

Contents

1	Infrared Thermography	1
1.1	Introduction.....	1
1.2	Chronology of Infrared Thermography Development.....	2
2	Thermographic Diagnostics.....	7
2.1	Medical Thermography	7
2.1.1	Development Stages in Thermographic Diagnostics.....	9
2.2	Technical Thermography	15
2.2.1	Thermography in Industry	16
2.2.2	Thermography in the Building Industry	17
2.2.3	Thermography in the Military	19
2.2.4	Thermography in the Energy Industry	20
2.2.5	Thermography in Telecommunications.....	22
2.2.6	Thermography in Research	24
2.2.7	Thermography in Ecology.....	24
2.2.8	Prospective Thermography Applications in Aviation	25
3	Physical Nature of Thermography.....	31
3.1	The Principle of Human Thermoregulation	34
3.1.1	Thermo-reception	35
3.1.2	Thermoregulatory Mechanisms.....	36
3.2	Physical Thermoregulation	37
3.3	Metabolic Thermoregulation.....	39
3.4	Central Thermoregulation	40
3.5	Basic Mechanisms for Keeping Constant Body Temperature.....	42
3.5.1	Heat Transport in an Organism	42
3.5.2	Direct Effects of Temperature on the Regulatory Actions	43
3.5.3	Thermoregulation in Connection with Body Activity	43
3.6	Infrared Radiations.....	43
3.6.1	Basic Definitions and Principles of Detecting Infrared Radiation	51
3.7	Principle of Infrared Thermography System Activity	53

4	Thermography System Implementation in Practice	55
4.1	Infrared Camera Setting before the Process of Measurement	55
5	Methodology of Thermographic Measurement in Medicine	61
5.1	Methodology of Ambience and Environment Preparation.....	61
5.2	Methodology of the Imaging System Preparation	63
5.2.1	Thermographic Camera Stabilization.....	63
5.2.2	Lenses.....	64
5.2.3	Somatometrics in Medical Applications of Thermographic Diagnostics	64
5.3	Patient Preparation Methodology	64
5.3.1	Instructions before the Thermographic Measurement	66
5.3.2	Thermographic Measurement Questionnaire	66
5.4	Report Creation Methodology	67
5.4.1	Analysis of the Thermographic Images	69
6	Human Body Thermal Atlas.....	71
7	Thermographic Diagnostics Applied to Problematics of Paraplegia and Tetraplegia (Quadriplegia – Practical Study No. 1).....	79
7.1	Paraplegia and Tetraplegia Characteristics	80
7.1.1	Spinal Cord Injury Classification	82
7.1.2	Spinal Cord Injury Statistics.....	84
7.1.3	Thermoregulation of Patients after Spinal Cord Injury	86
7.2	Current Application of Thermographic Diagnostics in the Rehabilitation Process of Paraplegia and Tetraplegia Patients.....	88
7.3	Methodology of Thermographic Measurement in Medicine Applied to the Problematics of Paraplegia and Tetraplegia	89
7.3.1	Subjects of Measurement and Their Preparation.....	89
7.4	Hardware and Software Systems Used for Diagnostics	92
7.5	Vicinity and Environment of the Experiment Implementation	95
7.6	Processing and Analysis of Measured Sequences	97
7.7	Proposal of a Methodology for Thermographic Diagnostics of the Lower Limbs of Patients after a Spinal Cord Injury in the Rehabilitation Process	102
7.7.1	Methodology of Thermographic Measurements of the Surface Temperature of the Lower Limbs.....	136
7.7.2	The Methodology of Measurement in the Clinical Space (PATIENT-PM01)	136
7.7.3	Methodology for Healthy Individuals (AB04).....	141
7.8	Analysis of Temperature Distribution with the AB and SCI Patient Groups.....	143
7.8.1	Reference AB Group of Patients	143

7.8.2	SCI Group of Patients	149
7.9	Results of the Experimental Research and Measurements	155
7.10	Benefits of the Study	157
7.10.1	Benefits in the Area of Methodology	158
7.10.2	Benefits in the Area of Clinical Research	158
7.11	Conclusions of the Study.....	159
8	Thermographic Diagnostics of the Carpal Tunnel Syndrome – Practical Study No. 2	163
8.1	Application of Thermographic Diagnostics on the Area of the Distal Part of the Wrist.....	164
8.2	Carpal Tunnel Syndrome	165
8.3	Thermographic Measurement Methodology	168
8.3.1	Methodology for Acquisition of IR Thermograms with a Thermographic Camera.....	170
8.4	Input Data from RG and CTS Databases	173
8.5	Significance of the Primary Hypothesis	174
8.6	Significance of the Secondary Hypothesis	183
8.7	Significance of Thermographic Diagnostics for CTS	188
8.8	Benefits of the Study No. 2	190
	Conclusion	193
	Annexes.....	195
	Annex No. 1 – Table of Chosen Surfaces’ Emissivity	195
	Annex No. 2 – Principle of Infrared Camera Activity.....	197
	Annex No. 3 – Sample of Thermograms from the _{RG} D and _{RG} P Database	198
	Annex No. 4 – Sample of Thermograms from the _{CTS} D and _{CTS} P Database	199
	Annex No. 5 – Advice on Thermographic Diagnostics.....	201
	Annex No. 6 – Thermographic Measurement Questionnaire	202
	References	203
	Abbreviations	211
	Glossary	213
	List of Figures	215
	List of Tables.....	221
