of the Venous Exploration in the BLUE Protocol..... | 100 |

| | |
|--|------------|
| The Diagnosis of Venous Thrombosis. Step 1: Simple Observation | 100 |
| The Diagnosis of Venous Thrombosis. Step 2: | |
| The Dynamic Controlled Compression Maneuver..... | 103 |
| Results..... | 103 |
| The Diagnosis of Venous Thrombosis: Additional Patterns | 104 |
| What to Begin With: The Bulldozer Technique or the Butterfly Technique?..... | 106 |
| Internal Jugular Vein Thrombosis..... | 106 |
| Subclavian Venous Thrombosis..... | 106 |
| Superior Caval Vein | 107 |
| Left Brachiocephalic Vein..... | 107 |
| The Inferior Caval Vein..... | 107 |
| The Iliac Segment | 108 |
| The Femoral Vein: Upper Three-Quarters | 109 |
| The Femoral Vein: Lower Quarter | 110 |
| The Popliteal Approach in the Critically Ill..... | 110 |
| The Calf Case..... | 110 |
| Results..... | 111 |
| The Place of Simplified Venous Protocols..... | 112 |
| The Management of a Noncritically Ill Patient Suspected of Mild Pulmonary Embolism with Negative Venous Ultrasound Scanning..... | 112 |
| Limitations of Ultrasound of Deep Venous Thrombosis in the Critically Ill | 112 |
| Venography, Angio-CT, Doppler, ARM: | |
| Which Gold Standard?..... | 113 |
| Therapeutic Ultrasound in Deep Venous Thrombosis | 113 |
| Considerations About the Outcome of Catheter-Linked Venous Thromboses..... | 113 |
| Catheter-Linked Venous Thromboses | 113 |
| Addendum | 114 |
| References..... | 114 |
| 14. Introduction to Lung Ultrasound | 117 |
| Basic Terminology | 117 |
| Basic Technique: The Seven Principles of Lung Ultrasound..... | 117 |
| Development of the First Principle: Simplicity of the Unit..... | 117 |
| Development of the Second Principle: Understanding the Air-to-Fluid Ratio and Respecting the Sky-Earth Axis..... | 118 |
| Development of the Third Principle: Locating the Lung and Defining Areas of Investigation | 118 |
| Development of the Fourth Principle: Defining the Pleural Line | 122 |
| Development of the Fifth Principle: Dealing with the Artifact Which Defines the Normal Lung: The A-Line | 123 |
| Development of the Sixth Principle: Defining the Dynamic Characteristic of the Normal Lung: Lung Sliding | 125 |
| Development of the Seventh Principle: Acute Disorders Have Superficial Location..... | 126 |
| Reference | 127 |

| | |
|--|-----|
| 15. Pleural Effusion | 129 |
| Positive Diagnosis of Pleural Effusion | 129 |
| Assessing Pleural Effusion Quantity..... | 132 |
| Diagnosis of the Nature of Pleural Effusion | 133 |
| Apparent Pitfalls | 135 |
| Interventional Ultrasound: Thoracentesis in the Critically Ill..... | 136 |
| References..... | 137 |
| 16. Lung: Alveolar Syndrome | 139 |
| Some Introduction..... | 139 |
| Alveolar Consolidation, Definition | 139 |
| Ultrasound Technique | 140 |
| Ultrasound Diagnosis of an Alveolar Consolidation | 140 |
| Other Signs..... | 141 |
| Some Characterizations of an Alveolar Consolidation | 143 |
| Alveolar Consolidation and the Main Causes of Acute Respiratory Failure..... | 144 |
| Resorptive Atelectasis..... | 145 |
| The Diaphragm: Phrenic Disorders | 146 |
| Interventional Ultrasound | 147 |
| Results..... | 148 |
| Interest..... | 148 |
| References..... | 149 |
| 17. Lung and Interstitial Syndrome | 151 |
| A Preliminary Definition: What Should Be Understood by “Interstitial Syndrome”? | 152 |
| The Ultrasound Signs of Interstitial Syndrome | 152 |
| The Clinical Relevance of the Lung Rockets in the Critically Ill | 158 |
| One Word for the Attention of the Manufacturers..... | 160 |
| To Conclude, a Small Update About Lung Rockets | 160 |
| References..... | 161 |
| 18. Pneumothorax | 163 |
| Advanced Features of Lung Sliding..... | 163 |
| List of Situations Abolishing Lung Sliding | 168 |
| Ultrasound Diagnosis of Pneumothorax: Technique of Detection | 169 |
| First Sign: Abolition of Lung Sliding | 169 |
| Second Sign: The A-line Sign..... | 171 |
| Third Sign: The Lung Point, a Specific Sign | 172 |
| Additional Signs of Pneumothorax | 173 |
| Evaluation and Evolution of the Size of Pneumothorax | 174 |
| A Place for Stage 4 Examinations?..... | 175 |
| Practical Detection of Pneumothorax and Ultrasound-Enhanced Management | 175 |
| Pitfalls and Limitations | 176 |

