|          |                                  |     |
|----------|----------------------------------|-----|
| <b>1</b> | <b>Theoretical Framework</b>     | 1   |
| 1.1      | Discrete-Time Quantum Walks      | 1   |
| 1.2      | Continuous-Time Quantum Walks    | 19  |
| 1.3      | Walking Characteristics          | 24  |
| 1.4      | Decoherence                      | 26  |
| <b>2</b> | <b>Potential Applications</b>    | 31  |
| 2.1      | Exponentially Faster Hitting     | 31  |
| 2.2      | Quantum Walk Based Search        | 32  |
| 2.3      | Network Characterization         | 33  |
| 2.4      | Graph Isomorphism                | 35  |
| 2.5      | Modeling Quantum Phenomena       | 37  |
| 2.6      | Universal Computation            | 38  |
| <b>3</b> | <b>Physical Implementation</b>   | 39  |
| 3.1      | Linear Optics                    | 40  |
| 3.2      | Nuclear Magnetic Resonance       | 78  |
| 3.3      | Cavity QED                       | 81  |
| 3.4      | Quantum Optics                   | 88  |
| 3.5      | Ion Traps                        | 94  |
| 3.6      | Neutral Atom Traps               | 101 |
| 3.7      | Solid State                      | 127 |
| 3.8      | Quantum Circuits                 | 137 |
| 3.9      | Recent Developments              | 141 |
|          | <b>Abstract</b>                  | 151 |
| <b>A</b> | <b>Electromagnetic Radiation</b> | 153 |
| A.1      | Classical Radiation Field        | 153 |
| A.2      | Quantized Radiation Field        | 155 |
| A.3      | Coherent Versus Fock States      | 158 |

|          |                                            |     |
|----------|--------------------------------------------|-----|
| A.4      | Reproducing the Classical Result.....      | 161 |
| A.5      | Orbital Angular Momentum .....             | 162 |
| <b>B</b> | <b>Atom Optics</b> .....                   | 165 |
| B.1      | Atom-Field Interaction .....               | 165 |
| B.2      | Single-Photon Interaction .....            | 170 |
| B.3      | Two-Photon Interaction .....               | 181 |
| <b>C</b> | <b>Bloch Rotations</b> .....               | 189 |
| C.1      | Theory.....                                | 189 |
| C.2      | Physical Realization .....                 | 192 |
| <b>D</b> | <b>Linear Optical Elements</b> .....       | 195 |
| D.1      | Phase Shifters .....                       | 195 |
| D.2      | Beam Splitters .....                       | 196 |
| D.3      | Classical Versus Non-classical Input ..... | 198 |
| D.4      | Wave Plates .....                          | 200 |
| <b>E</b> | <b>Optical Lattices</b> .....              | 203 |
| E.1      | Trapping Neutral Atoms .....               | 203 |
| E.2      | Operational Principles.....                | 206 |
| E.3      | Spin Dependant Transport .....             | 211 |
|          | <b>Bibliography</b> .....                  | 215 |
|          | <b>Index</b> .....                         | 225 |
