1	Introduction	1
2	Multiple Impacts in Granular Chains	11
2.1	Dynamics of a Chain of Aligned Balls	11
2.1.1	Lagrangian Dynamics	12
2.1.2	Impact Equation	13
2.1.3	Dissipation and Dispersion of Energy	16
2.2	Impact Geometry of a 3-Ball Chain	19
2.2.1	$C_{KE,max}$ and $C_{KE,min}$	21
2.2.2	Characterization of the Impact Geometry	26
3	Rigid-Body Multiple Impact Laws	31
3.1	Newton and Poisson Restitution Laws	31
3.1.1	Newton's Restitution Law	32
3.1.2	Poisson's Restitution Law	34
3.1.3	Pfeiffer-Glocker's Extension of Poisson's Law	38
3.2	Moreau's Impact Law	39
3.3	Frémond's Approach	45
3.4	Binary Collision Model	52
3.5	Han and Gilmore's Algorithm	58
3.6	Generalized Kinematic Laws	59
3.6.1	Generalized Kinematic Law (Kinetic Metric Based)	59
3.6.2	Glocker's Kinematic Matrix	63
3.7	Hurmuzlu's Impulse Correlation Ratio	67
4	LZB Multiple Impact Model	71
4.1	Compliance Modeling in Chains of Balls	71
4.2	Theoretical Outlines	73
4.2.1	Darboux-Keller Shock Dynamics	74

4.2.2	Bi-stiffness Contact Model	76
4.2.3	Distributing Law	80
4.2.4	Case with Precompression or with Multiple Compression/Expansion Cycles	82
4.2.5	Impact Termination	82
4.2.6	Summary	83
4.2.7	Another Formulation	84
4.2.8	Numerical Integration	86
4.2.9	Numerical Results	87
4.3	Coupling of the LZB Model to an Event-Driven Simulation Scheme	96
4.3.1	Smooth Dynamics	97
4.3.2	Nonsmooth Dynamics	99
4.3.3	Algorithm for the Event-Driven Scheme	99
4.3.4	Numerical Results	99
4.4	Recapitulations	102
4.5	Multiple Impact Laws Including Coulomb's Friction	106
5	Analysis and Validation of the LZB Model	109
5.1	Analysis of the LZB Model	109
5.1.1	Outcome Domain When Varying $e_{s,1}$ and $e_{s,2}$	109
5.1.2	Outcome Domain When Varying $e_{s,1} = e_{s,2} = e$ and K_2/K_1	110
5.1.3	Outcome Domain When Varying $e_{s,1} = e_{s,2} = e$ and η	112
5.1.4	Motion Patterns When Varying the Mass Ratios m_2/m_1 and m_2/m_3	117
5.2	Validation by Experimental Results	120
5.2.1	Numerical Tests on Tapered Chains	120
5.2.2	Numerical Tests on Stepped Chains	139
5.2.3	Interaction of Two Solitary Waves in Monodisperse Chains	142
5.3	Dissipation and Dispersion of Energy	149
5.3.1	Dissipative Monodisperse Chains	149
5.3.2	Tapered Chains	150
5.3.3	Decorated Chains	153
5.4	Other Features of Granular Chains	154
6	Comparisons between Different Multiple-impact Laws...	159
6.1	Introduction	159
6.2	Elastic Case	160
6.2.1	Varying the Elasticity Coefficients η_1 and η_2	160
6.2.2	Varying the Stiffness Ratio K_2/K_1	165
6.2.3	Varying the Mass Distribution	172
6.3	Dissipative Case	184

6.3.1	Case 1: $e_{s,1} = e_{s,2} = e_s$	185
6.3.2	Case 2: $e_{s,1} \neq e_{s,2}$	189
