

1	Overview and Introduction to the Chemical Industry — 1
1.1	Introduction — 1
1.2	Listing of U.S. Top 50 Chemical Producers — 1
1.3	List of Top Chemical Producers Worldwide — 3
1.4	Employment — 5
1.5	Recycling — 5
2	Sulfuric Acid — 7
2.1	Introduction — 7
2.2	Methods of Production, Sulfur — 7
2.3	Methods of Production, Sulfuric Acid — 8
2.3.1	The Contact Process — 8
2.3.2	The Wet Sulfuric Acid Process — 9
2.4	Volume of Production and Sales — 9
2.5	Uses — 10
2.5.1	Production of Phosphoric Acid — 10
2.5.2	Production of Aluminum Sulfate — 10
2.6	Recycling — 11
3	Major Industrial Gases — 13
3.1	Introduction, Air Liquefaction — 13
3.2	Helium — 13
3.3	Helium Uses — 13
3.4	Air Liquefaction — 14
3.5	Oxygen — 15
3.5.1	Storage and Uses — 15
3.6	Nitrogen — 16
3.6.1	Major Uses — 16
3.7	Argon — 16
3.7.1	Major Uses — 16
3.8	Carbon Dioxide — 16
3.8.1	Carbon Dioxide Uses — 16
3.9	Pollution, Recycling, By-Product Uses — 17
4	Nitrogen Compounds — 19
4.1	Inorganic Nitrogen Compounds — 19
4.2	Ammonia — 19
4.2.1	Introduction and History — 19

4.2.2	Sources of Starting Materials —	19
4.2.3	Reaction Chemistry —	19
4.2.4	Uses —	20
4.3	Nitric Acid —	20
4.4	Ammonium Nitrate —	21
4.5	Adipic Acid —	21
4.6	Urea —	21
4.7	Ammonium Sulfate —	22
4.7.1	Pollution —	22
4.7.2	Recycling Possibilities —	22
5	Chemicals from Limestone —	25
5.1	Introduction —	25
5.2	Lime —	26
5.3	Sodium Carbonate —	26
5.3.1	Soda Ash Uses —	27
5.3.2	Sodium Bicarbonate Uses —	27
5.4	Calcium Chloride —	28
5.4.1	Uses —	28
5.5	Pollution and Recycling —	29
6	Sodium Chloride —	31
6.1	Introduction —	31
6.2	Methods of Recovery, Production, and Extraction —	31
6.2.1	Evaporation —	33
6.2.2	Mining —	33
6.2.3	Uses —	33
6.3	Chemicals Produced From Sodium Chloride —	34
6.3.1	Sodium Hydroxide Production —	34
6.3.2	The Mercury Cell —	34
6.3.3	The Diaphragm Cell —	34
6.3.4	The Membrane Cell —	35
6.3.5	Production Statistics —	35
6.4	Uses of NaOH —	36
6.5	Chlorine —	36
6.5.1	Uses of Chlorine —	37
6.6	Hydrochloric Acid —	37
6.6.1	Production of Hydrochloric Acid —	37
6.6.2	Uses of Hydrochloric Acid —	38
6.7	Titanium Dioxide —	38
6.7.1	Production of Titanium Dioxide —	38
6.7.2	Uses of Titanium Dioxide —	39
6.8	Recycling —	40

7	Further Inorganics — 41
7.1	Carbon black — 41
7.2	Producers — 41
7.3	Production Methods — 42
7.4	Uses — 43
7.5	Recycling — 44
7.6	Potash — 44
7.6.1	Producers — 44
7.7	Production by Country — 46
7.8	Recycling — 46
7.9	Sodium Tri-Poly-Phosphate — 47
7.10	Producers — 47
7.11	Production — 47
7.12	Uses — 48
7.13	Recycling — 48
8	Water — 51
8.1	Introduction, Sources — 51
8.2	Purification Techniques — 51
8.2.1	Desalination — 51
8.2.2	Sewage Treatment — 53
8.3	Uses, Residential — 54
8.4	Uses, Industrial — 54
8.5	High Purity Water, Uses — 55
8.6	Recycling — 55
8.7	Further — 56
9	Simple Organics from Petroleum — 57
9.1	Introduction and History — 57
9.2	Sources, Geographically — 57
9.3	Extractive Techniques — 59
9.3.1	Offshore — 59
9.3.2	Onshore — 60
9.4	Refining and Distillation — 62
9.4.1	Simple De-Salting — 62
9.4.2	Distillation — 62
9.4.3	Hydrotreating or Hydroprocessing — 62
9.4.4	Cracking or Hydrocracking — 62
9.4.5	Coking — 63
9.4.6	Visbreaking — 63
9.4.7	Steamcracking — 63
9.4.8	Catalytic Reformers — 63

