

Contents

1	Introduction	1
2	Medical imaging methods	5
2.1	Signal penetration	6
2.2	Tissue interaction	8
2.3	Signal confinement/resolution	9
2.4	Overview of existing imaging methods	11
2.5	Conclusions for successful new imaging modalities	15
3	Basic idea of Magnetic Particle Imaging	19
3.1	Signal generation and recording	19
3.1.1	Signal generation	19
3.1.2	Signal confinement	23
3.1.3	Drive field	25
3.2	Reconstruction	27
4	Magnetic particle properties	33
4.1	Demagnetization factor	33
4.2	Single domain particles and the Langevin theory	36
4.3	Remagnetization processes	38
4.4	Magnetic anisotropy	40
4.5	Particle-particle interactions	43
5	The Focus Field	45
5.1	Patient safety	45
5.2	Technical limitations	46
5.3	Additional fields, the focus fields	46
6	Resolution, sensitivity and speed	49
6.1	Unlimited resolution?	49
6.2	Sensitivity	51
6.2.1	Signal strength	52

6.2.2	Patient noise	52
6.2.3	Detection limit of MPI	53
6.2.4	Detection limit of MRI	54
6.2.5	Detection limit of CT	54
6.2.6	Detection limit of PET and SPECT	56
6.3	Encoding efficiency	57
6.4	Speed limit	65
6.4.1	MPI encoding speed	65
6.4.2	Ultrasound encoding speed	66
6.4.3	CT encoding speed	66
6.4.4	MRI encoding speed	67
7	Experimental and simulation results on MPI	69
8	Potential applications of MPI	73
8.1	Combination with magnetic resonance imaging	73
8.2	Vascular applications	76
8.2.1	Cardiovascular	77
8.2.2	Neurovascular	79
8.3	Gastrointestinal	80
8.4	Lung	81
8.5	RES imaging/direct inflammation imaging	81
8.6	Cell labelling	82
8.6.1	Red blood cell labelling	82
8.6.2	White blood cell labelling	83
8.6.3	Stem cell labelling	84
8.7	Sentinel lymph node imaging	84
8.8	Hyperthermia	85
9	Potential further developments and applications	87
9.1	Tissue intrinsic contrast MPI	87
9.2	Targeted imaging	87
9.3	Lung diffusion imaging	88
9.4	Temperature imaging	89
9.5	MPI-acoustic imaging and Elastography	91
9.6	Pulmonary artery pressure	92
9.7	Object tracking and manipulation	94
9.8	Electrophysiology imaging	96
9.9	Light modulation	98

9.10 X-ray modulation	99
9.11 Targeted drug delivery	99
10 Conclusion	101
Bibliography	107
