

1 Business Information Systems	1
1.1 The Evolution of ERP and SCM	1
1.2 Business Application Software	3
1.3 Business Processes	8
1.3.1 Processes Versus Functions	8
1.3.2 Basic Concepts of Business Processes	8
1.3.3 Graphical Notations	9
1.4 Production Planning and Control	10
1.4.1 Tasks of Production Planning and Control	11
1.4.2 Production Planning Goals	13
1.4.3 Benefits and Shortcomings of Production Planning	15
1.5 Coping with Mass Data	16
2 MRP: Material Requirements Planning	19
2.1 Master Data for MRP	20
2.1.1 Parts and Product Structures	20
2.1.2 Product Variants	28
2.1.3 More Master Data	32
2.1.4 Dealing with Missing Data	33
2.1.5 A Note on "Numbers"	35
2.2 Master Production Planning	36
2.2.1 Planning for Anonymous Demand	36
2.2.2 Planning for Customer Orders	39
2.3 Planning Primary and Secondary Requirements	42
2.3.1 Consumption-Driven Planning	44
2.3.2 Requirements-Driven Planning	49
2.3.3 MRP in Make-to-Order Production	56
2.4 Outcome of Material Requirements Planning	59
3 MRP II: Manufacturing Resource Planning	61
3.1 Master Data for MRP II	61
3.1.1 Routings	61
3.1.2 Operating Facilities	63
3.1.3 More Master Data	64
3.1.4 Resource Lists	65

3.2	From Closed Loop MRP to MRP II	66
3.3	Lead-Time Scheduling	68
3.3.1	Backward and Forward Scheduling	69
3.3.2	Determining Buffers Through Double Scheduling	71
3.3.3	Lead-Time Reduction	72
3.3.4	Lead-Time Scheduling in Make-to-Order Production	75
3.4	Capacity Load Leveling	76
3.4.1	Working with Capacity Profiles	77
3.4.2	Capacity Planning in Make-to-Order Production	80
3.5	Order Release	81
3.5.1	Availability Check	82
3.5.2	Creating Documents	84
3.5.3	Order Release in Make-to-Order Production	84
3.6	Shop-Floor Control	85
3.6.1	Detailed Scheduling	85
3.6.2	Advanced Scheduling Methods	87
3.7	Excursus: Product Costing	89
3.7.1	Make-to-Stock Products	89
3.7.2	Make-to-Order Products	93
4	ERP: Enterprise Resource Planning	95
4.1	The Need for Integration	95
4.2	Mapping the Organization	97
4.2.1	Accounting	98
4.2.2	Materials Management and Production	99
4.2.3	Sales	101
4.2.4	Human Resources	103
4.3	Business Processes	105
4.3.1	Procurement	105
4.3.2	Order Fulfillment	106
4.3.3	Production	109
4.3.4	Recruitment	111
4.3.5	Other Processes	112
4.3.6	Process Integration	114
4.3.7	Modeling with a Tool	118
4.4	ERP Systems	119
4.4.1	The ERP Market	119
4.4.2	Selecting an ERP System	120
4.5	ERP and the Internet	124
4.5.1	Accessing an ERP System	125
4.5.2	E-Procurement	126
5	Case: SAP ERP	127
5.1	The Evolution of SAP ERP	127
5.2	Functionality of SAP ERP	128
5.2.1	Procurement and Logistics Execution	129
5.2.2	Product Development and Manufacturing	131
5.2.3	Sales and Service	132

5.2.4	Financials	132
5.2.5	Human Capital Management	133
5.2.6	Analytics	134
5.2.7	Corporate Services	135
5.3	Implementing Business Processes with SAP ERP	137
5.3.1	The Model Company: Global Bike International	138
5.3.2	Procurement	139
5.3.3	Order Fulfillment	144
5.3.4	Production	151
5.3.5	Representing Organizational Units in EPCs	156
6	ERP System Implementation	159
6.1	Implementation Process and Methodology	160
6.1.1	Implementation Methodology	160
6.1.2	ASAP: A Vendor-Specific Process Model	160
6.1.3	Implementation Cost: Total Cost of Ownership	165
6.2	Customizing	167
6.2.1	Forms of Customizing	167
6.2.2	Disadvantages of Individual Solutions	169
6.3	Vendor-Specific Customizing: SAP ERP	170
6.3.1	General Settings	172
6.3.2	Organizational Structures	172
6.3.3	Process and Functional Settings	174
6.3.4	User Exits	180
6.4	SAP ERP Technology	181
6.4.1	History and Background	182
6.4.2	SAP NetWeaver	184
7	Manufacturing Systems	189
7.1	Manufacturing Execution Systems	189
7.1.1	Finite Capacity Scheduling: Manufacturing Leitstand	193
7.1.2	Production Data Acquisition: PDA, MDA, and TDA	200
7.1.3	Quality Management	205
7.2	Engineering Information Systems	206
7.2.1	CAX Systems	206
7.2.2	PDM: Product Data Management	216
8	SCM: Supply Chain Management	221
8.1	Motivation for Supply Chain Management	221
8.2	Coordination and Cooperation	224
8.2.1	Industrial Dynamics	224
8.2.2	The Bullwhip Effect	227
8.2.3	Cooperation and Trust in Supply Chains	229
8.3	Modeling Intercompany Business Processes: SCOR Model	232
8.3.1	Overview	233
8.3.2	SCOR Processes	233
8.3.3	Process Decomposition	234
8.3.4	Modeling a Supply Chain	236
8.3.5	Supply Chain Performance and Risks	239

8.4	Tasks of an SCM System	241
8.4.1	Strategic Level	241
8.4.2	Planning Level	243
8.4.3	Execution Level	244
9	SCM Data Structures and Advanced Planning	249
9.1	Data Structures for Supply Chain Management	249
9.1.1	Master Data	249
9.1.2	Transaction Data	255
9.1.3	Pegging	256
9.2	Advanced SCM Planning Approaches	259
9.2.1	APS: Advanced Planning and Scheduling	259
9.2.2	Planning Locations	261
9.2.3	Planning Inventory and Orders	264
9.2.4	Planning Supply Networks	267
10	Case: SAP SCM	273
10.1	SAP Advanced Planner and Optimizer	274
10.1.1	Supply Chain Engineer, Cockpit, and Alerts	275
10.1.2	Demand Planning	276
10.1.3	Supply Network Planning	279
10.1.4	Production Planning and Detailed Scheduling (PP/DS)	290
10.1.5	Global Available-to-Promise (Global ATP)	294
10.1.6	Transportation Planning and Vehicle Scheduling	297
10.2	Core Interface (CIF)	297
10.3	Other SAP SCM Modules	299
10.3.1	Supply Network Collaboration	299
10.3.2	Forecasting and Replenishment	303
10.3.3	Event Management	304
10.3.4	Extended Warehouse Management	304
11	Current and Future Trends	307
11.1	Service-Oriented Architecture	307
11.2	On-Demand Solutions	310
11.2.1	Software-as-a-Service and Cloud Computing	311
11.2.2	ERP on Demand	313
11.2.3	Case: SAP Business ByDesign	314
11.3	Alternative Approaches	319
11.3.1	Open-Source ERP	319
11.3.2	Vision: Federated ERP	320
11.4	The “Internet of Things”	322
11.4.1	Background and Technology	323
11.4.2	RFID Applications in Business	328
11.4.3	Business Benefits and Challenges	332
	Appendix: Data Models	337
