

Table of Contents

1 Principles of Practice	1
Accurate Diagnosis Is the Key to Success	1
Focus on the Patient's Main Complaint	1
Dealing with the Patient's Expectations	1
Some Psychological Aspects of Nasal Symptoms	6
Optimize Medical Treatment	7
Tailor the Surgery to Fit the Extent of the Problem	7
Minimize Surgical Morbidity	8
How Can This Be Achieved?	10
Sense of Smell Should Be Preserved at All Costs	10
The Importance of Postoperative Treatment ...	10
2 Pathophysiology of Rhinosinusitis	12
Chronic Rhinosinusitis	13
Definition of CRS	13
Limited Evidence Associated with Anatomical Factors	15
Comments on Specific Conditions	15
Allergic Rhinosinusitis	15
Entopy or Local Allergy	15
Nonallergic Rhinitis	16
A Note on the Term "Nasal Polypsis"	16
Chronic Rhinosinusitis Without Nasal Polyps	16
Practical Comments	17
3 Who? Optimizing Diagnosis and Selection of Patients for Surgery	18
Symptom-oriented Patient Selection	18
Which are the Cardinal Symptoms? What Criteria in the History are Best to Focus on? ...	18
History—Interpreting Nasal Symptoms	18
Nasal Obstruction	18
Disorders of Smell	21
Rhinorrhea	23
Catarrh and Postnasal Drip	25
Postnasal Drip Syndrome	25
Chronic Cough	26
Sneezing	26
Crusting	27
Facial Pain and Pressure	27
Relevant Medical History	33
Clinical Examination	33
Investigations	34
Skin Prick Tests	34
Total or Specific Immunoglobulin E Tests	35
Immunity Testing	35
Other Hematologic Tests	36
Ciliary Motility/Structural Studies	36
Sweat Sodium Concentration	36
Serum Biochemistry	36
Culture	36
Radiology	36
Histology	37
Who Will Most Likely Benefit from Surgery?	37
Disease-oriented Patient Selection	37
Chronic Infective Rhinosinusitis	37
Aspergillosis/Fungal Disease	37
Mycetoma/Saprophytic Fungal Disease	37
Allergic Aspergillosis	38
Chronic Invasive Fungal Sinusitis	39
Fulminant Aspergillosis	39
Maxillary Sinusitis Secondary to Dental Disease	40
Antrochoanal Polyp	40
Inverted Papilloma	40
Unilateral Nasal Polyps Associated with Neoplasia	42
Benign and Malignant Tumors	42
Pediatric Rhinosinusitis	42
Endoscopic Sinus Surgery in Children	46
Summary	47
Who Not to Select for Surgery	47
Patient Expectations	48

4 When? Medical Treatment and Timing of Surgery	49		
Optimizing Medical Treatment Before Surgery	49	The Management of Fungal Rhinosinusitis	55
The Management of Chronic Rhinosinusitis with Polyposis	49	Optimizing the Timing of Surgery	57
The Management of Chronic Rhinosinusitis without Polyposis	53	Preoperative Counseling	58
The Management of Infective Rhinosinusitis ..	55	Expectations	58
		Explanation	59
		Preparation for Surgery	59
		Patient Communication	59
5 Preserving and Improving the Sense of Smell	60		
Why Should We Focus on the Sense of Smell?	60	Concept of the "Controlled Moderate Lateralization of the Middle Turbinate"	64
Preoperative Assessment	61	How to Prevent Loss of Olfaction	65
Surgical Strategy to Preserve and Improve Olfaction	64	Hints	65
6 Why? The Goals of Surgery	67		
Why Surgery Can Help the Diseased Mucosa	67	Mucoceles	74
Rationale and Goals of Surgery in Specific Conditions	68	Antrochoanal Polyp	75
Periorbital Abscess	68	Inverted Papilloma	75
Barotrauma	68	Malignant Tumors	76
Choanal Atresia	68	Repair of Dural and Skull Base Defects	76
Epistaxis	68	Pituitary Surgery	76
Distal Nasolacrimal Duct Obstruction	69	Decompression of the Orbit	76
Unknown Pathology/Biopsy	69	Decompression of the Optic Nerve	77
Benign Tumors	73	Penetrating Injuries of the Skull Base	77
		Quality of Life	79
7 Applied Anatomy for Endoscopic Sinus and Skull Base Surgery	80		
Ethmoidal Infundibulum	80	Frontal Sinus	85
Maxillary Sinus	80	Pterygopalatine Fossa	87
Anterior Ethmoid	83	Cavernous Sinus	88
Posterior Ethmoid	83	Pituitary Gland	89
Sphenoidal Sinus	84	Cribriform Plate	90
8 How? Operative Procedures: A Step-by-Step Safe and Logical Approach	91		
Infundibulotomy (Uncinectomy) ± Maxillary Sinusotomy (I, II, III)	91	Indications for Infundibulotomy and Maxillary Sinusotomy	92
Terminology and Classification	91	Anatomy	94
		Surgical Technique	96

