

Contents

Introduction and general anatomy _____	1	General anatomy of angiology (angiologia) _____	29
H.-G. Liebich, G. Forstenpointner, W. Pérez and H.E. König		Organisation of the cardiovascular system _____	32
History of veterinary anatomy _____	1	Heart (cor) _____	33
Directional terms and planes of the animal body _	6	Pulmonary and systemic circulation _____	33
Division of the animal body in organs and organ systems _____	6	Portal circulation _____	34
Locomotor apparatus (apparatus locomotorius) _____	8	Peripheral circulation _____	34
Skeletal system (systema skeletale) _____	8	Collateral arteries, terminal arteries and rete mirabile _____	34
Osteology (osteologia) _____	8	Anastomoses, barrier arteries and sphincter veins _	34
Skeletal design _____	8	Vessels (vasa) _____	34
Forms of bony tissues _____	9	Structure of the blood vessels (vasa sanguinea) _____	34
Architecture of bone _____	10	Arteries (arteriae) _____	35
Endosteum, periosteum _____	11	Arterioles _____	36
Bone regeneration _____	12	Blood capillaries (vasa capillaria) _____	36
Supply of blood vessels and nerves to the bone _____	12	Venules _____	36
Bone as an organ _____	13	Veins (venae) _____	37
Osteogenesis _____	13	Lymphatic system (systema lymphaticum) _____	38
Ossification _____	14	Lymphatic organs _____	38
Types of bone tissues _____	16	Functions of the lymphatic system _____	38
Bone functions _____	17	Architecture of the lymphatic vessels (vasa lymphatica) _____	39
Arthrology (arthrologia) _____	17	General anatomy of the nervous system (systema nervosum) _____	39
Synarthroses _____	20	Functions of the nervous system _____	40
True joints (articulationes synoviales) _____	20	Architecture and structure of the nervous system _____	40
Muscular system (systema musculare) _____	23	Nerve tissue (textus nervosus) _____	40
Myology (myologia) _____	23	Neurons _____	41
Development, degeneration, regeneration and adaptation of muscle fibres _____	24	Glial cells (gliocytes, neuroglia) _____	41
Architecture of skeletal musculature and the tendons _____	25	Central nervous system (systema nervosum centrale, CNS) _____	41
Forms of muscles _____	27	Grey matter (substantia grisea) _____	42
Locomotion _____	27	White matter (substantia alba) _____	43
Accessory structures of muscles _____	28	Peripheral nervous system (systema nervosum periphericum, PNS) _____	43
Functions of the synovial membrane _____	29	Nerves (nervi, neurons) _____	43
		Motor and sensory roots _____	43
		Ganglions (ganglia) _____	43
		Somatic (voluntary) nervous system _____	44
		Vegetative (autonomic) nervous system _____	45
		Nerve transmission of information _____	45
		Synapses _____	45
		Barriers in the nervous system _____	47

