Part I Mechanism Type

1 Classification of Parallel Mechanisms	3
1.1 Definition and Characteristics	3
1.2 Joints and Legs	5
1.3 Architectures	6
1.3.1 Two-DOF Parallel Mechanisms	9
1.3.2 Three-DOF Parallel Mechanisms	11
1.3.3 Four-DOF Parallel Mechanisms	20
1.3.4 Five-DOF Parallel Mechanisms	21
1.3.5 Six-DOF Parallel Mechanisms	22
References	26
2 Type Synthesis of Parallel Mechanisms	31
2.1 DOF Analysis	31
2.1.1 Observation Method	32
2.1.2 Evolution Method	34
2.1.3 Kinematic Analysis Method	35
2.1.4 Method Based on Screw Theory	38
2.2 Evolution of Parallel Mechanisms	42
2.3 Type Synthesis	45
2.3.1 Type Synthesis of Parallel Mechanisms with Parallelogram	45
2.3.2 Type Synthesis Based on the Evolution Method	68
References	75

Part II Kinematic Analysis

3 Position Analysis of Parallel Mechanisms	81
3.1 Position Analysis of the 5R Parallel Mechanism	82
3.1.1 Inverse Kinematics	82
3.1.2 Direct Kinematics	83

3.2	Position Analysis of a 2-DOF Translational Parallel Mechanism ...	85
3.2.1	Two-P(Pa) Parallel Mechanism	85
3.2.2	The RRR&PRRR Parallel Mechanism	87
3.3	Position Analysis of a 2-DOF Spherical Parallel Mechanism	89
3.3.1	Inverse Kinematics	90
3.3.2	Direct Kinematics	91
3.4	Position Analysis of a 3-DOF Translational Parallel Mechanism ...	92
3.4.1	DELTA	92
3.4.2	A Parallel Cube-Manipulator	94
3.5	Position Analysis of a 3-DOF Spherical Parallel Mechanism	97
3.6	Position Analysis of the 2-PRU&1-PR(Pa)R Parallel Mechanism ..	99
3.6.1	Inverse Kinematics	99
3.6.2	Direct Kinematics	101
3.7	Position Analysis of the 2-RRU&1-RR(Pa)R Parallel Mechanism .	102
3.7.1	Inverse Kinematics	102
3.7.2	Direct Kinematics	104
3.8	Position Analysis of a 2-PRU&1-PRC Parallel Mechanism	106
3.9	Position Analysis of the 3-[PP]S Type of Parallel Mechanism	108
3.9.1	Orientation Description	109
3.9.2	Kinematics of the Two [PP]S Parallel Mechanisms	114
3.10	Position Analysis of a Simplified 6-RUS Parallel Mechanism	116
	References	119
4	Velocity and Jacobian Analysis of Parallel Mechanisms	121
4.1	The Planar 5R Parallel Mechanism	121
4.2	The Translational RRR&PRRR Parallel Mechanism	122
4.3	A Parallel Cube-Manipulator	123
4.4	The 2-PRU&1-PR(Pa)R Parallel Mechanism	124
4.5	The 2-RRU&1-RR(Pa)R Parallel Mechanism	125
4.6	The Simplified 6-RUS Parallel Mechanism	126
5	Singularity of Parallel Mechanisms	129
5.1	Singularity of the 5R Parallel Mechanism	130
5.1.1	The First Kind of Singularity	130
5.1.2	The Second Kind of Singularity	132
5.1.3	The Third Kind of Singularity	133
5.2	Singularity of the 2-RRU&1-RR(Pa)R Parallel Mechanism	134
5.2.1	The First Kind of Singularity	134
5.2.2	The Second Kind of Singularity	135
5.2.3	The Third Kind of Singularity	137
5.3	Singularity of the 2-PRU&1-PR(Pa)R Parallel Mechanism	137
5.3.1	The First Kind of Singularity	137
5.3.2	The Second Kind of Singularity	138
5.3.3	The Third Kind of Singularity	139
5.4	Singularity Analysis of Parallel Manipulators Taking into Account the Motion and Force Transmissibility	140

5.4.1	An Approach to Singularity Analysis of Parallel Manipulators.....	140
5.4.2	An Example.....	144
	References	148
6	Workspace of Parallel Mechanisms	149
6.1	The Planar 5R Parallel Mechanism	150
6.1.1	Theoretical Workspace	150
6.1.2	Usable Workspace	151
6.2	DELTA	153
6.3	A Parallel Cube-Mechanism	156
6.4	Two 3-[PP]S Parallel Mechanisms.....	158
6.4.1	Tilt Angle of a Spherical Joint	158
6.4.2	Orientalional Workspace of the 3- $\underline{P}_V P_H S$ Parallel Mechanism	160
6.4.3	Orientalional Workspace of the 3- $\underline{P}_V RS$ Parallel Mechanism.....	161
6.5	The Spatial 2-RRU&1-RR(Pa)R Parallel Mechanism	162
6.5.1	Constant-Orientalional Workspace	164
6.5.2	Reachable Workspace	165
6.5.3	Rotational Capability of the Mobile Platform	165
6.5.4	Example.....	167
6.6	The Spatial 2-PRU&1-PR(Pa)R Parallel Mechanism	171
6.6.1	Constant-Orientalional Workspace	171
6.6.2	Reachable Workspace	171
6.6.3	Rotational Capability of the Mobile Platform	173
6.6.4	Example.....	174
6.7	The Spatial 6-RUS Parallel Mechanism	178
	References	180

Part III Optimal Kinematic Design

7	Performance Evaluation of Parallel Mechanisms	185
7.1	Jacobian-Matrix-Based Performance Evaluation	186
7.1.1	Local and Global Conditioning Indices	186
7.1.2	Good-Condition Workspace	187
7.1.3	Stiffness	194
7.2	Error/Accuracy.....	196
7.3	Motion/Force Transmissibility and Its Index	200
7.3.1	Problems with the LCI	200
7.3.2	One Solution.....	200
7.3.3	Mathematical Foundation	206
7.3.4	Input Transmission Index	210
7.3.5	Output Transmission Index	214
7.3.6	LTI and GTI of Parallel Mechanisms.....	216

7.3.7	Good-Transmission Workspace	217
7.3.8	Examples	218
7.4	Closeness to Singularities	224
7.4.1	Performance Indices	225
7.4.2	Examples	227
	Appendix: LTI of the Planar 5R and PRRRP Parallel Mechanisms	233
	References	236
8	Dimensional Synthesis of Parallel Mechanisms	239
8.1	Parameter Design Space	240
8.1.1	Establishing the Parameter Design Space	240
8.1.2	Relationship Between a BSM and Its SMs	246
8.2	Performance Chart	248
8.2.1	Jacobian Matrix-Based Performance Chart	248
8.2.2	LTI-Related Performance Chart	261
8.3	A General Procedure for Dimensional Synthesis	268
8.4	Examples	272
8.4.1	Jacobian-Matrix-Based Design	272
8.4.2	Motion/Force Transmissibility-Based Design	284
	References	289
9	Kinematic Optimal Design of a Spatial 3-DOF Parallel Manipulator ..	291
9.1	Inverse Kinematics	293
9.2	Optimal Design of the Parallel Manipulator	294
9.2.1	Performance Atlas	295
9.2.2	Dimensional Synthesis Using the Performance Atlases	299
	Index	303