Alternative Surgical Techniques	101	Alternative Surgical Techniques	148
Useful Instruments	104	Useful Instruments	149
Endoscopic Transnasal Anterior Approach to the Maxillary Sinus Ostium	107	Frontosphenethmoidectomy ±	
Partial Anterior Ethmoidectomy	110	Frontal Sinusotomy (I, II, III) ±	
Terminology and Classification	110	Maxillary Sinusotomy (I, II, III) ±	
Indications	110	Sphenoidal Sinusotomy (I, II, III)	149
Anatomy	110	Terminology and Classification	149
Surgical Technique	111	Indications	150
Alternative Surgical Techniques	114	Sphenoidal Sinusotomy (I, II, III)	154
Frontoethmoidectomy ±		Terminology and Classification	154
Frontal Sinusotomy (I, II, III)	114	Indications	154
Terminology and Classification	114	Anatomy	154
Indications	115	Surgical Technique	154
Anatomy	118	A Comment on the Management of the Middle and Superior Turbinates	155
Surgical Technique	126	Surgical Technique	156
Alternative Surgical Techniques	137	Alternative Surgical Techniques	160
Useful Instruments	138	A Comment on the Management of the Inferior Turbinate	160
Sphenoethmoidectomy ±		Terminology	160
Sphenoidal Sinusotomy (I, II, III)	138	Indications	160
Terminology and Classification	138	Anatomy	161
Indications	139	Surgical Technique	161
Anatomy	139	Comments	162
Surgical Technique	139		

9 An Endoscopic Tour: Endoscopic Examination, Anatomical Variations, and Specific Conditions 166

Outpatient Examination	166	Accessory Ostia of the Maxillary Sinus	
The Endoscopic Tour	167	Posterior to the Uncinate Process	175
Endoscopic Evidence of Mucosal Disease	169	Defect in the Uncinate Process	175
Anatomical Variations	171	An Atlas of Specific Conditions To Help Recognize Variations in Anatomy and Different Pathologic Conditions	176
Agger Nasi Air Cells	171	Allergy	176
Concha Bullosa	171	Infection	176
A Paradoxical Middle Turbinate	172	Inflammatory Diseases	178
A Bifid Middle Turbinate	172	Benign Tumors	178
A Polypoid Anterior End of the Middle Turbinate	173	Malignant Tumors	180
A Paradoxical Uncinate Process	174	Miscellaneous	180
Pneumatized Uncinate Process	174		

10 The Place of Radiology 181

The Role of Radiology	181	When Should MRI be Requested?	186
Conventional Radiology	181	Magnetic Resonance Angiography	191
Cross-sectional CT and Cone-beam CT	181	Digital Subtraction Angiography and Embolization	191
The Role of Computed Tomography	184	Interdisciplinary Cooperation	195
When to Request CT in the Management of Rhinosinusitis	185		

