Chapter 1	Endoscopy of the Stomach	1
	History and Instrument Development	1
	Available Instruments	5
	Summary	10
	References	10
Chapter 2	Endoscopic Methods in Cancer Diagnosis	12
	Routine Examination	12
	Radiological and Gastrocamera Survey	12
	Endoscopic Evaluation of Symptomatic Individuals	14
	Gastroscopic Photography	15
	Gastroscopic Biopsy	17
	Summary	19
	References	20
Chapter 3	Specific Pathological Conditions Related to Gastric Cancer: Gastroscopic Diagnosis in Benign and Malignant Disease	22
	Gastric Ulcer	23
	Gastritis and Gastropathies	28
	Adenomas and Benign Polypoid Tumors	31
	Carcinoma	35
	Lymphoma	38
	Summary	42
	References	43
Chapter 4	Endoscopy in Specific Clinical Situations	66
	Repeated Negative Radiological Examinations in the Face of Organic Symptoms	66
	Equivocal Radiologic Findings with or without Symptoms	67
	Determination of Extent of Carcinomatous Involvement	68
	Histologic Proof of Malignant Neoplasia in Poor Risk or Inoperable Patient Prior to Radiation or Chemotherapy	69
	Assessment of Results of Chemotherapy	70
	Evaluation of Gastrointestinal Symptoms during Course of Known Cancer elsewhere	71
	Pyloric Obstruction	72
	Summary	73
	References	73

<i>Chapter 5</i>	The Future Relationship of Endoscopy to Gastric Cancer	80
	Future Instrument Development	81
	Improvement in Procedure	81
	Expanded Training for Endoscopists	82
	Improved Orientation of the Physician Public	84
	The Gastrosopic Contribution to Improvement in Morbidity and Mortality in Gastric Cancer	84
	Summary	85
	References	85
