Part VIII Conclusions

20 A New Paradigm: The Approach to Complexity	693
The New Paradigm	693
Vegetation as the Result of the Relationship between Plants and the Habitat	693
Methods	694
Processing Level I: On the Basis of the Bioindication Values According to Ellenberg	695
Processing Levels II–III (See Chap. 18)	696
Processing Level IV: Combination of the Bioindication Values According to Ellenberg and Chorotypes	696
Processing Level V: Combination of the Bioindication Values, Chorotypes, and Life Forms (All of the Information Available)	696
Biodiversity as a Function of Ecosystem	699
Use of Descriptors	699
Data Analysis	700
Step 1: Indices of Diversity or Dominance	700
Step 2: Chi-Square Measurement of Difference	701
Step 3: Selection of Informative Chorotypes	704
Step 4: Ellenberg Values of Ecological Bioindication	707