General anatomy of the viscera	47	Vertebral column or spine (columna vertebralis)	89
Visceral mucosa	47	Cervical vertebrae (vertebrae cervicales)	91
Epithelium	47	Thoracic vertebrae (vertebrae thoracicae)	94
Connective tissue layer of the epithelium	48	Lumbar vertebrae (vertebrae lumbales)	97
Muscle layer of the epithelium	49	Sacral vertebrae (vertebrae sacrales)	100
Visceral connective tissue	49	Caudal or coccygeal vertebrae (vertebrae caudales)	105
Visceral motility	50		
Body cavities and their serous lining	50	Thoracic skeleton (skeleton thoracis)	105
		Ribs (costae)	105
		Sternum	108
1 Axial skeleton (skeleton axiale)	53		
H.-G. Liebich and H.E. König		Joints of the skull and trunk (suturae capitis, articulationes columnae vertebralis et thoracis)	108
Skull	53	Joints of the skull (synchondroses cranii)	108
Vertebral column or spine	53	Joints of the vertebral column, the thorax and the skull (articulationes columnae vertebralis, thoracis et cranii)	109
Thorax	54	Intervertebral articulations (articulationes columnae vertebralis)	111
		Ligaments of the vertebral column	112
Skeleton of the head	54	Articulations of the ribs with the vertebral column (articulationes costovertebrales)	115
Skull, neural part (cranium, neurocranium)	54	Joints of the thoracic wall (articulationes thoracis)	115
Occipital bone (os occipitale)	55	The vertebral column as a whole	116
Sphenoid bone (os sphenoidale)	58		
Presphenoid (os praesphenoidale)	58		
Basisphenoid (os basisphenoidale)	59		
Temporal bone (os temporale)	59		
Frontal bone (os frontale)	61		
Parietal bone (os parietale)	62		
Interparietal bone (os interparietale)	63		
Ethmoid bone (os ethmoidale)	63		
Skull, facial part (facies, viscerocranium)	64		
Nasal bone (os nasale)	65		
Lacrimal bone (os lacrimale)	65		
Zygomatic bone (os zygomaticum)	67		
Maxilla	67		
Incisive bone (os incisivum)	69		
Palatine bone (os palatinum)	70		
Vomer	71		
Pterygoid bone (os pterygoideum)	71		
Mandible (mandibula)	71		
Hyoid bone, hyoid apparatus (os hyoideum, apparatus hyoideus)	73		
Paranasal sinuses (sinus paranasales)	74		
The skull as a whole	75		
The skull of carnivores	75		
Hyoid bone (os hyoideum)	80		
Cavities of the skull of carnivores	80		
Cranial cavity (cavum cranii)	80		
Nasal cavity (cavum nasi)	81		
Paranasal sinuses (sinus paranasales)	82		
The skull of the horse	82		
Hyoid bone (os hyoideum)	87		
Cavities of the equine skull	88		
Cranial cavity (cavum cranii)	88		
Nasal cavity (cavum nasi)	88		
Paranasal sinuses (sinus paranasales)	89		
		2 Fasciae and muscles of the head, neck and trunk	117
		H.-G. Liebich, J. Maierl and H.E. König	
		Fasciae	117
		Superficial fasciae of the head, neck and trunk	117
		Deep fasciae of the head, neck and trunk	117
		Cutaneous muscles (musculi cutanei)	118
		Cutaneous muscles of the head (musculi cutanei capitis)	118
		Cutaneous muscles of the neck (musculi cutanei colli)	118
		Cutaneous muscles of the trunk (musculi cutanei trunci)	119
		Muscles of the head (musculi capitis)	119
		Facial muscles (musculi faciales)	119
		Muscles of the lips and cheeks (musculi labiorum et buccarum)	119
		Muscles of the nose (musculi nasi)	123
		Extraorbital muscles of the eyelids (musculi extraorbitales)	124
		Muscles of the external ear (musculi auriculares)	124
		Mandibular muscles	125
		Muscles of mastication	125
		Superficial muscles of the mandibular space	128
		Specific muscles of the head	129

Muscles of the trunk (musculi trunci) _____	130
Muscles of the neck (musculi colli) _____	131
Muscles of the back (musculi dorsi) _____	135
Long muscles of the neck and back _____	136
Short muscles of the neck and back _____	140
Muscles of the thoracic wall (musculi thoracis) _____	141
Respiratory muscles _____	141
Muscles of the abdominal wall (musculi abdominis) _____	144
Rectus sheath (vagina m. recti abdominis) _____	147
Inguinal canal (canalis inguinalis) _____	147
Muscles of the tail (musculi caudae) _____	148

3 Forelimbs or thoracic limbs (membra thoracica) _____ 151

H.-G. Liebich, J. Maierl and H.E. König

Skeleton of the thoracic limb (ossa membri thoracici) _____	151
Pectoral girdle (cingulum membri thoracici) _____	151
Shoulder blade (scapula) _____	151
Skeleton of the arm (brachium) _____	155
Skeleton of the forearm (skeleton antebrachii) _____	158
Radius _____	159
Ulna _____	161
Skeleton of the manus (skeleton manus) _____	162
Carpal bones (ossa carpi) _____	162
Metacarpal bones (ossa metacarpalia) _____	163
Digital skeleton (ossa digitorum manus) _____	164
Skeleton of the manus (forepaw) in carnivores _____	164
Carpal bones (ossa carpi) _____	164
Metacarpal bones (ossa metacarpalia) _____	164
Digital skeleton (ossa digitorum manus) _____	165
Skeleton of the manus in the horse _____	166
Carpal bones (ossa carpi) _____	166
Metacarpal bones (ossa metacarpalia) _____	166
Digital skeleton (ossa digitorum manus) _____	169

