

1	Nuclear Radiation, Ionization, and Radioactivity	1
1.1	Introduction	2
1.2	Ionizing Radiation and Consequences	3
1.3	Visual Demonstration of Radiation	4
1.4	Definition	5
1.5	Sources of Nuclear Radiation	15
1.6	Attenuation Coefficient of γ -Rays	21
1.7	Half-Value Layer	22
1.8	Neutrons	23
1.9	Neutron Scattering	25
1.10	The Cross-Section Concept	27
1.11	Thermal Neutrons	27
1.12	Neutron Sources	28
1.13	Neutron Shielding	28
1.14	X-Rays	29
1.15	Interactions of X-Rays	37
1.16	Photoelectric Effect	40
1.17	Pair Production	41
1.18	Use of Natural Forces for the Material Improvement of Mankind	43
1.19	Radionuclides	44
1.20	Production of Radionuclides	44
1.21	Developments and Uses of Radionuclides	47
1.22	Summary	51
	References	52
2	Radiation Exposure: Consequences, Detection, and Measurements	59
2.1	Introduction	60
2.2	Sources of Radiation Exposure	60
2.3	Biological and Related Effects of Radiation	61
2.4	Effects of Radiation on Consumable Products	67
2.5	Effects of Radiation	68
2.6	Detection of Radiation	73

2.7	Neutron Detection	75
2.8	Boron Reaction	77
2.9	Lithium Reaction	78
2.10	Instrumentation	78
2.11	Photomultiplier	87
2.12	Modes of Detector Operation	90
2.13	Recording and Measurement Techniques	95
2.14	Statistical Fluctuations in Nuclear Process	115
2.15	Chi-Square Distribution	123
2.16	Pros and Cons of Radiation Energy	125
2.17	Summary	126
	References	126
3	Mathematical Modeling of Radiation	135
3.1	Introduction	135
3.2	Trapping and De-trapping	137
3.3	Polarization	141
3.4	Electrode Design	143
3.5	Frisch Grid Design	146
3.6	Coplanar Design	150
3.7	Pixelated Design	153
3.8	Digital Radiation Detector	157
3.9	Direct Conversion Efficiency	162
3.10	Measurement of Alpha, Beta, and Gamma Radiation	166
3.11	Noise in a Radiation Detector	168
3.12	Noise and Its Effect on Medical Imaging	175
3.13	Dead Time	177
	References	180
4	Medical Imaging	187
4.1	Introduction	188
4.2	Radiation and Carcinogen	189
4.3	Molecular (Medical) Imaging	191
4.4	More Advanced Technology for Medical Imaging	195
4.5	Advanced Tools (Instruments) for Medical (Molecular) Imaging	197
4.6	X-Ray Computed Tomography (CT)	209
4.7	Nuclear Medicine Imaging	213
4.8	Image Acquisition	215
4.9	Imaging Technology	227
4.10	Dependency of the Quality of the Medical Imaging System	236
4.11	Energy Resolution	242
4.12	Digital Image Acquisition System	244
4.13	Summary	246
	References	247
