

Table of Contents

Verification and Testing

Data Flow Testing in TTCN-3 with a Relational Database Schema	1
<i>Gusztáv Adamis, Antal Wu-Hen-Chang, Gábor Árpád Németh, Levente Erős, and Gábor Kovács</i>	
Property Verification with MSC	19
<i>Emmanuel Gaudin and Eric Brunel</i>	

Dependability Engineering

Towards the Generation of AMF Configurations from Use Case Maps Based Availability Requirements	36
<i>Jameleddine Hassine and Abdelwahab Hamou-Lhadj</i>	
Modeling Early Availability Requirements Using Aspect-Oriented Use Case Maps	54
<i>Jameleddine Hassine, Gunter Mussbacher, Edna Braun, and Mohammad Alhaj</i>	
Model-Driven Engineering for Trusted Embedded Systems Based on Security and Dependability Patterns	72
<i>Brahim Hamid, Jacob Geisel, Adel Ziani, Jean-Michel Bruel, and Jon Perez</i>	

Analysis

Static Analysis Techniques to Verify Mutual Exclusion Situations within SysML Models	91
<i>Ludovic Apvrille and Pierre de Saqui-Sannes</i>	
Significantly Increasing the Usability of Model Analysis Tools through Visual Feedback	107
<i>El Arbi Aboussoror, Ileana Ober, and Iulian Ober</i>	
Modeling Component Erroneous Behavior and Error Propagation for Dependability Analysis	124
<i>Naif A. Mokhayesh Alzahrani and Dorina C. Petriu</i>	

Domain Specific Languages

An IMS DSL Developed at Ericsson	144
<i>Pascal Potvin, Mario Bonja, Gordon Bailey, and Pierre Busnel</i>	

Efficient Development of Domain-Specific Simulation Modelling Languages and Tools	163
<i>Andreas Blunk and Joachim Fischer</i>	

Model Transformation

FTG+PM: An Integrated Framework for Investigating Model Transformation Chains	182
<i>Levi Lúcio, Sadaf Mustafiz, Joachim Denil, Hans Vangheluwe, and Maris Jukss</i>	
Traceability Links in Model Transformations between Software and Performance Models	203
<i>Mohammad Alhaj and Dorina C. Petriu</i>	
Refactorings in Language Development with Asymmetric Bidirectional Model Transformations	222
<i>Martin Schmidt, Arif Wider, Markus Scheidgen, Joachim Fischer, and Sebastian von Klinski</i>	

**Specification and Description Language and
Evolution**

SDL Real-Time Tasks – Concept, Implementation, and Evaluation	239
<i>Dennis Christmann, Tobias Braun, and Reinhard Gotzhein</i>	
Definition of Virtual Reality Simulation Models Using Specification and Description Language Diagrams	258
<i>Pau Fonseca i Casas, Xavier Pi, Josep Casanovas, and Jordi Jové</i>	
Integration of SDL Models into a SystemC Project for Network Simulation	275
<i>Pavel Morozkin, Irina Lavrovskaya, Valentin Olenev, and Konstantin Nedovodeev</i>	
Author Index	291
