

## **Part I The Pleura and Thoracoscopy Technique**

|                                                                                                  |           |
|--------------------------------------------------------------------------------------------------|-----------|
| <b>1 Introduction to the Pleura and Thoracoscopy Technique . . . .</b>                           | <b>3</b>  |
| Philippe Astoul, GianFranco Tassi,<br>and Jean-Marie Tschopp                                     |           |
| <b>2 Thoracoscopy: An Old Technique for a Modern<br/>Work-Up of the Pleural Cavity . . . . .</b> | <b>5</b>  |
| Gian Pietro Marchetti and GianFranco Tassi                                                       |           |
| <b>3 Macroscopic Approach to the Pleural Cavity . . . . .</b>                                    | <b>17</b> |
| Delphine Trousse and Pascal Thomas                                                               |           |
| <b>4 Physiology and Pathophysiology of the Pleural Space . . . . .</b>                           | <b>25</b> |
| Daniella Negrini                                                                                 |           |
| <b>5 Ultrasound for Medical Thoracoscopy. . . . .</b>                                            | <b>45</b> |
| Cyrus Daneshvar, Saiyad A. Sarkar, and David P. Breen                                            |           |
| <b>6 Anaesthesiology for Thoracoscopy . . . . .</b>                                              | <b>53</b> |
| Antoine Delage and Charles-Hugo Marquette                                                        |           |
| <b>7 Thoracoscopy: Equipment and Technique . . . . .</b>                                         | <b>59</b> |
| Philippe Astoul and David P. Breen                                                               |           |

## **Part II Thoracoscopy for the Beginners ('The Green Zone')**

|                                                                                |            |
|--------------------------------------------------------------------------------|------------|
| <b>8 The Current Practice of Medical Thoracoscopy . . . . .</b>                | <b>85</b>  |
| Philippe Astoul, GianFranco Tassi,<br>and Jean-Marie Tschopp                   |            |
| <b>9 Diagnostic Thoracoscopy: Malignant Pleural Effusion . . . . .</b>         | <b>87</b>  |
| Marios Froudarakis                                                             |            |
| <b>10 Diagnostic Thoracoscopy: Atlas . . . . .</b>                             | <b>105</b> |
| Philippe Astoul                                                                |            |
| <b>11 Diagnostic Thoracoscopy: Nonmalignant<br/>Pleural Effusion . . . . .</b> | <b>121</b> |
| Wolfgang Frank and Nicolas Schönfeld                                           |            |

|           |                                                                                          |            |
