Contents

1 Introduction and Motivation 1
1.1 Definition of Key Terms 3
1.1.1 Basic Terms 3
1.1.2 Discovery Service 8
1.1.3 Unique Identifier Network 10
1.2 Use Case: Securing the European Pharmaceutical Supply Chain 10
1.3 Contributions 15
1.4 Design Science Research Approach 15
1.4.1 Environment 16
1.4.2 Knowledge Base 17
1.5 Assumptions for This Thesis 17
1.6 Outline 18

2 Underlying Technologies and Related Work 21
2.1 Underlying Technologies 21
2.1.1 Automatic Identification and Data Capture Technologies 21
2.1.2 Unique Identifier Network Technology and Standards . . . 24
2.2 Approaches to Retrieve Track and Trace Information Without Discovery Services 31
2.2.1 A Central Data Store for Each Item 31
2.2.2 Daisy Chain Approach 32
2.2.3 E-Pedigree 33
2.2.4 Entry-Exit Testing 35
2.2.5 A Federated Read Event Repository Database System . . . 35
2.2.6 Summary 38
2.3 Related Work on Discovery Services 39
2.3.1 Literature Review 39
2.3.2 Requirements Elicitation 43

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

2.3.3 Existing Discovery Service Approaches 49
2.3.4 Qualitative Evaluation 55

3 An In-Memory Hierarchical-Packaging-Aware Discovery Service: Overview and Communication Protocol 63
3.1 Overview of the Hierarchical-Packaging-Aware Discovery Service 63
3.2 A Novel Discovery Service Communication Protocol 63
3.2.1 Processing Lifecycle Queries 64
3.2.2 Processing Last-Seen Queries 66

4 A Recursive Search Algorithm to Find all Potentially Relevant Read Events 71
4.1 Data Structure for the Discovery Service 71
4.2 Description of the Search Algorithm 74
4.3 Mode of Operation Exemplified with a Simple Supply Chain . . . 75
4.4 Handling Returnable Transport Items 78
4.5 Handling Situations with an Incomplete Read Event Sequence 81
4.5.1 Missing Packing Read Events 82
4.5.2 Missing Unpacking Read Events 86
4.5.3 A Missing Pair of Corresponding Read Events 89
4.5.4 Various Missing Corresponding Read Events 91
4.6 Critical Discussion of the Search Algorithm 92
4.6.1 No Notification Messages at All 93
4.6.2 No Packaging Read Events 94
4.6.3 No Hierarchical-Packaging Relationship 94
4.6.4 Hierarchical-Packaging Relationships 95
4.7 Limitations 95

5 A Filter Algorithm to Extract the Relevant Read Events 97
5.1 Data Structure for the Algorithm 97
5.2 Description of the Filter Algorithm 98
5.3 Mode of Operation Exemplified with a Simple Supply Chain . . . 100
5.4 Handling Interim Re-use of a Box 104
5.5 Handling Situations with an Incomplete Read Event Sequence 107
5.5.1 Missing Packing Read Events 108
5.5.2 Missing Unpacking Read Events 115
5.5.3 A Missing Pair of Corresponding Read Events 116
5.5.4 Various Missing Corresponding Read Events 117
5.6 Critical Discussion of the Filter Algorithm 118
5.6.1 Leveraging a Stack to Represent the Packaging Hierarchy 118
5.6.2 Discussion of Filter Decisions 121

5.6.3 The Stack for the Reverse Filter Algorithm 121
5.6.4 Discussion of Filter Decisions for the Reverse Filter Algorithm 124
5.7 Summary 124

6 System Design and Implementation Considerations 127
6.1 High-Level Design 127
6.2 Bulk Loading Read Events into the Discovery Service 129
6.3 In-Memory Data Management 130
6.3.1 Expected Data Volume 130
6.3.2 Target Hardware 133
6.3.3 Expected Query Performance 134
6.3.4 Leveraging Partitioning 134
6.3.5 Expected Bulk Loading Performance 137
6.4 Static Structure of the System 137
6.5 Dynamic Behavior of the System 138
6.5.1 Processing Notification Messages 138
6.5.2 Processing Lifecycle Queries 140
6.5.3 Processing Last-Seen Queries 140
6.5.4 Storing and Processing Standing Queries 140
6.6 Summary 142

7 Evaluation 143
7.1 Data Volume at the Discovery Service 143
7.1.1 Experiment Setup and Procedure 144
7.1.2 Results 145
7.1.3 Discussion and Conclusion 147
7.2 Notification Message Processing 147
7.2.1 Experiment Setup and Procedure 148
7.2.2 Results 149
7.2.3 Discussion and Conclusion 150
7.3 Query Performance 150
7.3.1 Experiment Setup and Procedure 151
7.3.2 Results 152
7.3.3 Discussion and Conclusion 152
7.4 Scalability 152
7.5 Summary 155

8 Conclusion and Future Work 157
8.1 Summary 157
8.2 Future Work 157