Joints of the thoracic limb (articulationes membri thoracici) _____	170
Articulation of the thoracic limb to the trunk _____	170
Shoulder or humeral joint (articulatio humeri) _____	170
Elbow joint (articulatio cubiti) _____	173
Radioulnar articulations (articulatio radioulnaris proximalis et articulatio radioulnaris distalis) _____	174
Articulations of the manus (articulationes manus) _____	175
Carpal joints (articulationes carpeae) _____	175
Intermetacarpal joints (articulationes intermetacarpeae) _____	179
Phalangeal joints _____	179
Phalangeal joints of the carnivores _____	180
Metacarpophalangeal joints _____	180
Proximal interphalangeal joints _____	180
Distal interphalangeal joints _____	180
Interdigital ligaments _____	180

Phalangeal joints of the ruminants _____	180
Metacarpophalangeal joints or fetlock joints _____	180
Proximal interphalangeal joints or pastern joints _____	182
Distal interphalangeal joints or coffin joints _____	183
Support of the dewclaws _____	184
Phalangeal joints of the horse _____	184
Metacarpophalangeal joint or fetlock joint _____	184
Proximal interphalangeal joint or pastern joint _____	186
Distal interphalangeal joint or coffin joint _____	187
Ligaments of the cartilages of the distal phalanx _____	190

Muscles of the thoracic limb (musculi membri thoracici) _____	190
Deep fasciae of the thoracic limb _____	190
Girdle or extrinsic musculature of the thoracic limb _____	190
Superficial layer of the extrinsic musculature of the thoracic limb _____	190
Deep layer of the extrinsic musculature of the thoracic limb _____	193
Intrinsic musculature of the thoracic limb _____	196
Muscles of the shoulder joint _____	196
Lateral shoulder muscles _____	197
Medial shoulder muscles _____	199
Muscles of the elbow joint _____	200
Muscles of the radioulnar joints _____	202
Muscles of the carpal joint _____	203
Muscles of the digits _____	205
Short digital muscles _____	220
Special muscles of the digits of carnivores _____	222

4 Hindlimbs or pelvic limbs (membra pelvina) _____ 223

H.-G. Liebich, H.E. König and J. Maierl

Skeleton of the pelvic limb (ossa membri pelvini) _____	223
Pelvic girdle (cingulum membri pelvini) _____	223
Ilium (os ilium) _____	223
Pubis (os pubis) _____	227
Ischium (os ischii) _____	227
Acetabulum _____	228
Pelvis _____	229
Pelvic cavity _____	231
Skeleton of the thigh (skeleton femoris) _____	232
Kneecap (patella) _____	236
Skeleton of the leg (skeleton cruris) _____	237
Tibia _____	238
Fibula _____	239
Skeleton of the hindfoot (skeleton pedis) _____	239
Tarsal bones (ossa tarsi) _____	239
Talus (os tarsi tibiale) _____	242
Calcaneus (os tarsi fibulare) _____	242
Metatarsal and digital skeleton (ossa metatarsalia et ossa digiti pedis) _____	244

