Contents

1 Introduction 1
References 8

2 Solutions of the Dirac Equation in an External Electromagnetic Field 13
2.1 Magnetic Field 13
2.2 The Ground Landau Level 19
2.3 Crossed Field 20
2.4 Density Matrix of the Plasma Electron in a Magnetic Field with the Fixed Number of a Landau Level 22
References 24

3 Propagators of Charged Particles in External Active Media 25
3.1 Propagators of Charged Particles in a Magnetic Field 25
3.1.1 Propagators in the Fock Proper-Time Presentation 26
3.1.2 A Note on the Noninvariant Phase 29
3.1.3 Propagators in the Weak-Field Expansion 30
3.1.4 Propagators in an Expansion over Landau Levels 31
3.1.5 Electron Propagator in a Strong Magnetic Field 37
3.2 Propagators of Charged Particles in a Crossed Field 38
3.3 Direct Derivation of the Electron Propagator in a Magnetic Field as the Sum over Landau Levels on a Basis of the Dirac Equation Exact Solutions 39
References 43

4 Particle Dispersion in External Active Media 45
4.1 Dispersion in Media: Main Definitions. 45
4.2 Photon Polarization Operator in an External Magnetic Field. . . . 48
4.3 Generalized Two-Point Loop Amplitude $j \to f\bar{f} \to j'$ in an External Electromagnetic Field 52
4.3.1 Magnetic Field 53
4.3.2 Crossed Field 58
4.4 Photon Polarization Operator in Plasma 60

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.5 Neutrino Self-energy Operator in Plasma 66
4.5.1 Defnition of the Operator $\Sigma(p)$ in Plasma 68
4.5.2 Neutrino Additional Energy in Hot Dense Plasma. 68
4.5.3 On the Neutrino Radiative Decay in Plasma. 73
4.5.4 Ultra-High Energy Neutrino Dispersion in Plazma 78
4.6 Neutrino Self-energy Operator in an External Magnetic Field . . . 89
4.6.1 Defnition of the Operator $\Sigma(p)$ in a Magnetic Field 89
4.6.2 Low Landau Level Contribution into the Operator $\Sigma(p)$ 93
4.6.3 Calculation of the Operator $\Sigma(p)$ in a "Weak" Field. . . . 96
4.6.4 The Case of a Moderately Strong Field 100
4.6.5 The Neutrino Operator $\Sigma(p)$ in a Crossed Field 106
4.6.6 Field-Induced Neutrino Magnetic Moment 109
4.7 Neutrino Self-energy Operator in Magnetized Plasma 109
4.7.1 Neutrino Scattering on Magnetized Plasma 110
4.7.2 Neutrino Additional Energy in Magnetized Plasma 114
4.7.3 Asymptotic Expressions for the Neutrino Additional Energy in Magnetized Plasma 117
4.7.4 Induced Neutrino Magnetic Moment in Magnetized Plasma 119
References 125

5 Electromagnetic Interactions in External Active Media 127
5.1 Photon Decay into an Electron–Positron Pair in a Strong Magnetic Field 127
5.1.1 Direct Calculation Based on the Solutions of the Dirac Equation 128
5.1.2 Calculation Based on the Imaginary Part of the Loop Amplitude 132
5.2 The $\gamma \to e^- e^+$ Decay in a Crossed Field 133
5.2.1 Direct Calculation Based on the Solutions of the Dirac Equation 133
5.2.2 Calculation Based on the Imaginary Part of the Loop Amplitude 139
5.3 Photon Emission by Electron in a Strong Magnetic Field. 140
5.4 Electromagnetic Interactions of the Dirac Neutrino with a Magnetic Moment. 143
5.4.1 Magnetic Moment of the Dirac Neutrino and its Astrophysical Manifestations 143
5.4.2 Neutrino Interaction with Background 146
5.4.3 The Rate of Creation of the Right-Handed Neutrino 147
5.4.4 Contributions of Plasma Components into the Neutrino Scattering Process 152
5.4.5 Illustration: Completely Degenerate Plasma at T = 0. . . . 154

