## Non-intrusive and Thermal Haptics

|                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------|----|
| Non-intrusive Haptic Interfaces: State-of-the Art Survey .....                                                          | 1  |
| <i>Mohamed Yacine Tsalamlal, Nizar Ouarti, and Mehdi Ammi</i>                                                           |    |
| Thermal Feedback Identification in a Mobile Environment .....                                                           | 10 |
| <i>Graham Wilson, Stephen Brewster, Martin Halvey, and Stephen Hughes</i>                                               |    |
| Cold or Hot? How Thermal Stimuli Are Related to Human Emotional System? .....                                           | 20 |
| <i>Katri Salminen, Veikko Surakka, Jukka Raisamo, Jani Lylykangas, Roope Raisamo, Kalle Mäkelä, and Teemu Ahmaniemi</i> |    |

## New Interfaces and Interactions

|                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Potential Tissue Puncture Notification during Telesurgery .....                                                                                   | 30 |
| <i>Rachael L'Orsa, Kourosh Zareinia, Liu Shi Gan, Chris Macnab, and Garnette Sutherland</i>                                                       |    |
| Visuo-haptic Tool for Collaborative Adjustment of Selections .....                                                                                | 40 |
| <i>Adrien Girard, Yacine Bellik, Malika Auvray, and Mehdi Ammi</i>                                                                                |    |
| Multi-command Tactile Brain Computer Interface: A Feasibility Study .....                                                                         | 50 |
| <i>Hiromu Mori, Yoshihiro Matsumoto, Victor Kryssanov, Eric Cooper, Hitoshi Ogawa, Shoji Makino, Zbigniew R. Struzik, and Tomasz M. Rutkowski</i> |    |

## Emotion and Affect

|                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------|----|
| Association of Haptic Trajectories to Takete and Maluma .....                                           | 60 |
| <i>Federico Fontana</i>                                                                                 |    |
| Comparison of Statistical Methods for the Analysis of Affective Haptic Expressions .....                | 69 |
| <i>Yoren Gaffary, Victoria Eyharabide, Mohamed Yacine Tsalamlal, Jean-Claude Martin, and Mehdi Ammi</i> |    |

Music

Plucked String Stiffness Affects Loudness Perception ..... 79  
*Mounia Ziat, Ilja Frissen, Gianni Campion, Vincent Hayward, and Catherine Guastavino*

Perceptual and Technological Issues in the Design of Vibrotactile-Augmented Interfaces for Music Technology and Media ..... 89  
*Marcello Giordano and Marcelo M. Wanderley*

jamTable: Can Physical Interfaces Support the Collaboration between Novice and Experienced Musicians? ..... 99  
*Augusto Esteves, Filipe Quintal, and Ian Oakley*

Mobile Devices and Applications

A Film-Type Vibrotactile Actuator for Hand-Held Devices ..... 109  
*Sang-Youn Kim, Ki-baek Kim, Jaehwan Kim, and Ki-uk Kyung*

Strike a Pose: Directional Cueing on the Wrist and the Effect of Orientation ..... 117  
*Sabrina Paněels, Lucie Brunet, and Steven Strachan*

The Time Machine – An Inclusive Tourist Guide Application Supporting Exploration ..... 127  
*Kirsten Rasmus-Gröhn, Delphine Szymczak, and Charlotte Magnusson*
