

Table of Contents

Tool Support 1

Industrial Adoption of Model-Driven Engineering: Are the Tools Really the Problem?	1
<i>Jon Whittle, John Hutchinson, Mark Rouncefield, Håkan Burden, and Rogardt Heldal</i>	
Generic Model Assist	18
<i>Friedrich Steimann and Bastian Ulke</i>	
Adding Spreadsheets to the MDE Toolkit	35
<i>Mārtiņš Francis, Dimitrios S. Kolovos, Nicholas Matragkas, and Richard F. Paige</i>	

Dependability

Model-Driven Extraction and Analysis of Network Security Policies	52
<i>Salvador Martínez, Joaquin Garcia-Alfaro, Frédéric Cuppens, Nora Cuppens-Boulahia, and Jordi Cabot</i>	
SafetyMet: A Metamodel for Safety Standards	69
<i>Jose Luis de la Vara and Rajwinder Kaur Panesar-Walawege</i>	
A Generic Fault Model for Quality Assurance	87
<i>Alexander Pretschner, Dominik Holling, Robert Eschbach, and Matthias Gemmar</i>	

Comprehensibility

Towards an Operationalization of the “Physics of Notations” for the Analysis of Visual Languages	104
<i>Harald Störrle and Andrew Fish</i>	
Teaching Model Driven Engineering from a Relational Database Perspective	121
<i>Don Batory, Eric Latimer, and Maider Azanza</i>	
Big Metamodels Are Evil: Package Unmerge - A Technique for Downsizing Metamodels	138
<i>Frédéric Fondement, Pierre-Alain Muller, Laurent Thiry, Brice Wittmann, and Germain Forestier</i>	

Tool Support 2

Integrating Modeling Tools in the Development Lifecycle with OSLC: A Case Study	154
<i>Maged Elaasar and Adam Neal</i>	
Recommending Auto-completions for Software Modeling Activities	170
<i>Tobias Kuschke, Patrick Mäder, and Patrick Rempel</i>	
Automatically Searching for Metamodel Well-Formedness Rules in Examples and Counter-Examples	187
<i>Martin Faunes, Juan Cadavid, Benoit Baudry, Houari Sahraoui, and Benoit Combemale</i>	

Testing

Testing M2T/T2M Transformations	203
<i>Manuel Wimmer and Loli Burgueño</i>	
An Approach to Testing Java Implementation against Its UML Class Model	220
<i>Hector M. Chavez, Wuwei Shen, Robert B. France, and Benjamin A. Mechling</i>	
Automated Test Case Selection Using Feature Model: An Industrial Case Study	237
<i>Shuai Wang, Arnaud Gottlieb, Shaikat Ali, and Marius Liaaen</i>	

Semantics Evolution 1

Customizable Model Migration Schemes for Meta-model Evolutions with Multiplicity Changes	254
<i>Gabriele Taentzer, Florian Mantz, Thorsten Arendt, and Yngve Lamo</i>	
Fine-Grained Software Evolution Using UML Activity and Class Models	271
<i>Walter Cazzola, Nicole Alicia Rossini, Mohammed Al-Refai, and Robert B. France</i>	
Supporting the Co-evolution of Metamodels and Constraints through Incremental Constraint Management	287
<i>Andreas Demuth, Roberto E. Lopez-Herrejon, and Alexander Egyed</i>	

Verification

Model Checking of UML-RT Models Using Lazy Composition	304
<i>Karolina Zurowska and Juergen Dingel</i>	

Behavioural Verification in Embedded Software, from Model to Source Code	320
<i>Anthony Fernandes Pires, Thomas Polacsek, Virginie Wiels, and Stéphane Duprat</i>	
Formal Verification Integration Approach for DSML	336
<i>Faiez Zalila, Xavier Crégut, and Marc Pantel</i>	

Product Lines

Composing Your Compositions of Variability Models	352
<i>Mathieu Acher, Benoit Combemale, Philippe Collet, Olivier Barais, Philippe Lahire, and Robert B. France</i>	
Constraints: The Core of Supporting Automated Product Configuration of Cyber-Physical Systems	370
<i>Kunming Nie, Tao Yue, Shaukat Ali, Li Zhang, and Zhiqiang Fan</i>	
Defining and Validating a Multimodel Approach for Product Architecture Derivation and Improvement	388
<i>Javier González-Huerta, Emilio Insfrán, and Silvia Abrahão</i>	

