

Part I Mathematical Models

1	A Point of Departure	3
1.1	Elastic Pendulum	4
1.1.1	Small Elastic Displacement	5
1.1.2	Floating Reference Frame	6
1.1.3	Galerkin Projection	7
1.1.4	Time Integration	8
1.2	Objectives	8
1.2.1	Treatment of Constraints	9
1.2.2	Discretization in Space and Time	10
1.3	Overview	10
2	Rigid Multibody Dynamics	13
2.1	Equations of Motion	13
2.1.1	Kinematics	14
2.1.2	Dynamics	16
2.1.3	Relation to Hamiltonian Systems	20
2.1.4	Remarks	20
2.2	Examples	21
2.2.1	Slider Crank	21
2.2.2	Newton–Euler Equations	23
2.2.3	Wheel Suspension	26
2.3	Differential-Algebraic Equations	28
2.3.1	Basic Types of DAEs	28
2.3.2	The Index	30
2.3.3	Constraint Manifold and Local State Space Form	35
2.3.4	Solution Invariants versus Constraints	36
2.3.5	Differential-Algebraic Equations in Saddle Point Form	38
2.3.6	Remarks and Further References	39

2.4	Analysis of the Equations of Constrained Mechanical Motion . . .	39
2.4.1	Index and Existence of Solutions	40
2.4.2	Minimax Characterization of Constraints	42
2.4.3	Influence of Perturbations	43
2.4.4	Alternative Formulations	44
2.4.5	Remarks	51
3	Elastic Motion	53
3.1	Basic Equations of an Elastic Body	53
3.1.1	Variational Formulation	53
3.1.2	Equations of Motion	58
3.1.3	Smoothness and Appropriate Function Spaces	59
3.1.4	The Trace Space	64
3.2	Constraints in Linear Elasticity	67
3.2.1	Variational Formulation	68
3.2.2	Appropriate Function Spaces	69
3.3	Mathematical Analysis	70
3.3.1	Existence of Solutions	71
3.3.2	Influence of Perturbations	76
3.3.3	Remarks	79
3.4	Related Mathematical Models	80
3.4.1	Domain Decomposition	80
3.4.2	Dynamic Contact	82
3.4.3	Incompressible Elastic Body	84
4	Flexible Multibody Dynamics	87
4.1	Floating Reference Frame	87
4.1.1	Variational Formulation	88
4.1.2	Equations of Unconstrained Motion	90
4.1.3	Extensions and Special Cases	93
4.2	Constraints	97
4.2.1	Weak Form of Equations of Constrained Motion	97
4.2.2	Modeling Joints	99
4.2.3	Remarks	103
4.3	Flexible Multibody System	104
4.3.1	Variational Formulation	104
4.3.2	Equations of Motion	106
4.4	Special Bodies	109
4.4.1	Plane Strain and Plane Stress	109
4.4.2	Beam Model	110
4.5	Examples	112
4.5.1	Slider Crank	112
4.5.2	Truck Model	115
4.5.3	Pantograph and Catenary	117
4.6	Summary of Key Formulas in Part I	120

Part II Numerical Methods

5 Spatial Discretization 125

5.1 Finite Element Approximation of Elastic Body 125

5.1.1 Unconstrained Equations 126

5.1.2 Constrained Equations of Motion 129

5.1.3 Remarks 138

5.2 Spatial Discretization of Flexible Multibody System 139

5.2.1 Galerkin Projection for Floating Reference Frame 139

5.2.2 Flexible Multibody System 143

5.2.3 Model Reduction 146

5.3 Examples 150

5.3.1 Slider Crank with Elastic Connecting Rod 150

5.3.2 Loading Area of Planar Truck Model 153

5.3.3 Pantograph and Catenary 156

6 Stiff Mechanical System 159

6.1 Elastic Pendulum Revisited 160

6.2 General Framework 161

6.3 State Space Form 163

6.3.1 Asymptotic Expansion 163

6.3.2 Elastic Pendulum 167

6.3.3 Remarks 168

6.4 The Differential-Algebraic Case 169

6.4.1 Structure-Preserving Local Parametrization 170

6.4.2 Computational Method 172

7 Time Integration Methods 173

7.1 Overview on Time Integration Methods 173

7.1.1 Alternative Formulations of the Equations of Motion 174

7.1.2 Basic Discretization Schemes 175

7.2 BDF and Implicit Runge–Kutta Methods 180

7.2.1 Backward Differentiation Formulas 180

7.2.2 Error Analysis 182

7.2.3 Implicit Runge–Kutta Methods of Collocation Type 186

7.2.4 Application to Differential-Algebraic Equations 188

7.2.5 Solving Constrained Mechanical Systems in Practice 190

7.3 Order Reduction for Stiff Mechanical Systems 193

7.3.1 Beam under Point Load 193

7.3.2 A Model Problem 195

7.3.3 Runge–Kutta Methods 196

7.3.4 Rosenbrock–Wanner Methods 202

7.3.5 BDF Methods 206

7.3.6 A Nonlinear Test Equation 207

7.3.7 Remarks 208

7.4	Special Integration Methods	208
7.4.1	Generalized- α Method	209
7.4.2	A Variant of the Implicit Midpoint Rule	212
8	Numerical Case Studies	217
8.1	Slider Crank I	217
8.2	Slider Crank II	222
8.3	Pantograph and Catenary	228
8.4	Planar Truck Model	230
8.5	3D Trailer Frame	233
	References	239
	Index	247
