Part I Highway and Urban Vehicular Traffic

The Fundamental Diagram on the Ring Geometry for Particle Processes with Acceleration/Braking Asymmetry	3
Cyril Furtlehner, Jean-Marc Lasgouttes, and Maxim Samsonov	
A Bogdanov–Takens Bifurcation in Generic Continuous Second Order Traffic Flow Models	15
Armando Carrillo, Joaquín Delgado, Patricia Saavedra, Rosa Maria Velasco, and Fernando Verduzco	
Model of Vehicular Traffic by Hilliges and Weidlich Revisited	27
Martins Brics, Reinhard Mahnke, and Reinhart Kühne	
Stationary State Properties of a Microscopic Traffic Flow Model Mixing Stochastic Transport and Car-Following	35
Sylvain Lassarre, Michel Roussignol, Andreas Schadschneider, and Antoine Tordeux	
Identifiability and Practical Relevance of Complex Car-Following Models	47
Gunnar Flötteröd, Peter Wagner, and Yun-Pang Flötteröd	
Latent Heat of a Traffic Model	57
Hans Weber and Reinhard Mahnke	
Estimation of Transport Systems Capacity	63
Larisa Afanasyeva and Ekaterina Bulinskaya	
Classification Approach to Traffic Flow Simulation	79
Yury V. Chekhovich and Nikita P. Ivkin	
Multilane Vehicular Traffic Simulation Using the CA Theory	85
Ilya Furmanov, Natalia Churbanova, and Marina Trapeznikova	

Multi-agent Model of the Price Flow Dynamics	95
Vadim Malyshev, Anatoly Manita, and Andrei Zamyatin	
 Part II Pedestrian Traffic and Evacuation Dynamics	
Calibration of Nomad Parameters Using Empirical Data	109
Winnie Daamen, Mario Campanella, and Serge P. Hoogendoorn	
Estimating Model Parameters for Bottlenecks in Evacuation Conditions	121
Winnie Daamen and Serge P. Hoogendoorn	
Counterflow in Evacuations	129
Tobias Kretz	
Using a Telepresence System to Investigate Route Choice Behavior	139
Tobias Kretz, Stefan Hengst, Antonia Pérez Arias, Simon Friedberger, and Uwe D. Hanebeck	
A Cellular Automaton Approach for Lane Formation in Pedestrian Counterflow	149
Stefan Nowak and Andreas Schadschneider	
A Methodological Approach to Adjustment of Pedestrian Simulations to Live Scenarios: Example of a German Railway Station ...	161
Maria Davidich and Gerta Köster	
Optimal Density in a Queue with Starting-Wave	171
Akiyasu Tomoeda, Daichi Yanagisawa, Takashi Imamura, and Katsuhiro Nishinari	
Arch-Shaped Equilibrium Solutions in Social Force Model	179
Tsubasa Masui, Akiyasu Tomoeda, Mayuko Iwamoto, and Daishin Ueyama	
Effect of Rhythm on Pedestrian Flow	187
Daichi Yanagisawa, Akiyasu Tomoeda, and Katsuhiro Nishinari	
Social Field Model to Simulate Bidirectional Pedestrian Flow Using Cellular Automata	197
Jorge D. González, M. Luisa Sandoval, and Joaquín Delgado	
Some Empirical Studies on Evacuation from a Hall	207
Ujjal Chattaraj, Partha Chakroborty, and Armin Seyfried	
Understanding and Simulating Large Crowds	217
S.M.V. Gwynne and A.A. Siddiqui	
Experimental Study of Pedestrian Flow Through a T-Junction	241
Jun Zhang, W. Klingsch, A. Schadschneider, and A. Seyfried	

Geodesics and Shortest Paths Approach in Pedestrian Motions	251
B. Nkonga, Michel Rascle, F. Decoupigny, and G. Maignant	
Modeling the Desired Direction in a Force-Based Model for Pedestrian Dynamics	263
Mohcine Chraïbi, Martina Freialdenhoven, Andreas Schadschneider, and Armin Seyfried	
A Simple Model for Phase Separation in Pedestrian Dynamics	277
Christian Eilhardt and Andreas Schadschneider	
HERMES: An Evacuation Assistant for Large Sports Arenas Based on Microscopic Simulations of Pedestrian Dynamics	287
Andreas Schadschneider, Christian Eilhardt, Stefan Nowak, Armel Ulrich Kemloh Wagoum, and Armin Seyfried	
Pedestrians and Escalators: Usage Under Normal Conditions	299
Christian Rogsch	
Part III Granular Flow	
Model of Sand Transport by Consecutive Particle Collisions with Wind Interaction	307
Luc Oger, Alexandre Valance, and Madani Ammi	
“Faster Is Slower” Effect in Granular Flows	317
Paula A. Gago, Daniel R. Parisi, and Luis A. Pugnaloni	
Modeling of Nanoparticles in a Gas Flow	325
J. Kaupužs, Sh. E. Guseynov, and J. Rimšāns	
Multiple Shear Banding in Granular Materials	331
Robabeh Moosavi, M. Reza Shaebani, Maniya Maleki, János Török, and Dietrich E. Wolf	
Anisotropic Elasticity in Sheared Packings of Frictional Disks	339
M. Reza Shaebani, Jens Boberski, and Dietrich E. Wolf	
Part IV Traffic Networks and Intelligent Traffic Systems	
Two-Variable Macroscopic Fundamental Diagrams for Traffic Networks	351
Victor L. Knoop and Serge P. Hoogendoorn	
A Uzawa Algorithm for Static Traffic Assignment in an Orthotropic Network	361
Tibye Saumtally, Jean-Patrick Lebacque, and Habib Haj-Salem	
Route Advice Based on Subnetwork Properties	379
Victor L. Knoop, Hans van Lint, and Serge P. Hoogendoorn	

Dynamic User Optimal Route Assignment System for Traffic Flows Microsimulation 389
Gregory Cherniak

On Traffic Flow on the Arterial Network Model 399
Konstantin K. Glukharev, Nikolay M. Ulyukov, Andrey M. Valuev,
and Ivan N. Kalinin

Quasi-stationary Approach in Mathematical Modeling of Traffic Flows Dynamics in a City Road Network 413
Andrey M. Valuev

Some Problems of Rational Route Choice for a City Road Network 419
Alexander A. Yakukhnov and Andrey M. Valuev

Weighted Value Feedback Strategy in Intelligent Two-Route Traffic Systems with a Bottleneck 429
Bokui Chen, Wei Tong, Wenyao Zhang, and Binghong Wang

On Traffic Control Means Recognition in Intelligent Monitoring and Traffic Safety 439
M.V. Yashina and A.A. Vinogradov

Interaction of Cars and Bicycles on a One-Way Road Intersection: A Network CA-Based Model 453
Jelena Vasic and Heather J. Ruskin

About New Dynamical Interpretations of Entropic Model of Correspondence Matrix Calculation and Nash-Wardrop’s Equilibrium in Beckmann’s Traffic Flow Distribution Model 465
E. V. Gasnikova and T.A. Nagapetyan

Feed Forward Back Propagation Neural Networks to Classify Freeway Traffic Flow State..... 475
Onur Deniz and Hilmi Berk Celikoglu
