

Table of Contents

Incremental Refinement Checking for Test Case Generation	1
<i>Bernhard K. Aichernig, Elisabeth Jöbstl, and Matthias Kegele</i>	
Time for Mutants — Model-Based Mutation Testing with Timed Automata	20
<i>Bernhard K. Aichernig, Florian Lorber, and Dejan Ničković</i>	
Model-Based Testing for Verification Back-Ends	39
<i>Cyrille Artho, Armin Biere, and Martina Seidl</i>	
A Metric for Testing Program Verification Systems	56
<i>Bernhard Beckert, Thorsten Bormer, and Markus Wagner</i>	
Test Program Generation for a Microprocessor: A Case-Study	76
<i>Achim D. Brucker, Abderrahmane Feliachi, Yakoub Nemouchi, and Burkhardt Wolff</i>	
A Declarative Debugger for Sequential Erlang Programs	96
<i>Rafael Caballero, Enrique Martin-Martin, Adrián Riesco, and Salvador Tamarit</i>	
Initiating a Benchmark for UML and OCL Analysis Tools	115
<i>Martin Gogolla, Fabian Büttner, and Jordi Cabot</i>	
Speeding Up Algorithmic Debugging Using Balanced Execution Trees	133
<i>David Insa, Josep Silva, and Adrián Riesco</i>	
Generating Test Suites with Augmented Dynamic Symbolic Execution	152
<i>Konrad Jamrozik, Gordon Fraser, Nikolai Tillman, and Jonathan de Halleux</i>	
A Lesson on Proof of Programs with Frama-C. Invited Tutorial Paper	168
<i>Nikolai Kosmatov, Virgile Prevosto, and Julien Signoles</i>	
Evaluation of ASLan Mutation Operators	178
<i>Johan Oudinet, Alberto Calvi, and Matthias Büchler</i>	

Solving Constraints for Generational Search 197
 Daniel Pötzl and Andreas Holzer

Divergent Quiescent Transition Systems 214
 Willem G.J. Stokkink, Mark Timmer, and Mariëlle I.A. Stoelinga

Author Index 233