9.4.9	Alkylation —	63
9.4.10	Removal of the C1 or Natural Gas Fraction —	63
9.4.11	Sulfur Recovery —	64
9.5	Pollution —	64
9.6	Recycling and By-Product Uses —	64
10	The C1 Fraction —	65
10.1	Methane —	65
10.2	Methanol —	65
10.2.1	Production —	65
10.2.2	Uses —	66
10.3	Other Oxygenated C1 Chemicals —	67
10.3.1	Production —	67
10.3.2	Uses —	67
10.4	CFCs and HFCs —	68
10.4.1	Production —	68
10.4.2	Nomenclature —	69
10.5	Elemental Hydrogen Production from Methane —	69
10.6	Pollution and Recycling —	70
11	The C2 Fraction and Ethylene Chemistry —	71
11.1	Introduction —	71
11.2	Ethane —	72
11.3	Ethylene —	72
11.3.1	Acetaldehyde and Acetic Acid —	73
11.3.2	Ethylene Dichloride (also, Ethylene Chloride, or 1,2-Dichloroethane) —	74
11.3.3	Vinyl Chloride —	75
11.3.4	Ethylene Oxide and Ethylene Glycol —	75
11.3.5	Vinyl Acetate —	76
11.3.6	Ethanol —	76
11.3.7	Acetylene —	77
11.4	Recycling —	77
12	C3 and C4 Fraction Chemistry —	79
12.1	Introduction —	79
12.2	Propane —	79
12.3	Propylene —	80
12.4	Acrylonitrile —	80
12.5	Propylene Oxide and Propylene Chlorohydrin —	81
12.6	Isopropanol —	82
12.7	Cumene —	83

12.8	Acetone and Phenol —	83
12.9	Butane —	84
12.10	The 1,3-Butadiene Isomers —	84
12.11	Recycling Possibilities —	85
13	Liquid Organic Fuels —	87
13.1	Gasoline —	87
13.2	Octane Number —	87
13.3	Additives —	88
13.4	Jet Fuels —	89
13.5	Diesel —	90
13.6	Liquefied Petroleum Gas —	90
13.7	Biofuels, Pollution, and Recycling —	91
14	Aromatics and Their Derivatives —	93
14.1	Benzene —	93
14.1.1	Catalytic Reforming or Steam Cracking —	94
14.1.2	Toluene Hydrodealkylation —	94
14.1.3	Toluene Disproportionation —	94
14.2	Ethylbenzene —	94
14.3	Cyclohexane —	95
14.4	Nitrobenzene —	95
14.5	Toluene —	97
14.5.1	Caprolactam —	97
14.5.2	Trinitrotoluene —	97
14.5.3	Toluene Diisocyanate —	98
14.6	Xylene —	99
14.7	Pollution and Recycling —	100
15	Polymers —	101
15.1	Introduction —	101
15.2	Resin Identification Codes, RIC 1–6 —	101
15.3	Thermoplastics —	102
15.4	Thermosets —	102
15.5	Polyethylene Terephthalate (PETE) —	103
15.6	Low Density Polyethylene and High Density Polyethylene (LDPE and HDPE) —	104
15.7	Polypropylene (PP) —	105
15.8	Polyvinyl Chloride (PVC) —	106
15.9	Polystyrene (PS) —	107
15.10	Pollution, Recycling Possibilities, and By-Product Uses —	107
15.10.1	PETE —	107

15.10.2	Polyethylene, Polypropylene, and Polyvinyl Chloride —	108
15.10.3	Polystyrene —	108
16	Coatings and Adhesives —	109
16.1	Introduction —	109
16.2	Coating Types —	109
16.3	Adhesives and Binders —	109
16.4	Fillers —	110
16.5	Pigments —	111
16.5.1	Recycling —	113
17	Fertilizers and Pesticides —	115
17.1	Introduction —	115
17.2	Nitrogen-Containing Materials —	115
17.3	Phosphorus-Containing Materials —	115
17.4	Potassium Containing Materials —	116
17.5	Mixed Fertilizers —	116
17.5.1	Production of Mixed Fertilizers —	117
17.6	Pesticides —	117
17.6.1	Herbicides —	117
17.6.2	Insecticides —	119
17.7	Pollution and Recycling —	120
18	The Paper Industry —	123
18.1	Introduction: The Chemical Composition of Wood —	123
18.1.1	Cellulose —	123
18.1.2	Hemicellulose —	124
18.1.3	Lignin —	124
18.2	Virgin Papers —	124
18.3	Kraft Process (a.k.a. the Sulfate Process) —	124
18.3.1	By-Product, Lignin —	126
18.3.2	Tall Oil —	126
18.4	High Quality Papers – Acid Sulfite Process —	126
18.5	Steps in Paper Manufacturing —	127
18.6	Paper Uses —	128
18.7	Paper Re-Cycling —	128
18.8	Low Grade Papers —	128
19	Pharmaceuticals —	131
19.1	Introduction —	131
19.2	The Top 100 Prescription Medicines Sold —	131
19.3	Over the Counter Drugs —	136

