

Table of Contents

Parallel Computing Methods and Algorithms

Strassen's Communication-Avoiding Parallel Matrix Multiplication Algorithm for All-Port 2D Torus Networks	1
<i>Cesur Baransel</i>	
Timed Resource Driven Automata Nets for Distributed Real-Time Systems Modelling	13
<i>Vladimir A. Bashkin, Irina A. Lomazova, and Yulia A. Novikova</i>	
Parallelization Properties of Preconditioners for the Conjugate Gradient Methods	26
<i>Oleg Bessonov</i>	
Transitive Closure of a Union of Dependence Relations for Parameterized Perfectly-Nested Loops	37
<i>Włodzimierz Bielecki, Krzysztof Kraska, and Tomasz Klimek</i>	
Cliff-Edge Consensus: Agreeing on the Precipice	51
<i>François Taïani, Barry Porter, Geoff Coulson, and Michel Raynal</i>	
Hybrid Multi-GPU SolverBased on Schur Complement Method	65
<i>Sergey Kopysov, Igor Kuzmin, Nikita Nedozhogin, Alexander Novikov, and Yulia Sagdeeva</i>	
Formal Verification of Programs in the Pifagor Language	80
<i>Mariya Kropacheva and Alexander Legalov</i>	
Characterization and Understanding Machine-Specific Interconnects	90
<i>Vitali Morozov, Jiayuan Meng, Venkatram Vishwanath, Kalyan Kumaran, and Michael E. Papka</i>	
Multi-core Implementation of Decomposition-Based Packet Classification Algorithms	105
<i>Shijie Zhou, Yun R. Qu, and Viktor K. Prasanna</i>	
Slot Selection Algorithms in Distributed Computing with Non-dedicated and Heterogeneous Resources	120
<i>Victor Toporkov, Anna Toporkova, Alexey Tselishchev, and Dmitry Yemelyanov</i>	

Parallel Programming Tools

Determination of Dependence of Performance from Specifications of Separate Components of the Hybrid Personal Computing System Based on GPU-Processors 135
Daulet Akhmedov, Suleimen Yelubayev, Timur Bopeyev, Farida Abdoldina, Daulet Muratov, Rustam Povetkin, and Aibek Karataev

Design of Distributed Parallel Computing Using by MapReduce/MPI Technology 139
Darkhan Akhmed-Zaki, Nargozy Danaev, Bazargul Matkerim, and Amanzhol Bektemessov

PowerVisor: A Toolset for Visualizing Energy Consumption and Heat Dissipation Processes in Modern Processor Architectures 149
Alexey Baranov, Peter Panfilov, and Dmitry Ponomarev

SVM Regression Parameters Optimization Using Parallel Global Search Algorithm 154
Konstantin Barkalov, Alexey Polovinkin, Iosif Meyerov, Sergey Sidorov, and Nikolai Zolotykh

Secure and Unfailing Services 167
Davide Basile, Pierpaolo Degano, and Gian-Luigi Ferrari

FuPerMod: A Framework for Optimal Data Partitioning for Parallel Scientific Applications on Dedicated Heterogeneous HPC Platforms 182
David Clarke, Ziming Zhong, Vladimir Rychkov, and Alexey Lastovetsky

DISBench: Benchmark for Memory Performance Evaluation of Multicore Multiprocessors 197
Alexander Frolov and Mikhail Gilmendinov

Fast and Scalable, Lock-Free k-FIFO Queues 208
Christoph M. Kirsch, Michael Lippautz, and Hannes Payer

Development of Basic Approach and Software Package for Effective Parallel Computing of Continuum Mechanics Problems on Hybrid Architecture Systems 224
Maksim Klimov

On-Line Parallelizable Task Scheduling on Parallel Processors 229
Marina Khludova

Organizing of Parallel Processing User-Friendly Dataflow-Oriented Environment for User Tasks Execution on Cluster 234
Vladimir Levin, Dmitry Kharitonov, and Daria Odyakova

