

Table of Contents

Invited Talks

Beluga: Programming with Dependent Types, Contextual Data, and Contexts	1
<i>Brigitte Pientka</i>	
Using Static Analysis to Detect Type Errors and Concurrency Defects in Erlang Programs	13
<i>Konstantinos Sagonas</i>	
Solving Constraint Satisfaction Problems with SAT Technology	19
<i>Naoyuki Tamura, Tomoya Tanjo, and Mutsunori Banbara</i>	

Refereed Papers

Types

A Church-Style Intermediate Language for $\mathbf{ML}^F$	24
<i>Didier Rémy and Boris Yakobowski</i>	
$\Pi\Sigma$: Dependent Types without the Sugar	40
<i>Thorsten Altenkirch, Nils Anders Danielsson, Andres Löb, and Nicolas Oury</i>	
Haskell Type Constraints Unleashed	56
<i>Dominic Orchard and Tom Schrijvers</i>	

Program Analysis and Transformation

A Functional Framework for Result Checking	72
<i>Gilles Barthe, Pablo Buiras, and César Kunz</i>	
Tag-Free Combinators for Binding-Time Polymorphic Program Generation	87
<i>Peter Thiemann and Martin Sulzmann</i>	
Code Generation via Higher-Order Rewrite Systems	103
<i>Florian Haftmann and Tobias Nipkow</i>	

Foundations

A Complete Axiomatization of Strict Equality	118
<i>Javier Álvarez and Francisco J. López-Fraguas</i>	

Standardization and Böhm Trees for $\lambda\mu$ -Calculus	134
<i>Alexis Saurin</i>	

An Integrated Distance for Atoms	150
<i>Vicent Estruch, César Ferri, José Hernández-Orallo, and M. José Ramírez-Quintana</i>	

Logic Programming

A Pearl on SAT Solving in Prolog	165
<i>Jacob M. Howe and Andy King</i>	

Automatically Generating Counterexamples to Naive Free Theorems ...	175
<i>Daniel Seidel and Janis Voigtländer</i>	

Applying Constraint Logic Programming to SQL Test Case Generation	191
<i>Rafael Caballero, Yolanda García-Ruiz, and Fernando Sáenz-Pérez</i>	

Evaluation and Normalization

Internal Normalization, Compilation and Decompileation for System $\mathcal{F}_{\beta\eta}$	207
<i>Stefano Berardi and Makoto Tatsuta</i>	

Towards Normalization by Evaluation for the $\beta\eta$ -Calculus of Constructions	224
<i>Andreas Abel</i>	

Defunctionalized Interpreters for Call-by-Need Evaluation	240
<i>Olivier Danvy, Kevin Millikin, Johan Munk, and Ian Zerny</i>	

Term Rewriting

Complexity Analysis by Graph Rewriting	257
<i>Martin Avanzini and Georg Moser</i>	

Least Upper Bounds on the Size of Church-Rosser Diagrams in Term Rewriting and λ -Calculus	272
<i>Jeroen Ketema and Jakob Grue Simonsen</i>	

Proving Injectivity of Functions via Program Inversion in Term Rewriting	288
<i>Naoki Nishida and Masahiko Sakai</i>	

Parallelism and Control

Delimited Control in OCaml, Abstractly and Concretely: System Description.....	304
<i>Oleg Kiselyov</i>	
Automatic Parallelization of Recursive Functions Using Quantifier Elimination	321
<i>Akimasa Morihata and Kiminori Matsuzaki</i>	
A Skeleton for Distributed Work Pools in Eden	337
<i>Mischa Dieterle, Jost Berthold, and Rita Loogen</i>	
Author Index	355