19.4	Drug Synthesis —	137
19.4.1	Synthesis of Common Medicines —	137
19.5	Recycling —	139
20	Surfactants and Detergents —	141
20.1	Introduction and Historical Production —	141
20.2	Current Syntheses —	143
20.2.1	Anionic Surfactants —	144
20.2.2	Cationic Surfactants —	144
20.2.3	Zwitterionic or Di-Ionic Surfactants —	145
20.2.4	Non-Ionic Surfactants —	145
20.3	Function of Surfactants —	145
20.4	Additives —	146
20.5	Artisanal Soap Making —	147
20.6	Recycling —	148
21	Rubber —	149
21.1	Introduction —	149
21.2	Sources —	149
21.2.1	Natural Rubber —	149
21.2.2	Synthetic Rubber —	150
21.2.3	Vulcanization —	150
21.3	Major Uses —	151
21.3.1	Synthetic Isoprene Rubber —	151
21.3.2	Poly-Butadiene Rubber —	152
21.4	Other Elastomers —	152
21.5	Recycling —	152
22	Silicon —	155
22.1	Introduction, Purification of Silicon —	155
22.1.1	Ferrosilicon —	156
22.2	High purity Silicon, Uses —	157
22.3	Silicones —	157
22.3.1	Production of Silicones —	157
22.3.2	Uses and Features of Silicones —	158
22.4	Silicon Dioxide —	159
22.5	Recycling —	160
22.5.1	Recycling of Silicon —	160
22.5.2	Recycling of Silicones —	160
22.5.3	Recycling of Silica —	160

23	Iron and Steel — 163
23.1	Introduction and Historical Production — 163
23.2	Ore sources — 163
23.3	Current Iron Production — 165
23.3.1	Blast Furnace — 165
23.4	Steel Production — 167
23.5	By-Products — 168
23.6	Recycling — 168
24	Aluminum — 171
24.1	Introduction and History — 171
24.2	Bauxite Sources — 172
24.3	Production Methods — 173
24.4	Major Industrial Uses — 174
24.5	By-Products — 175
24.6	Recycling — 175
25	Copper — 177
25.1	History — 177
25.2	Ore Sources — 177
25.3	Producers — 177
25.4	Production Methods — 178
25.5	Major Industrial Uses — 179
25.5.1	Wire, Piping, Machinery, and Alloys — 179
25.5.2	Coinage — 179
25.6	Brass — 180
25.7	Bronze — 181
25.8	Recycling — 181
26	Other Major Metals for Industrial Use — 183
26.1	Titanium — 183
26.1.1	Sources — 183
26.1.2	Worldwide Production — 183
26.1.3	Extraction Chemistry, Reactions — 184
26.1.4	Volume Produced Annually — 185
26.1.5	Major Uses — 185
26.2	Chromium — 186
26.2.1	Sources — 186
26.2.2	Extraction Chemistry, Reactions — 187
26.2.3	Major Uses — 187
26.3	Mercury — 188
26.3.1	Sources — 188
26.3.2	Volume Produced Annually — 188

26.3.3	Major Uses —	188
26.4	Gold —	189
26.4.1	Introduction —	189
26.4.2	Sources —	189
26.4.3	Extraction Chemistry —	190
26.4.4	Major Uses —	191
26.5	Silver —	192
26.5.1	Introduction —	192
26.5.2	Sources —	192
26.5.3	Extraction Chemistry —	192
26.5.4	Major Uses —	193
26.6	Platinum Group Metals (PGM) —	194
26.6.1	Introduction —	194
26.6.2	Sources —	194
26.6.3	Extraction Chemistry —	195
26.6.4	Major Uses —	196
26.7	Uranium —	196
26.7.1	Introduction and History —	196
26.7.2	Sources —	196
26.7.3	Major Uses —	197
26.7.4	Recycling —	197
27	Materials —	199
27.1	Introduction, Silicates —	199
27.2	Enamel —	199
27.2.1	Introduction —	199
27.2.2	Production —	199
27.2.3	Uses of Enamel —	200
27.3	Ceramics —	200
27.3.1	Introduction and Classifications —	200
27.3.2	Production —	200
27.3.3	Major Uses —	201
27.4	Metal Foams —	201
27.4.1	Production —	201
27.4.2	Uses —	202
27.5	Carbon Materials —	202
27.5.1	Introduction —	202
27.5.2	Bucky Ball Fullerenes —	202
27.5.3	Tubular Fullerenes —	203
27.5.4	Major Uses —	203
27.6	Pollution, Recycling, and By-Product Uses —	203