SeloGPU: A Selective Off-Loading Framework for High Performance GPGPU Execution	242
<i>Sejin Park, Jeonghyeon Ma, and Chanik Park</i>	
Efficient Domain Decomposition of Dissipative Particle Dynamics via Choice of Pseudorandom Number Generator	250
<i>Michael Seaton, Ilian Todorov, and Yaser Afshar</i>	
SkelCL: Enhancing OpenCL for High-Level Programming of Multi-GPU Systems	258
<i>Michel Steuwer and Sergei Gorlatch</i>	

Cellular Automata

Cellular Automata Model of Some Organisms Population in Lake Baikal	273
<i>Ivan Afanasyev</i>	
3-D Cellular Automata Model of Fluid Permeation through Porous Material	278
<i>Olga Bandman</i>	
Temporal-Impulse Description of Complex Images Based on Cellular Automata	291
<i>Stepan Belan and Nikolay Belan</i>	
3D Heart Modeling with Cellular Automata, Mass-Spring System and CUDA	296
<i>Ricardo Silva Campos, Ronan Mendonça Amorim, Bernardo Lino de Oliveira, Bernardo Martins Rocha, Joakim Sundnes, Luis Paulo da Silva Barra, Marcelo Lobosco, and Rodrigo Weber dos Santos</i>	
Towards the Introduction of Parallelism in the MakkSim Pedestrian Simulator	310
<i>Luca Crociani, Giuseppe Vizzari, and Stefania Bandini</i>	
CA Agents for All-to-All Communication Are Faster in the Triangulate Grid	316
<i>Rolf Hoffmann and Dominique Désérable</i>	
Parallel Implementation of Totalistic Cellular Automata Model of Stable Patterns Formation	330
<i>Anastasiya Kireeva</i>	
cupSODA: A CUDA-Powered Simulator of Mass-Action Kinetics	344
<i>Marco S. Nobile, Daniela Besozzi, Paolo Cazzaniga, Giancarlo Mauri, and Dario Pescini</i>	

Reconstructing Images with Nature Inspired Algorithms	358
<i>Franciszek Seredynski and Jaroslaw Skaruz</i>	
Analysis and Application of the Pedestrian Permeation through the Crowd via Cellular Automata	369
<i>Kenichiro Shimura, Giuseppe Vizzari, Stefania Bandini, and Katsuhiro Nishinari</i>	
An Isotropic Optimum-Time FSSP Algorithm for Two-Dimensional Cellular Automata	381
<i>Hiroshi Umeo, Keisuke Kubo, and Yusuke Takahashi</i>	
 Application	
MathCloud: Publication and Reuse of Scientific Applications as RESTful Web Services	394
<i>Alexander Afanasiev, Oleg Sukhoroslov, and Vladimir Voloshinov</i>	
Enhanced Differential Evolution Entirely Parallel Method for Biomedical Applications	409
<i>Konstantin Kozlov, Nikita Ivanisenko, Vladimir Ivanisenko, Nikolay Kolchanov, Maria Samsonova, and Alexander M. Samsonov</i>	
TCP TIPS: TCP Variant with Proactive Congestion Avoidance	417
<i>Anatoliy Sivov</i>	
The Unified Algorithmic Platform for Solving Complex Problems of Computational Geometry	424
<i>Vasyl Tereshchenko, Igor Budjak, and Andrey Fisunenko</i>	
Rigid Body Molecular Dynamics within the Domain Decomposition Framework of DL_POLY_4	429
<i>Ilian Todorov, Laurence Ellison, and William Smith</i>	
OPTNOC: An Optimized 3D Network-on-Chip Design for Fast Memory Access	436
<i>Thomas Canhao Xu, Pasi Liljeberg, Juha Plosila, and Hannu Tenhunen</i>	
 Author Index	 443