11 Preoperative Checklist	196
Confirm the Diagnosis	196
Reviewing the Effect of Maximum Medical Treatment Helps in Determining Prognosis ..	197
Optimize the Immediate Preoperative Condition	197
Check That Relevant Investigations Have Been Done	198
Allergy Tests	198
Immune Status	198
Hematological Parameters	199
Olfaction	199
Vision	199
Review the Relevant Medical History	200
Preoperative CT Checklist	201
Planning and Staging the Procedure	208
Informed Consent	209
Review Medication That May Affect Anesthesia or Surgery	210
12 Patient Consent and Information	212
How to Communicate the Benefits and Risks of Surgery to the Patient	212
Time Off Work and Advice About Flying	214
Complications	214
Specific Surgical Complications	215
Shortfall in Doctor–Patient Communication ...	216
Psychology and the Surgeon	216
13 Peroperative Aids	217
Anesthesia	217
Local Anesthesia	217
General Anesthesia	218
Operating Room Setup	219
Operating Table	219
Surgeon's Seat	219
Position of the Anesthesiologist	219
Setup for One Surgeon	219
Setup for Two Surgeons	219
Video Stack/Cameras	220
Cables	220
Lighting	220
Radiograph Screen	220
Ancillary Staff	220
Instruments	221
Endoscopes	221
Camera Systems	223
Suckers	224
Curved Olive-ended Suckers	224
Ball Probes	225
Curettes	225
Blakesley Forceps	226
Through-cutting Instruments (Rhinoforce Blakesley/Mackay–Grunewald Forceps)	226
Rhinoforce Stammberger Antrum Punch ("Back-biters")	226
Hajek–Kofler Punch and Kerrison Punches	227
Stammberger Cutting Mushroom Punch	227
Freer Elevator	228
Sickle Knife	228
Belluci and Zurich Microscissors	229
Stammberger Side-biting Punch Forceps	229
Heuwieser Antrum Grasping Forceps	229
Giraffe Forceps (Kuhn–Bolger)	230
Frontal Sinus Punch: Curved Modified Hajek Punches for the Frontal Sinus (Bachert, Hosemann)	230
Powered Instruments	230
Computer-aided Surgery—Navigation Technology	232
Advantages	233
Disadvantages	233
Preoperative Work-up	233
Modeling	233
Positioning of the Patient, Surgeon, and Equipment	233
Registration	233
Methods of Localization	234
Display of Images	235
Accuracy	235
Operating Time	235
Economic Factors	235
Teaching	236
Real-time Computer-aided Surgery	236
Laser	236
Balloon	237
Future Perspectives	237
Imaging	237

14 Hints	239
In the Operating Room	239
Before Starting the Operation	239
Anesthesiologist's Goals	239
Hints to Reduce Bleeding	239
Preparation	240
Surgical Hints	240
Objectives of the Operation	241
15 Preventing and Dealing with Complications	242
Peroperative Complications	242
Bleeding	242
Fat Herniation and Violation of the Orbit	245
Cerebrospinal Fluid Leak	250
Retro-orbital Hemorrhage	252
Medial Rectus Damage	254
Optic Nerve Lesion	255
Postoperative Complications	255
Bleeding	255
Adhesions	256
Epiphora	256
Periorbital Emphysema	256
Anosmia	256
Frontal Recess Stenosis	257
Crusting	258
Infection	258
Osteitis	258
Neuropathic Pain	258
16 Postoperative Management	260
Patient Communication	260
Patients Vary	260

Orbital Decompression	304
Terminology and Classification	304
Indications	306
Surgical Anatomy	306

Surgical Technique	308	Mucoceles	344
Useful Instruments	310	Inverted Papilloma	346
Optic Nerve Decompression	310	Osteoma	348
Terminology and Classification	310	Hemangioma	348
Indications	310	Angiofibroma	350
Surgical Anatomy	311	Schwannoma	355
Surgical Technique	311	Chordoma	355
Useful Instruments	312	Chondroma	356
Choanal Atresia Surgery	312	Langerhans Cell Histiocytosis	356
Terminology and Classification	312	Pleomorphic Adenoma	356
Indications	312	Other Benign Pathological Lesions	356
Surgical Anatomy	312	Lesions of the Cribiform Plate and Fovea	
Surgical Technique	312	Ethmoidalis	361
Alternative Surgical Techniques	314	Frontal Sinus	361
Useful Instruments	314	Ethmoidal Complex, Lateral Nasal Wall, and	
Medial Maxillectomy	315	Orbit	361
Terminology and Classification	315	Maxillary Sinus	362
Indications	315	Pterygopalatine Fossa	362
Surgical Anatomy	317	Sphenoidal Sinus, Clivus, and Cavernous	
Surgical Technique	317	Sinus	363
Alternative Techniques	323	Access for Biopsies	364
Useful Instruments	327	Postoperative Monitoring	364
Management of Cerebrospinal Fluid Leaks ..	327	Surgical Technique	366
Terminology and Classification	327	Endoscopic Resection of Malignant Anterior	
Indications	328	Skull Base Tumors	366
Surgical Anatomy	328	Alternative Techniques	372
Diagnosis	330	Combined Craniofacial and Endoscopic	
Surgical Technique	333	Resection	372
Comment	339	Olfactory Neuroblastoma	372
Modifications and Alternatives	339	Malignant Melanoma	374
Management of Encephaloceles	340	Plasmacytoma	374
Terminology and Classification	340	Recurrent or Residual Malignant Disease ..	375
Indications	340	Epistaxis	375
Surgical Anatomy	341	Preoperative Embolization	376
Surgical Technique	341	Juvenile Nasopharyngeal Angiofibroma ..	376
Alternative Surgical Techniques	342	Tumor Hemorrhage	376
General Principles	344	Postfunctional Endoscopic Sinus Surgery ..	377
Specific Conditions	344	Complications of Embolization	377