Joints of the pelvic limb (articulationes membri pelvini) _____	245	Abdominal and pelvic cavity (cavum abdominalis et pelvis) _____	299
Sacroiliac joint (articulatio sacroiliaca) _____	245	Peritoneal cavity (cavum peritonei) _____	301
Coxofemoral or hip joint (articulatio coxae) _____	246	Pelvic cavity (cavum pelvis) _____	303
Stifle joint (articulatio genus) _____	248		
Femorotibial joint (articulatio femorotibialis) _____	248		
Femoropatellar joint (articulatio femoropatellaris) _____	250		
Tibiofibular joints _____	254		
Pedal joints (articulationes pedis) _____	254		
Tarsal joint or hock (articulatio tarsi) _____	254		
Metatarsal and phalangeal joints _____	259		
Muscles of the pelvic limb (musculi membri pelvini) _____	259	7 Digestive system (apparatus digestorius) _____	307
Fasciae of the pelvis and the pelvic limb _____	259	H.E. König, P. Sótónyi, J. Ruberte and H.-G. Liebich	
Girdle or extrinsic musculature of the pelvic limb _____	259		
Intrinsic musculature of the pelvic limb _____	264		
Rump muscles _____	265		
Caudal muscles of the thigh _____	267		
Medial muscles of the thigh _____	270		
Inner pelvic muscles _____	272		
Muscles of the stifle _____	276		
Muscles of the crus _____	278		
Craniolateral muscles of the crus _____	279		
Caudal muscles of the crus _____	284		
Short digital muscles _____	288		
5 Statics and dynamics _____	289	Mouth and pharynx _____	307
J. Maierl, G. Weissengruber, Chr. Peham and H.E. König		Oral cavity (cavum oris) _____	307
		Palate (palatum) _____	308
		Tongue (lingua, glossa) _____	309
		Sublingual floor of the oral cavity _____	313
		Salivary glands (glandulae salivariae) _____	314
		Parotid salivary gland (glandula parotis) _____	315
		Mandibular salivary gland (glandula mandibularis) _____	315
		Sublingual salivary glands (glandulae sublinguales) _____	316
		Masticatory apparatus _____	316
		Teeth (dentes) _____	316
		Structure of the teeth _____	316
		Dentition of the horse _____	320
		Dentition of the cat _____	323
		Dentition of the dog _____	323
		Dentition of the pig _____	325
		Dentition of the ox _____	325
		Temporomandibular joint (articulatio temporomandibularis) _____	327
		Muscles of mastication _____	327
		Pharynx (cavum pharyngis) _____	327
		Deglutition (swallowing) _____	329
		Lymphatic structures of the pharynx (tonsils) _____	329
		Muscles of the hyoid apparatus _____	330
		Upper muscles of the hyoid apparatus _____	330
		Lower muscles of the hyoid apparatus _____	331
Architecture of the trunk _____	289	Cranial part of the alimentary canal (oesophagus and stomach) _____	332
		Oesophagus _____	332
		Structure of the oesophagus _____	332
		Stomach (gaster, ventriculus) _____	333
		Simple stomach _____	333
		Structure of the gastric wall _____	333
		Species-specific variations of the simple stomach _____	335
		Blood supply and innervation _____	338
		Position of the stomach and omenta _____	339
		Complex stomach _____	341
		Rumen _____	344
		Reticulum _____	345
		Omasum _____	346
		Abomasum _____	347
		Gastric groove (sulcus ventriculi) _____	347
		Omenta _____	347
Thoracic limb _____	289		
Pelvic limb _____	292		
Gaits _____	293		
6 Body cavities _____	295		
H.E. König, W. Pérez and H.-G. Liebich			
Positional stability of the organs in the body cavities _____	295		
Thoracic cavity (cavum thoracis) _____	296		
Mediastinum (mediastinum) _____	296		
Lymph nodes of the mediastinum _____	299		

Blood supply	349	Lower respiratory tract	387
Innervation	350	Larynx	387
Lymph nodes	350	Cartilages of the larynx (cartilagine laryngis)	387
Intestine	350	Epiglottis (epiglottis)	387
Structure of the intestinal wall	351	Thyroid cartilage (cartilago thyroidea)	388
Innervation of the intestine	352	Arytenoid cartilages (cartilagine arytaenoideae)	388
Blood supply of the intestine	352	Cricoid cartilage (cartilago cricoidea)	388
Small intestine (intestinum tenue)	354	Laryngeal cavity (cavum laryngis)	388
Duodenum	354	Articulations and ligaments of the larynx	389
Jejunum	355	Muscles of the larynx	389
Ileum	358	Functions of the larynx	390
Large intestine (intestinum crassum)	359	Blood supply and innervation of the larynx	390
Caecum	359	Trachea (trachea)	393
Caecum of the horse	359	Lung (pulmo)	393
Caecum of the pig and ruminants	361	Structure of the lungs	396
Colon	361	Bronchial tree (arbor bronchialis)	396
Colon of the horse	362	Lobes of the lung (lobi pulmonis)	397
Colon of the pig	363	Blood vessels	398
Colon of the ruminants	363	Lymph nodes	398
Rectum	364	Innervation	398
Anal canal and adjacent structures	364		
Glands associated with the alimentary canal	364	9 Urinary system (organa urinaria)	399
Liver (hepar)	364	H.E. König, J. Maierl and H.-G. Liebich	
Weight	365	Kidney (nephros, ren)	399
Form, position and species-specific variations	365	Location of the kidneys	401
Structure	368	Shape of the kidneys	401
Blood supply	369	Structure of the kidney	401
Innervation	371	Functional units of the kidney	402
Lymphatics	371	Blood supply	404
Ligaments	371	Lymphatics	406
Bile ducts	373	Innervation	406
Gall bladder (vesica fellea)	374	Renal pelvis (pelvis renalis)	406
Pancreas	374	Ureter (ureter)	408
Pancreatic duct system of the different species	376	Urinary bladder (vesica urinaria)	409
		Urethra (urethra)	410
8 Respiratory system			
(apparatus respiratorius)	377	10 Male genital organs	
H.E. König and H.-G. Liebich		(organa genitalia masculina)	413
H.E. König and H.-G. Liebich		H.E. König and H.-G. Liebich	
Functions of the respiratory system	378	Testis (orchis)	413
Upper respiratory tract	379	Structure of the testis	415
Nose (rhin, nasus)	379		
Apex of the nose	379		
Nasal cartilages (cartilagine nasi)	382		
Nasal vestibule (vestibulum nasi)	382		
Nasal cavities (cava nasi)	383		
Nasal conchae (conchae nasales)	383		
Nasal meatuses (meatus nasi)	384		
Paranasal sinuses (sinus paranasales)	384		

