

CONTENTS

1. INTRODUCTION	1
2. FUNDAMENTALS	6
2.1 Modeling and Simulation of Heterogeneous Reactions	6
2.2 Reaction Kinetics	6
2.2.1 Global Kinetics versus Elementary-Step Reaction Mechanism	8
2.2.2 Surface Reactions and Mean-Field Approximation	9
2.2.3 Thermodynamic Consistency	13
2.3 Modeling Mass and Heat Transfer	14
2.3.1 Navier-Stokes Equations for Tubular Channel Flow Model	15
2.3.2 Stagnation-Flow Model	19
2.4 Numerical Tools	23
2.4.1 CHEMKIN SPIN Code [69]	23
2.4.2 DETCHEM Code	24
2.4.2.1 DETCHEM ^{STAG}	24
2.4.2.2 DETCHEM ^{CHANNEL}	25
2.4.2.3 DETCHEM ^{EQUIL} [58]	25
3. EXPERIMENTAL SET-UP	27
3.1 Stagnation-Flow Reactor	27
3.1.1 Feeding System	29
3.1.2 The Reactor Chamber	30
3.1.3 Heater Design	31
3.1.4 Analytics	34
3.1.5 Gas Sampling and Measurement Technique	36
3.1.6 Resolution of the Boundary-Layer: Effect of the Operating Pressure	39
4. CATALYST PREPARATION AND CHARACTERIZATION	42
4.1 Catalyst Preparation	42
4.2 Catalyst Characterization	42
4.2.1 Light Microscopy	42
4.2.2 Scanning Electron Microscopy [101, 102]	43
4.2.3 High Resolution Transmission Electron Microscopy (HR-TEM) [103, 104] 44	
4.2.4 CO Chemisorption: Development of a Continuous-flow CO Chemisorption Measurement Technique	45
4.2.4.1 Theoretical Background	46
4.2.4.2 Experimental	47
4.2.4.3 Results and Discussion	51
4.2.4.4 Conclusion	62
4.2.5 CO chemisorption on Rh Surface	62
4.2.6 CO chemisorption on the Stagnation Surface	63

CONTENTS

5. DEVELOPMENT OF A MULTI-STEP SURFACE REACTION MECHANISM ..	67
5.1 Catalytic Ignition of Light Hydrocarbons.....	69
5.1.1 Theoretical Background	69
5.1.2 Experimental Procedure	70
5.1.3 Results and Discussion	70
5.1.4 Conclusion	73
5.2 H ₂ oxidation Kinetics	74
5.2.1 Theoretical Background	74
5.2.2 Experimental Procedure	76
5.2.3 Kinetic Parameters	76
5.2.4 Results and Discussion	78
5.2.5 Conclusion	84
5.3 CO/O ₂ systems: Direct oxidation of CO by O ₂	85
5.3.1 Theoretical Background	85
5.3.2 Experimental	85
5.3.3 Results and Discussion	86
5.3.4 Conclusion	90
5.4 Kinetics of the Water-Gas Shift Reaction	91
5.4.1 Theoretical Background	91
5.4.2 Experimental Procedure	94
5.4.3 Surface Reaction Mechanism	95
5.4.4 Results and Discussion	101
5.4.4.1 Stagnation-flow Reactor Experiments	101
5.4.4.2 Application of the Reaction Kinetics:	107
5.4.5 Conclusion	111
5.5 Catalytic Partial Oxidation and Reforming of CH ₄	113
5.5.1 Theoretical Background	113
5.5.2 Experimental Procedure	114
5.5.3 Results and Discussion	115
5.5.4 Conclusion	133
5.6 Catalytic Partial Oxidation and Reforming of Propane (C ₃ H ₈).....	135
5.6.1 Theoretical Background	135
5.6.2 Experimental Procedure	136
5.6.3 Results and Discussion	137
5.6.4 Conclusion	144
6. CONCLUSIONS AND OUTLOOK	145
