1	Introduction	1
1.1	Synergy	1
1.2	Image Fusion Process	2
1.3	Common Representational Block	4
1.4	Image Fusion Block	4
1.5	Image Fusion Algorithms	6
1.6	Organization	7
1.7	Software	7
1.8	Further Reading	8
	References	8
2	Image Sensors	9
2.1	Digital Camera	9
2.2	Optical System	9
2.2.1	Perspective Projection	10
2.2.2	Orthographic Projection	10
2.3	Recording Systems	10
2.3.1	Noise	11
2.4	Sampling	11
2.4.1	Quantization	12
2.4.2	Bayer	12
2.5	Spatial vs. Spectral Resolution	14
2.5.1	Spatial Resolution	14
2.5.2	Spectral Resolution	15
2.6	Further Reading	17
	References	17

Part I: Theories

3	Common Representational Format	21
3.1	Introduction	21
3.2	Geographical Information System	23
3.3	Choosing a Common Representational Format	23
3.3.1	Human Fusion	23
3.3.2	Sparseness	24
3.3.3	Object Recognition	25
3.3.4	Uncertainty	27
3.4	Textures	28
3.5	Multi-scale Representation	29
3.6	Sub-space Methods	30
3.7	Multiple Training Sets	31
3.8	Software	32
3.9	Further Reading	32
	References	33
4	Spatial Alignment	35
4.1	Introduction	35
4.2	Pairwise Transformation	36
4.2.1	Thin-Plate Splines	37
4.3	Hierarchical Registration	39
4.4	Mosaic Image	41
4.4.1	Stitching	43
4.5	Image Similarity Measures	43
4.6	Mutual Information	44
4.6.1	Normalized Mutual Information	44
4.6.2	Calculation	45
4.6.3	Histogram	45
4.6.4	Parzen Windows	45
4.6.5	Iso-intensity Lines	46
4.7	Partial Volume Interpolation	47
4.8	Artifacts	48
4.9	Software	50
4.10	Further Reading	50
	References	50
5	Semantic Equivalence	53
5.1	Introduction	53
5.2	Probabilistic Scale	54
5.2.1	Plat Calibration	55
5.2.2	Histogram Calibration	56
5.2.3	Isotonic Calibration	56
5.3	Decision Labels	57

5.3.1	Assignment Matrix	58
5.3.2	Co-association Matrix.....	60
5.4	Software	61
5.5	Further Reading.....	61
	References	61
6	Radiometric Calibration	63
6.1	Introduction	63
6.2	Histogram Matching	64
6.2.1	Exact Histogram Specification	65
6.3	Midway Image Equalization	66
6.4	Matching Second-Order Statistics.....	68
6.5	Ranking	68
6.6	Thresholding.....	69
6.7	Segmentation	70
6.8	Feature Map Normalization.....	71
6.9	Probabilistic Scale	72
6.10	Software	72
6.11	Further Reading.....	73
	References	73
7	Pixel Fusion	75
7.1	Introduction	75
7.2	Addition	75
7.2.1	Robust Averaging	77
7.3	Subtraction	77
7.4	Multiplication.....	80
7.5	Division	80
7.6	Feature Map Fusion	81
7.7	Decision Fusion	83
7.7.1	Shape-Based Averaging	85
7.7.2	Similarity	87
7.7.3	Label Permutation	87
7.7.4	Co-associative Matrix	88
7.8	Software	89
	References	89
 Part II: Techniques		
8	Multi-resolution Analysis	93
8.1	Introduction	93
8.2	Discrete Wavelet Transform.....	94
8.3	Undecimated Discrete Wavelet Transform (UDWT)	96
8.4	Wavelet Fusion	98
8.5	Expectation-Maximization Algorithm	101

8.6	Multi-modal Wavelet Fusion	101
8.7	Pan-Sharpening	104
8.8	Software	105
8.9	Further Reading	105
	References	105
9	Image Sub-space Techniques	107
9.1	Introduction	107
9.2	Principal Component Analysis (PCA)	109
9.2.1	PCA Variants	112
9.2.2	Whitening	112
9.2.3	Two-Dimensional PCA	113
9.3	PCA Fusion	114
9.4	Non-negative Matrix Factorization (NMF)	115
9.5	Linear Discriminant Analysis (LDA)	116
9.5.1	Fisherface	117
9.5.2	Median LDA	118
9.5.3	Re-weighting LDA	118
9.5.4	Two-Dimensional LDA	119
9.6	Nearest Neighbor Discriminant Analysis (NNDA)	120
9.6.1	K -Nearest Neighbor Discriminant Analysis	121
9.6.2	Two-Dimensional NNDA	121
9.7	Canonical Correlation Analysis (CCA)	121
9.8	Software	122
9.9	Further Reading	122
	References	122
10	Ensemble Learning	125
10.1	Ensemble Learning Methods	125
10.2	Diversity Measures	126
10.3	Multiple Image Transformations I_k	128
10.3.1	Multiple Subspace Transformations	129
10.3.2	Multiple Random Convolutions	129
10.3.3	Multiple Normalizations	130
10.3.4	Multiple Color Spaces	131
10.3.5	Multiple Thresholds	131
10.3.6	Multiple Segmentations	132
10.4	Re-sampling Methods	133
10.5	Image Fusion	133
10.6	Ensemble Thresholding	135
10.7	Ensemble Spatial Sampling	137
10.8	Ensemble Atlas Based Segmentation	139
10.9	Ensemble Nearest Neighbor Classification	140
10.10	Further Reading	141
10.11	Software	141
	References	141