Epididymis	416	Vulva	446
Deferent duct (ductus deferens)	416	Ligaments (adnexa)	447
Investments of the testis	417	Muscles	449
Vaginal process (processus vaginalis) and spermatic cord (funiculus spermaticus)	418	Blood supply, lymphatic drainage and innervation	449
Position of the scrotum	419		
Blood supply, lymphatic drainage and innervation of the testis and its investments	419		
Urethra	421		
Accessory genital glands (glandulae genitales accessoriae)	421		
Vesicular gland (glandula vesicularis)	421		
Prostate gland (prostata)	423		
Bulbourethral gland (glandula bulbourethralis)	423		
Penis	424		
Prepuce (praeputium)	427		
Muscles of the penis	428		
Blood supply, lymphatic drainage and innervation of the urethra and the penis	428		
Erection and ejaculation	428		
11 Female genital organs (organa genitalia feminina)	429	12 Organs of the cardiovascular system (systema cardiovasculare)	451
H.E. König, J. Plendl and H.-G. Liebich		H.E. König, J. Ruberte and H.-G. Liebich	
Ovary (ovarium)	429	Heart (cor)	451
Position, form and size of the ovaries	431	Pericardium	452
Structure of the ovaries	431	Position and size of the heart	453
Ovarian follicles	432	Shape and surface topography of the heart	453
Corpus luteum	433	Compartment of the heart	454
Uterine tube (tuba uterina)	439	Atria of the heart (atria cordis)	454
Mesovarium, mesosalpinx and ovarian bursa	439	Right atrium (atrium dextrum)	454
Uterus (metra, hystera)	440	Left atrium (atrium sinistrum)	455
Structure of the uterine wall	442	Ventricles of the heart (ventriculi cordis)	455
Vagina	444	Right ventricle (ventriculus dexter)	455
Vestibule of the vagina (vestibulum vaginae)	444	Left ventricle (ventriculus sinister)	456
		Structure of the cardiac wall	457
		Blood vessels of the heart	460
		Conducting system of the heart	461
		Innervation of the heart	462
		Lymphatics of the heart	462
		Functions of the heart	462
		Vessels (vasa)	463
		Arteries of the pulmonary circulation	463
		Arteries of the systemic circulation	463
		Cranial branches of the aortic arch	465
		Brachiocephalic trunk	465
		Thoracic aorta and abdominal aorta	470
		External iliac artery	470
		Internal iliac artery	473
		Veins (venae)	475
		Cranial vena cava (vena cava cranialis) and its tributaries	475
		Veins of the head and neck	475
		Azygous vein (vena azygos)	475
		Veins of the thoracic limb	476
		Veins of the pelvic limb	477
		Caudal vena cava (vena cava caudalis)	478
		Portal vein (vena portae)	479
		Arteries and veins of the digit	480

