 - 3.6 Summary 62

4	Learning Kinematic Models of Articulated Objects	65
4.1	Unified Framework for Learning Kinematic Models	67
4.1.1	Model Fitting	72
4.1.2	Model Evaluation	76
4.1.3	Model and Structure Selection	77
4.2	Framework Extensions	79
4.3	Perception and Control of Articulated Objects	86
4.4	Experiments	88
4.4.1	Model Estimation and Model Selection	89
4.4.2	Operating Articulated Objects with a Mobile Manipulator	95
4.4.3	Detecting Kinematic Loops	100
4.4.4	Robustness and Convergence Analysis	102
4.5	Related Work and Discussion	109
4.6	Summary	111
5	Vision-Based Perception of Articulated Objects	113
5.1	Marker-Less Pose Estimation	114
5.1.1	Fast Processing of Depth Images	114
5.1.2	Pose Estimation	116
5.1.3	Pose Tracking	118
5.2	Experiments	119
5.2.1	Evaluation of Detection Rate and Pose Accuracy	119
5.2.2	Kinematic Model Learning	121
5.3	Related Work and Discussion	123
5.4	Summary	124
6	Object Recognition Using Tactile Sensors	125
6.1	The Bag-of-Features Model	126
6.1.1	Unsupervised Creation of a Tactile Vocabulary	128
6.1.2	Learning the Feature Histograms	130
6.1.3	Object Classification	131
6.2	Selecting Observation Actions	132
6.3	Experiments	133
6.3.1	Vocabulary and Codebook Creation	134
6.3.2	Recognition Rates	134
6.3.3	Active Perception	137
6.4	Related Work and Discussion	137
6.5	Summary	139
7	Object State Estimation Using Tactile Sensors	141
7.1	Generic Tactile Features for State Estimation	142
7.1.1	Feature Extraction	142
7.1.2	Decision Tree Classifier	145
7.1.3	Experiments	145

7.2	Comparative Human Study	150
7.3	High-Frequency Tactile Feature for State Estimation	151
7.3.1	Training Data	153
7.3.2	Feature Extraction	155
7.3.3	Experiments	156
7.4	Related Work and Discussion	158
7.5	Summary	160
8	Learning Manipulation Tasks by Demonstration	161
8.1	Modeling Manipulation Tasks	162
8.1.1	Learning Task Descriptions from Human Demonstrations	165
8.1.2	Reproducing Tasks	167
8.2	Experiments	170
8.2.1	Imitating Human Actions	171
8.2.2	Dealing with Obstacles during Imitation	171
8.2.3	Imitation by Planning	173
8.3	Related Work and Discussion	174
8.4	Summary	178
9	Conclusions	179
9.1	Future Work	181
A	The Laplace Approximation	185
B	Derivation of the Bayesian Information Criterion	187
	References	191