| | |
|---|-----|
| The Future of Ultrasound..... | 177 |
| References..... | 178 |
| 19. Basic Applications of Lung Ultrasound | |
| in the Critically Ill: 1 – A Bedside Alternative to CT | |
| and Other Irradiating Techniques..... | 181 |
| Lung Ultrasound Versus the Traditional Imaging | |
| Standards in the Intensive Care Unit..... | 181 |
| Lung Ultrasound: A Simple Discipline..... | 185 |
| Suggestion for Classifying Air Artifacts..... | 185 |
| References..... | 188 |
| 20. Basic Applications of Lung Ultrasound in the Critically Ill: | |
| 2 –The Ultrasound Approach of an Acute Respiratory Failure: | |
| The BLUE Protocol..... | 189 |
| The Design of the BLUE Protocol..... | 189 |
| Introduction to the BLUE Profiles..... | 190 |
| The Results..... | 190 |
| Physiopathologic Basis of the BLUE Protocol..... | 190 |
| Physiopathological Approach by the Signs..... | 192 |
| The Decision Tree of the BLUE-Protocol..... | 193 |
| Practical Use of the BLUE Protocol..... | 193 |
| The BLUE Protocol and Rare Causes of Acute Respiratory Failure..... | 193 |
| What Can Change by Using the BLUE Protocol..... | 195 |
| Frequently Asked Questions About the BLUE protocol..... | 195 |
| The Future of the BLUE Protocol..... | 200 |
| The Short Story of the BLUE Protocol..... | 201 |
| References..... | 201 |
| 21. Applications of Lung Ultrasound in the Critically Ill: | |
| 3 – Lung Ultrasound in the Neonate..... | 203 |
| Lung Ultrasound in the Newborn: A Major Opportunity..... | 203 |
| The Design of Our Study..... | 203 |
| Basic Technique..... | 204 |
| Basic Normal Patterns: Signs 1–3..... | 204 |
| Pleural Effusion: Signs 4 and 5..... | 204 |
| Alveolar Consolidation: Signs 6 and 7..... | 204 |
| Interstitial Syndrome: Sign 8..... | 204 |
| Pneumothorax: Signs 9 and 10..... | 204 |
| Results: Ultrasound Compared with Bedside Radiography..... | 205 |
| Demonstration of the Potential of Ultrasound to Replace | |
| Bedside Radiography as a Gold Standard..... | 205 |
| Limitations of Lung Ultrasound in the Newborn..... | 207 |
| Safety of Lung Ultrasound in the Newborn..... | 207 |
| Non-pulmonary Critical Ultrasound in the PICU..... | 208 |
| Head..... | 208 |
| Neck..... | 208 |
| Veins..... | 208 |

| | |
|--|------------|
| Heart..... | 208 |
| Circulation and Volemia..... | 208 |
| Abdomen..... | 208 |
| Diaphragm..... | 208 |
| Lung Ultrasound in the Neonate, Conclusions | 208 |
| References..... | 209 |
| 22. Simple Emergency Cardiac Sonography | 211 |
| Heart Routes..... | 212 |
| Notions of Ultrasound Anatomy of the Heart..... | 212 |
| Cardiac Arrest | 214 |
| Left Ventricular Failure | 215 |
| Right Heart Failure | 215 |
| Pulmonary Embolism..... | 216 |
| Pericardial Tamponade..... | 217 |
| Hypovolemic Shock | 218 |
| Gas Embolism..... | 219 |
| Gas Tamponade..... | 219 |
| Endocarditis | 219 |
| Intracavitary Thrombosis or Tumor | 219 |
| Intracavitary Device | 220 |
| Myocardial Infarction | 220 |
| Miscellaneous | 220 |
| References..... | 221 |
| 23. Simple Critical Ultrasound Considering Hemodynamic | |
| Therapy: Our Limited Investigation..... | 223 |
| Evolution of Concepts Considering Hemodynamic | |
| Therapy in the Critically III | 223 |
| How Can the Problem of Hemodynamic Therapy in the Critically III | |
| Be Simplified?..... | 225 |
| First Step: The Inotropic Option. The Place | |
| of the Simple Emergency Cardiac Sonography | 226 |
| Second Step: The Fluid Option. The Place of the | |
| Fluid Administration Limited by Lung | |
| Sonography – The FALLS Protocol..... | 227 |
| Second Step of Our Limited Investigation if the FALLS Protocol | |
| Cannot Be Applied: Caval Vein Analysis – (1) The Inferior | |
| Caval Vein (IVC)..... | 232 |
| Caval Vein Analysis – (2) The Place of the | |
| Superior Caval Vein (SVC)..... | 234 |
| The Place of Other Parameters..... | 234 |
| The Last Step of Our Limited Investigation: | |
| Time for the Vasopressor Option | 234 |
| A Synthesis of the Limited Investigation Considering | |
| Hemodynamic Therapy..... | 235 |
| Case of a Patient in Extremely Severe Shock – The SESAME | |
| Protocol | 237 |

| | |
|---|------------|
| The Value of Our Limited Investigation Considering Hemodynamic Therapy..... | 237 |
| Some History?..... | 238 |
| Appendix 1..... | 238 |
| Appendix 2..... | 238 |
| Appendix 3..... | 239 |
| References..... | 239 |