13 Immune system and lymphatic organs (organa lymphopoetica) _____ 481

H.E. König, R. Fries, P. Paulsen
and H.-G. Liebich

Lymph vessels (vasa lymphatica) _____	481
Lymph nodes (lymphonodi, nodi lymphatici) _____	482
Lymph nodes of the head _____	483
Parotid lymph centre _____	484
Mandibular lymph centre _____	484
Retropharyngeal lymph centre _____	484
Lymph nodes of the neck _____	484
Superficial cervical lymph centre _____	484
Deep cervical lymph centre _____	484
Lymph nodes of the thoracic limb _____	485
Axillary lymph centre _____	485
Lymph nodes of the thorax _____	485
Dorsal thoracic lymph centre _____	485
Ventral thoracic lymph centre _____	485
Mediastinal lymph centre _____	486
Bronchial lymph centre _____	486
Lymph nodes of the abdomen _____	487
Lumbar lymph centre _____	487
Coeliac lymph centre _____	487
Cranial mesenteric lymph centre _____	487
Caudal mesenteric lymph centre _____	488
Lymph nodes of the pelvic cavity and the pelvic limb _____	488
Iliosacral lymph centre _____	488
Iliofemoral lymph centre _____	488
Inguinofemoral lymph centre (lymphocentrum inguinofemorale) _____	489
Ischial lymph centre (lymphocentrum ischiadicum) _____	489
Popliteal lymph centre (lymphocentrum popliteum) _____	489
Lymph-collecting ducts _____	489
Thymus (thymus) _____	490
Spleen (lien, splen) _____	494
Blood supply, lymphatic drainage and innervation of the spleen _____	494
Function _____	494

14 Nervous system (systema nervosum) _____ 495

H.E. König, I. Misek, Chr. Mülling, J. Seeger
and H.-G. Liebich

Central nervous system (systema nervosum centrale) _____	495
---	-----

Spinal cord (medulla spinalis) _____	496
Shape and position _____	496
Structure _____	497
Grey matter (substantia grisea) _____	497
White matter (substantia alba) _____	499
Reflex arcs of the spinal cord _____	500
Brain (encephalon) _____	500
Rhombencephalon _____	501
Myelencephalon _____	501
Medulla oblongata _____	501
Metencephalon _____	502
Pons _____	502
Cerebellum _____	502
Medullary vela (vela medullaria) and rhomboid fossa (fossa rhomboidea) _____	503
Mesencephalon _____	504
Prosencephalon _____	505
Diencephalon _____	505
Functions of the diencephalon _____	508
Telencephalon _____	508
Rhinencephalon _____	509
Limbic system _____	509
Neopallium and cerebral hemispheres _____	509
Internal organisation of the hemispheres _____	510
Functions of the telencephalon _____	512
Pathways of the central nervous system _____	514
Ascending pathways _____	514
General somatic afferent pathways _____	514
Afferent pathways of the sense organs _____	515
Descending pathways _____	517
Somatic motor pathways _____	517
Pyramidal system _____	518
Extrapyramidal system _____	518
Central autonomic nervous system _____	519
Visceral pathways _____	519
Meninges of the central nervous system _____	520
Spinal dura mater (dura mater spinalis) _____	521
Cranial dura mater (dura mater encephali) _____	521
Arachnoid membrane (arachnoidea) _____	521
Cerebral and spinal pia mater (pia mater encephali et spinalis) _____	523
Ventricles and cerebrospinal fluid _____	524
Blood vessels of the central nervous system _____	525
Blood vessels of the spinal cord _____	525
Blood vessels of the brain _____	526

Peripheral nervous system (systema nervosum periphericum) _____	528
Cerebrospinal nerves and ganglia _____	528
Cranial nerves (nervi craniales) _____	529
Olfactory nerve (I) (nervus olfactorius) _____	529
Optic nerve (II) (fasciculus opticus) _____	529
Oculomotor nerve (III) (nervus oculomotorius) _____	529
Trochlear nerve (IV) (nervus trochlearis) _____	529
Trigeminal nerve (V) (nervus trigeminus) _____	531
Ophthalmic nerve (V ₁) (nervus ophthalmicus) _____	531
Maxillary nerve (V ₂) (nervus maxillaris) _____	532
Mandibular nerve (V ₃) (nervus mandibularis) _____	533