5.4.6 Uniform Ball Model for the Supernova Core 157
5.4.7 Models of the Supernova Core with Radial Distributions of Physical Parameters: Limits on the Neutrino Magnetic Moment 159
5.4.8 Possible Effect of the Neutrino Magnetic Moment: Shock-Wave Revival in a Supernova Explosion 163
5.4.9 Possible Effect of the Neutrino Magnetic Moment: Neutrino Pulsar 168

6 Neutrino-Electron Interactions in External Active Media 175
6.1 The $\nu \to e^- W^+$ Process in a Strong Magnetic Field 175
6.2 The $\nu \to \nu e^- e^+$ Process in a Strong Magnetic Field 180
6.2.1 Calculation of the Differential Probability Based on the Solutions of the Dirac Equation 180
6.2.2 Calculation Based on the Imaginary Part of the Loop Amplitude 182
6.2.3 The Total Process Probability 183
6.3 The $\nu \to \nu e^- e^+$ Process in a Crossed Field 186
6.3.1 A Historical Overview 186
6.3.2 Calculation of the Differential Probability Based on the Imaginary Part of the Loop Amplitude 187
6.3.3 The Total Process Probability 189
6.4 Possible Astrophysical Manifestations of the $\nu \to \nu e^- e^+$ Process in an External Magnetic Field 192
6.4.1 Mean Losses of the Neutrino Energy and Momentum . . . 192
6.4.2 Applicability of the Results Obtained in a Pure Magnetic Field for the Plasma Environment 194
6.4.3 Possible Astrophysical Manifestations 196
6.5 Neutrino in Strongly Magnetized Electron–Positron Plasma 197
6.5.1 What Do We Mean Under Strongly Magnetized $e^- e^+$ Plasma 198
6.5.2 Neutrino-Electron Processes in Strongly Magnetized Plasma: A Kinematic Analysis 199
6.5.3 The Probability of the Process $\nu \to \nu e^- e^+$ 201
6.5.4 The Total Probability of the Neutrino Interaction with Magnetized Electron–Positron Plasma 205
6.5.5 Mean Losses of the Neutrino Energy and Momentum . . . 209
6.5.6 Integral Action of Neutrinos on a Magnetized Plasma . . . 212
6.5.7 Neutrino-Electron Processes Involving the Contributions of the Excited Landau Levels 215
6.5.8 Pulsar Natal Kick Via Neutrino-Triggered Magnetorotational Asymmetry 220
References 227

7 Neutrino-Photon Interactions in External Active Media 229
7.1 $\nu\nu\gamma$ Interaction in External Active Media 229
7.1.1 The Effective Lagrangian of the $\nu\nu\gamma$ Interaction 229
7.1.2 Photon Production by the Massless Neutrino $\nu \to \nu\gamma$ 232
7.1.3 Photon Decay into the Neutrino Pair $\gamma \to \nu\bar{\nu}$ 235
7.1.4 Radiative Neutrino Transition $\nu \to \nu\gamma$ in Strongly Magnetized Plasma 239
7.2 Compton-Like Interaction of Neutrinos with Photons 244
7.2.1 The Amplitude of the Process $\gamma\gamma \to \nu\bar{\nu}$ in Vacuum 244
7.2.2 Neutrino Scattering in the Coulomb Field of a Nucleus 251
7.2.3 The External Field Influence on the Process $\gamma\gamma \to \nu\bar{\nu}$ . . . 253
7.2.4 A Conversion $\gamma\gamma \to \nu\bar{\nu}$ in the Left–Right Symmetric Extension of the Standard Model 255
7.2.5 Possible Manifestations of the $\gamma\gamma \to \nu\bar{\nu}$ Process in Astrophysics 257
7.3 Neutrino Photoproduction on a Nuclei in a Strong Magnetic Field 258