Evolution 2

Evolution of the UML Interactions Metamodel	405
<i>Marc-Florian Wendland, Martin Schneider, and Øystein Haugen</i>	
A Graph-Pattern Based Approach for Meta-Model Specific Conflict Detection in a General-Purpose Model Versioning System	422
<i>Asha Rajbhoj and Sreedhar Reddy</i>	
On the Complex Nature of MDE Evolution	436
<i>Regina Hebig, Holger Giese, Florian Stallmann, and Andreas Seibel</i>	

Semantics

Simplification and Correctness of UML Class Diagrams – Focusing on Multiplicity and Aggregation/Composition Constraints	454
<i>Mira Balaban and Azzam Marae</i>	
Specification of Cyber-Physical Components with Formal Semantics – Integration and Composition	471
<i>Gabor Simko, David Lindecker, Tihamer Levendovszky, Sandeep Neema, and Janos Sztipanovits</i>	
Endogenous Metamodeling Semantics for Structural UML 2 Concepts	488
<i>Lars Hamann and Martin Gogolla</i>	

Domain-Specific Modeling Languages

Computer Assisted Integration of Domain-Specific Modeling Languages
Using Text Analysis Techniques 505
Florian Noyrit, Sébastien Gérard, and François Terrier

Towards the Notation-Driven Development of DSMLs 522
Laurent Wouters

Validation of Derived Features and Well-Formedness Constraints in
DSLs: By Mapping Graph Queries to an SMT-Solver 538
Oszkár Semeráth, Ákos Horváth, and Dániel Varró

Models@RT

Self-adaptation with End-User Preferences: Using Run-Time Models
and Constraint Solving 555
Hui Song, Stephen Barrett, Aidan Clarke, and Siobhán Clarke

Runtime Model Based Management of Diverse Cloud Resources 572
*Xiaodong Zhang, Xing Chen, Ying Zhang, Yihan Wu, Wei Yao,
Gang Huang, and Qiang Lin*

The Semantic Web as a Software Modeling Tool: An Application to
Citizen Relationship Management 589
*Borislav Iordanov, Assia Alexandrova, Syed Abbas,
Thomas Hilpold, and Phani Upadrasta*

Design and Architecture

Concern-Oriented Software Design 604
Omar Alam, Jörg Kienzle, and Gunter Mussbacher

Analyzing Enterprise Models Using Enterprise Architecture-Based
Ontology 622
Sagar Sunkle, Vinay Kulkarni, and Suman Roychoudhury

Analyzing the Effort of Composing Design Models of Large-Scale
Software in Industrial Case Studies 639
Kleinner Farias, Alessandro Garcia, Jon Whittle, and Carlos Lucena

Model Transformation

Parallel Execution of ATL Transformation Rules 656
Massimo Tisi, Salvador Martínez, and Hassene Choura

Transformation of Models Containing Uncertainty	673
<i>Michalis Famelis, Rick Salay, Alessio Di Sandro, and Marsha Chechik</i>	
Automated Verification of Model Transformations in the Automotive Industry	690
<i>Gehan M.K. Selim, Fabian Büttner, James R. Cordy, Juergen Dingel, and Shige Wang</i>	
Model Analysis	
Data-Flow Based Model Analysis and Its Applications	707
<i>Christian Saad and Bernhard Bauer</i>	
Contract-Aware Slicing of UML Class Models	724
<i>Wuliang Sun, Robert B. France, and Indrakshi Ray</i>	
Usability Inspection in Model-Driven Web Development: Empirical Validation in WebML	740
<i>Adrian Fernandez, Silvia Abrahão, Emilio Insfrán, and Maristella Matera</i>	
System Synthesis	
Model-Driven Approach for Supporting the Mapping of Parallel Algorithms to Parallel Computing Platforms	757
<i>Ethem Arkin, Bedir Tekinerdogan, and Kayhan M. İmre</i>	
Compositional Synthesis of Controllers from Scenario-Based Assume-Guarantee Specifications	774
<i>Joel Greenyer and Ekkart Kindler</i>	
Author Index	791