18 The Endoscopically Assisted Bimanual Operating Technique

378

From Basic Endoscopic Sinus Surgery to			
More Extended and Advanced Skull Base			
Surgery	378	Training	382
Advantages of the Endoscopically Assisted			
Bimanual Operating Technique	380	Theater Setup and Technical Aspects	382
Operating with Both Hands	380	Operating Theater Setup	382
Suction Tip Stays in the Operative Field:			
Fewer Instrument Changes	380	Practical Hints	383
Optimum Exposure	381	Ergonomic Handling of the Endoscope	383
Holding and Cutting	381	Stabilizing the Endoscope in the Nasal	
Teamwork	381	Vestibule	384
		Cleaning the Endoscope	384
		Holding and Cutting	384
		Retraction of Structures and Tissue	384
		Drilling and Suction	385

Coagulation and Suction	385	Modifications of the Standard “One-nose” Approach	386
Navigation and Drilling	385		
19 Transnasal Endoscopic Approaches to the Skull Base 388			
Surgical Anatomy	388	Transseptal/Transnasal (Bi-nose) Approach for the Sphenoidal Sinus	390
Anterior Cranial Fossa	388	Transsphenoidal	391
Clivus	388	Transcribriform	394
Pterygopalatine Fossa	389	Transmaxillary/Transpterygoid/	
Operative Technique	389	Infratemporal	396
Instrumentation	389	Approaches to the Cavernous Sinus	399
Transnasal Surgical Approaches to the Skull Base	390		
20 Interdisciplinary Teamwork in Transnasal Endoscopic Skull Base Surgery 400			
Preoperative Planning	401	Rhino-/Neurosurgical Instrumentation	403
Operating Theater and Patient Preparation ..	401	Surgical Technique—General Hints	404
The Role of Navigation and Intraoperative Imaging	403	Postoperative Care	408
21 Transnasal Endoscopic Surgery of Pituitary Tumors 409			
Planning for Pituitary Surgery	409	Removal of Pituitary Tumors—General Hints	416
Transnasal Approaches to the Pituitary Gland	409	Sella Reconstruction and Closure	418
Uni-nose Approaches	409	Postoperative Care	419
Bi-nose Approaches	415		
22 Transorbital Surgery of the Skull Base 424			
Important Incisions and Approaches	425	Associated Techniques	428
Medial Orbit: Precaruncular	425	Repair of Cerebrospinal Fluid Leak	428
Inferior Orbit: Lower Lid Preseptal		Access to the Frontal Sinus	429
Transconjunctival	427	Orbital and Optic Nerve Decompression	431
Lateral Orbit: Lateral Retrocanthal	427	Useful Equipment and Setup	431
Superior Orbit: Superior Lid Crease/			
Blepharoplasty	427		
23 Evidence Base in Rhinosinusitis and Endoscopic Sinus Surgery 432			
Diagnosis	432	Acute Sinusitis	432
Medical Treatment	432	Chronic Bacterial Rhinosinusitis	433

Fungal Rhinosinusitis	434	The Effect of Type I Hypersensitivity or IgE-mediated Disease	436
Chronic Rhinosinusitis Without Nasal Polypsis	434	Cystic Fibrosis	436
Chronic Rhinosinusitis with Nasal Polypsis ..	434	Ciliary Dyskinesia and Immunodeficiencies ..	437
Surgical Treatment	435	Recalcitrant Chronic Rhinosinusitis	437
The Extent of Surgery	436	Allergic and Nonallergic Rhinitis	437

Appendix: Information for Patients Undergoing Endoscopic Sinus Surgery 438

Endoscopic Sinus Surgery	438	Associated Causes	443
What is Endoscopic Sinus Surgery?	438	Symptoms	443
What Can I Expect When I Have This Operation?	438	Management	443
What Complications Can Occur?	438	Complications	443
Douching	440	Nasal Polyps	444
Pharyngeal/Laryngeal Hypersensitivity	440	Conditions Associated with Nasal Polyps	444
What is This?	440	Symptoms and Signs	444
Regimen to Break the Cycle	440	Unilateral (One-sided) Polyps	444
Nasal Allergy	441	Investigations	444
What is an Allergen?	441	Treatment	444
Intermittent Allergy	441	Advice for Patients after Endoscopic Surgery for Nasal Polyps	444
Persistent Allergy	441	The Complications of Endoscopic Surgery for Nasal Polyps	445
Diagnosis	441	“Telephone Consultations”	445
Treatment	441		
Sinus Infection	443
