<b>1</b>	<b>Special Imaging Issues in Children</b>	1
1.1	General Introduction, Basic Considerations	1
1.2	Importance of Radiation Protection in Children	2
1.3	Radiography and Fluoroscopy	10
1.4	Technique and Clinical Value of Ultrasound in Pediatric Radiology	18
1.5	Special Aspects of Computed Tomography in Children	22
1.6	Special Aspects of Magnetic Resonance Imaging in Children	29
<b>2</b>	<b>Imaging of the Pediatric Chest</b>	37
2.1	Chest Radiography, Computed Tomography, and Magnetic Resonance Imaging—Lung, Pleura, and Thoracic Cage	37
2.2	Mediastinum	56
2.3	Basic Principles of Thoracic Ultrasound in Children	66
2.4	The Pediatric Breast	70
2.5	Important Aspects of Cardiac Imaging in Newborns and Children	72
<b>3</b>	<b>Imaging of the Pediatric Gastrointestinal Tract</b>	83
3.1	Imaging Modalities and Prerequisites	83
3.2	Congenital Anomalies of the Gastrointestinal Tract	83
3.3	Neonatal Gastrointestinal Problems and Complications	97
3.4	Acquired Gastrointestinal Changes after the Neonatal Period	100
3.5	Congenital and Acquired Abnormalities of the Liver, Bile Ducts, and Pancreas	108
3.6	Important Disorders of the Spleen	113
<b>4</b>	<b>Imaging of the Pediatric Central Nervous System and Spine</b>	121
4.1	Radiography, Computed Tomography, and Magnetic Resonance Imaging in Pediatric Neuroradiology	121
4.2	Neuros sonography in Newborns and Children	143

---

<b>5 Pediatric Uroradiology</b> .....	163
5.1 Development and Embryology .....	163
5.2 Imaging Modalities, Methods, and Prerequisites .....	164
5.3 Age-Dependent Normal Findings in the Pediatric Urogenital Tract .....	171
5.4 Inflammatory Urinary Tract Diseases .....	173
5.5 Vesicoureteral Reflux .....	174
5.6 Congenital Hydronephrosis .....	175
5.7 Other Urinary Tract Malformations .....	181
5.8 Urolithiasis and Nephrocalcinosis .....	184
5.9 (Poly)cystic Kidney Diseases and Nephropathies .....	187
5.10 Urinary Tract Involvement by Systemic Disease, Bladder Dysfunction .....	194
5.11 Imaging of the Pediatric Female Genital Tract .....	195
5.12 Imaging of the Pediatric Male Genital Tract .....	198
5.13 Intersex, Urogenital Sinus, and Anogenital Malformations .....	202
5.14 Other .....	203
<b>6 Imaging of Pediatric Trauma</b> .....	210
6.1 Introduction and General Considerations .....	210
6.2 Growth Disorders .....	210
6.3 Imaging of Fractures .....	212
6.4 Nomenclature and Classification .....	213
6.5 Frequency of Various Fractures in Children .....	214
6.6 Cranial and Craniofacial Injuries .....	217
6.7 Spinal Injuries .....	219
6.8 Visceral Injuries and Children in Emergency Room .....	220
6.9 Sports-Related Injuries and Chronic Trauma .....	223
6.10 Child Abuse .....	223
6.11 Obstetric Trauma .....	226
6.12 Intraocular Foreign Bodies .....	227
<b>7 The Pediatric Musculoskeletal System</b> .....	229
7.1 Normal Skeleton and Variants .....	229
7.2 Regional Skeletal Malformations, Abnormalities of Bone Shape and Arrangement .....	232
7.3 Congenital Hip Dysplasia .....	238
7.4 Spinal Column .....	241
7.5 Osteochondrosis and Aseptic Necrosis ..	248
7.6 Osteomyelitis .....	251
7.7 Diseases of Joints .....	255
7.8 Changes in Soft Tissues .....	259

<b>8</b>	<b>Pediatric Oncoradiology</b>	269
8.1	General Introduction and Basic Principles	269
8.2	Tumors of the Brain, Orbit, and Spine	270
8.3	Neuroblastoma, Adrenal Masses, and Thoracic Tumors	277
8.4	Tumors of the Urogenital Tract	286
8.5	Gastrointestinal Tumors and Tumors of Liver, Pancreas, Spleen, Bowel, and Mesentery	294
8.6	Important Tumors of Muscle, Bone, and Soft-Tissue	300
8.7	Systemic Oncologic Diseases	308
<b>9</b>	<b>Syndromes, Metabolic Disorders, and Other Characteristic Features in Children</b>	312
9.1	Introduction	312
9.2	Hormone Deficiencies and Growth Disorders	312
9.3	Adrenal Involvement in Hormonal Disorders	315
9.4	Abnormalities of Thyroid Gland and Thyroid Metabolism	319
9.5	Typical Bony Changes in Syndromic Disorders	322
9.6	Examples of Syndromic Conditions with Skeletal Involvement	329
9.7	Metabolic Disorders	332