Nutrition of the retina 589

Optic nerve (nervus opticus) _____	589	Dermis (corium) _____	617
Structures of the inner eye _____	589	Epidermis (epidermis) _____	617
Lens (lens) _____	589	Blood supply of the skin _____	619
Chambers of the eyeball (camerae bulbi) and aqueous humour (humor aquosus) _____	590	Nerves and sense organs of the skin _____	620
Vitreous body (corpus vitreum) _____	591		
Adnexa of the eye (organa oculi accessoria) _____	591	Hairs (pili) _____	621
Orbit (orbita) _____	593	Hair types _____	621
Fasciae and extrinsic muscles of the eyeball _____	593	Patterns of hair _____	623
Eyelids (palpebrae) _____	595	Shedding _____	623
Lacrimal apparatus (apparatus lacrimalis) _____	596		
Blood supply and innervation _____	599	Skin glands (glandulae cutis) _____	624
Blood vessels of the eye _____	599	Specialised forms of skin glands _____	624
Innervation of the eye and its adnexa _____	600		
Visual pathways and optic reflexes _____	600	Mammary gland (mamma, uber, mastos) _____	625
		Suspensory apparatus of the mammary glands _____	625
17 Vestibulocochlear organ (organum vestibulocochleare) _____	601	Structure of the mammary glands _____	625
H.-G. Liebich and H.E. König		Blood supply _____	626
		Arteries _____	627
External ear (auris externa) _____	601	Veins _____	627
Auricle (auricula) _____	602	Lymphatic system _____	627
External acoustic meatus (meatus acusticus externus) _____	603	Innervation _____	627
Tympanic membrane (membrana tympani) _____	603	Neurohormonal reflex arc _____	628
		Development of the mammary gland _____	628
Middle ear (auris media) _____	604	Lactation _____	629
Tympanic cavity (cavum tympani) _____	604	Mammary glands (mamma) of carnivores _____	630
Auditory ossicles (ossicula auditus) _____	604	Mammary glands (mamma) of the pig _____	630
Auditory tube (tuba auditiva, Eustachian tube) _____	607	Udder (uber) of small ruminants _____	631
		Bovine udder (uber) _____	631
Internal ear (auris interna) _____	610	Equine udder (uber) _____	632
Vestibular labyrinth (pars statica labyrinthi) _____	611		
Sacculi (sacculus) and utricle (utriculus) _____	612	Foot pads (tori) _____	632
Semicircular ducts (ductus semicirculares) _____	612		
Cochlear labyrinth (pars auditiva labyrinthi) _____	612	Digit (organum digitale) _____	633
Cochlear duct (ductus cochlearis) _____	613	Function _____	633
Organ of Corti (organum spirale) _____	614	Segmentation _____	634
		Horny enclosure of the distal phalanx (capsula ungularis) _____	634
18 Common integument (integumentum commune) _____	615	Wall (paries corneus, lamina) _____	634
S. Reese, K.-D. Budras, Chr. Mülling, H. Bragulla, and H.E. König		Base surface (facies solearis) _____	634
		Deciduous horn shoe (capsula ungulae decidua) _____	636
Subcutaneous layer (subcutis, tela subcutanea) _____	616	Modification of the different segments _____	636
		Subcutis (tela subcutanea) _____	636
Skin (cutis) _____	616	Dermis (corium) _____	636
		Epidermis (epidermis) _____	637
		Vital layers of the epidermis _____	637
		Horn (stratum corneum) _____	637
		Structure of the horn-cell junction _____	638
		Tubular horn _____	638
		Functions of the horn _____	638
		Claw (unguicula) _____	638
		Canine claw _____	638
		Form of the claw _____	639
		Segments of the claw _____	639
		Blood supply _____	641
		Lymphatic drainage _____	642
		Innervation _____	642

