

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Overview of Research Approach, Methodology and Design	6
1.3	Thesis Organization	6
2	Smart Grid	7
2.1	The German Energy Market	7
2.2	Smart Grid Concepts	9
2.3	Transformative Services	12
3	Theoretical Foundations	15
3.1	Technology Adoption of Individuals	15
3.2	Incentives and Motivation Literature	17
3.2.1	Incentive Alignment and Motivation in IS	17
3.2.2	Incentives and Motivation in Social Psychology	18
3.2.3	How Endogenous Motivations Influence User Intentions	23
3.3	Pro-environmental Behavior	26
3.4	Risk Issues	27
3.5	Technology and Energy-Related Issues	29
4	Conceptual Model	31
4.1	Adoption Literature and Ecofriendly Behavior	32
4.2	The Organismic Integration Theory	34
4.3	Privacy and Socio-demographic Variables	38
4.3.1	Perceived Privacy Risk	38
4.3.2	Socio-demographic Variables	39
5	Methodology	41
5.1	Structural Equation Modeling	41
5.1.1	Introduction of Structural Equation Modeling	41
5.1.2	Covariance Versus Variance-Based Structural Equation Modeling	44

5.2 Instrument Validation 47

5.2.1 Stage I: Initial Item Pool Generation Based on the
Constructs' Conceptualization 48

5.2.2 Stage II: Scale Development 50

5.2.3 Stage III: Quantitative Pretest and Pilot Study 52

5.3 Measures 58

5.4 Samples 60

5.4.1 Non-user Sample Characteristics 61

5.4.2 User Sample Characteristics 62

5.4.3 Non Response Bias 62

6 Analysis 63

6.1 Results of the Non-user Sample 63

6.1.1 Measurement Model Evaluation 64

6.1.2 Structural Model Evaluation 66

6.2 Results of the User Sample 71

6.2.1 Measurement Model Evaluation 71

6.2.2 Structural Model Evaluation 74

6.3 Exploratory Comparison of the User and Non-user Sample 78

7 Discussion and Interpretation 81

7.1 Theoretical Contribution 84

7.2 Practical Contribution 86

7.3 Limitations and Further Research 87

8 Conclusion 89

Appendix 91

Appendix 1: Final Questionnaire of the Quantitative Field Test 91

Appendix 2: Set of Socio-Demographic and Control Variables 93

Appendix 3: Cross-Loadings for All Items in the
Non-User Sample 97

Appendix 4: Cross-Loadings for All Items in the User Sample 99