Feline claw	642	19 Topographical-clinical anatomy	667
Blood supply	643	H.E. König, P. Sótónyi, A. Probst, J. Maierl, Chr. Aurich, Chr. Mülling and H.-G. Liebich	
Lymphatic drainage	643		
Innervation	643		
Hooves (ungula) of ruminants and pigs	643	Head (caput)	667
Definition	643	Stratigraphy	667
Bovine hooves (ungula)	643	Regions	667
Form of the hooves	644	Nasal region	667
Functions	644	Oral region and chin region	667
Segments of the hoof	644	Buccal region	668
Blood supply	648	Infraorbital region	668
Lymphatic drainage	651	Masseteric region	669
Innervation	651	Orbital region	669
Hoof (ungula) of the small ruminants	653	Intermandibular region	671
Blood supply and innervation	653	Temporal region	671
Hoof (ungula) of the pig	653	Clinical applications	671
Blood supply and innervation	653	Digestive organs of the head	672
Equine hoof (ungula)	653	Oral cavity	672
Definition	653	Teeth	672
Shape of the hoof	655	Nasal cavity and paranasal sinuses	673
Wall (paries corneus, lamina)	655	Pharynx	674
Base surface (facies solearis)	655	Larynx	674
Segments of the hoof	656	Cranial nerves	675
Periopic segment (limbus)	656	Guttural pouch of the horse	677
Coronary segment (corona)	657	Eye	678
Wall segment (paries)	659	Ear	679
Sole segment (solea)	660	Brain	680
Foot pad (torus digitalis)	660	Neck (collum)	680
Frog (cuneus ungulae)	661	Stratigraphy	680
Heel bulbs (torus ungulae)	661	Regions	681
Suspension of the distal phalanx	661	Parotid region	681
Blood supply	662	Ventral region of the neck	682
Arteries	662	Prescapular region	682
Veins	662	Dorsal region of the neck	683
Lymphatic drainage	662	Clinical applications	683
Innervation	662	Thyroid gland	684
Thoracic limb	662	Trachea	684
Pelvic limb	663	Larynx	684
Hoof biomechanics	663	Oesophagus	684
Horn production	663	Intervertebral disc	684
Horn (cornu)	663	Thorax	685
Bovine horn (cornu)	664	Visible and palpable bony structures	685
Development of the horn	664	Superficial thoracic and muscular grooves	685
Cornual process (processus cornualis)	664	Stratigraphy	685
Pneumatisation of the cornual process	664	Regions	685
Horn sheath	664	Organs of the thoracic cavity	685
Cornual subcutis (tela subcutanea)	664	Lungs	685
Cornual dermis (dermis cornus)	664	Dome of the diaphragm	686
Cornual epidermis (epidermis cornus)	664	Heart	686
Blood supply	665	Clinical applications	687
Lymphatic drainage	665	Blood vessel supply to the heart	687
Innervation	665	Persistent right aortic arc	687
Horn (cornu) of the small ruminants	666	Persistent ductus arteriosus in the dog	687
Cornual process (processus cornualis)	666		
Horn sheath	666		
Blood supply and innervation	666		

Abdomen	687	Projection of the organs onto the body surface	724
Visible and palpable bony structures	690	Organs of the abdominal cavity	724
Blood vessels	690	Right lateral body wall of the dog	724
Innervation	691	Left lateral body wall of the dog	724
Lymph nodes	691	Right lateral body wall of the pig	725
Stratigraphy	691	Left lateral body wall of the pig	725
Regions	691	Right lateral body wall of the ox	726
Cranial abdominal region	691	Left lateral body wall of the ox	726
Hypochondriac region	691	Right lateral body wall of the horse	727
Xiphoid region	696	Left lateral body wall of the horse	727
Middle abdominal region	696		
Lateral abdominal region	696		
Umbilical region	696		
Caudal abdominal region	697		
Pubic region	697		
Inguinal region	697		
Clinical applications	697	20 Sectional anatomy and	
Abdominal hernia	697	imaging processes	729
Laparoscopy	697	E. Ludewig, G. Oechtering, Chr. Mülling,	
Laparotomy	697	A. Probst, S. Kneissl, M.-C. Sora,	
Castration	699	R. van den Hoven and H.E. König	
Surgery of the copulatory organ	700		
Examination of the udder	700	Plastination in science	729
Rectal examination	700		
Examination of cattle	700	Imaging processes	740
Examination of the horse	701	Radiology	740
Examination of the pig	704	Nuclear medicine diagnostic processes	741
		Radiodiagnostics	742
Forelimb or thoracic limb (membra thoracica)	704	Computer tomography (CT)	742
Regions	704	Magnetic resonance imaging (MRI)	743
Scapular region	704	Ultrasound diagnostics	745
Shoulder joint and axillary regions	705	Equine endoscopy	745
Lateral brachial region	706		
Medial brachial region	706		
Elbow region	707		
Forearm region	708	Literature	755
Cranial forearm region	708		
Medial forearm region	708		
Caudal forearm region	708		
Carpal region	708	Glossary of terms	762
Metacarpal region and the digital regions	708		
Clinical applications	712		
		Index	770
Hindlimb or pelvic limb (membra pelvina)	713		
Regions	713		
Gluteal region and hip joint region	713		
Perineal region	714		
Femoral region	714		
Knee or stifle regions	716		
Crural regions	716		
Tarsal region	716		
Metatarsal region	717		
Phalangeal regions	717		
Clinical applications	718		
Palpable bony structures	722
