

Contents

Chapter 1 Applications, Technologies, and Standards in Secure Wireless Networks and Communications	1
---	----------

Lei Chen

1.1 Introduction	1
1.2 Overview of Security in Cellular Networks and Communications	3
1.3 Overview of Security in WLANs	3
1.4 Overview of Security in WMANs	4
1.5 Overview of Security in Bluetooth Networks and Communications	5
1.6 Overview of Security in VANETs	5
1.7 Overview of Security in WSNs	6
1.8 Overview of Security in WMNs	6
1.9 Overview of Security in RFID Networks and Communications	7
1.10 Summary	7
References	8

Chapter 2 Security in Cellular Networks and Communications	9
---	----------

Chuan-Kun Wu

2.1 Introduction	10
2.2 Security architecture of cellular communication networks	12
2.3 Security techniques in GSM networks	14
2.4 Security techniques in 3G networks	22
2.5 Security techniques in LTE networks	25
2.6 Security issues in femtocell	33
2.7 Privacy issues in cellular networks	34
2.8 Security issues of mobile devices	35
2.9 Concluding remarks	35

References	36
Chapter 3 Security in Wireless Local Area Networks	39
<i>Chao Yang and Guofei Gu</i>	
3.1 Introduction to WLAN	39
3.2 Current State of WLAN Security	42
3.3 WLAN Communication Security	46
3.4 WLAN Access Point Security	53
3.5 Other WLAN Security Issues	55
3.6 Conclusion	56
References	56
Chapter 4 Security in Wireless Metropolitan Area Networks	59
<i>Lei Chen, Narasimha Shashidhar, Shengli Yuan, and Ming Yang</i>	
4.1 Introduction	60
4.2 Fundamentals of WiMAX	61
4.3 WiMAX security goals and solutions	63
4.4 WiMAX security vulnerabilities, threats, and countermeasures	72
4.5 Summary	73
References	74
Chapter 5 Security in Bluetooth Networks and Communications	77
<i>Lei Chen, Peter Cooper, and Qingzhong Liu</i>	
5.1 Introduction	77
5.2 Bluetooth Primer	78
5.3 Bluetooth Security Solutions	82
5.4 Bluetooth Security Vulnerabilities, Threats, and Countermeasures	90
5.5 Conclusion	92
References	93
Chapter 6 Security in Vehicular Ad Hoc Networks (VANETs)	95
<i>Weidong Yang</i>	
6.1 Introduction	95

6.2	Security Architecture Framework for Vehicular Ad Hoc Networks	101
6.3	Secure Communication protocols for Vehicular Ad Hoc Network	115
6.4	Privacy Enhancing and Secure Positioning	120
6.5	Conclusion	126
	References	127
Chapter 7	Security in Wireless Sensor Networks	129
	<i>Weiping Wang, Shigeng Zhang, Guihua Duan, and Hong Song</i>	
7.1	Introduction	129
7.2	Key management in WSNs	131
7.3	Secure routing protocols in WSNs	144
7.4	Location privacy protections in WSNs	153
7.5	Secure data aggregation	161
7.6	Conclusion	172
	References	172
Chapter 8	Security in Wireless Sensor Networks	179
	<i>Ping Li, Limin Sun, Xiangyan Fu, and Lin Ning</i>	
8.1	Introduction	179
8.2	Overview of security architecture for WSN	181
8.3	Cryptographic Approaches	189
8.4	Resilience on Key Management	195
8.5	Trust Management	200
8.6	Location Privacy	214
8.7	Conclusion	220
	References	221
Chapter 9	Security in Wireless Mesh Networks	229
	<i>Chung-wei Lee</i>	
9.1	Introduction	229
9.2	Wireless Mesh Networks (WMN) Characteristics	231
9.3	WMN Security Vulnerabilities	234
9.4	WMN Defense Mechanisms	236
9.5	WMN Security Standards and Products	243
9.6	Conclusion	244
	References	244

**Chapter 10 Security in RFID Networks and
 Communications** 247

Chiu C. Tan and Jie Wu

 10.1 Introduction 247

 10.2 RFID Network Primer 248

 10.3 Security Requirements 252

 10.4 Hardware Based Solutions 253

 10.5 Basic Protocol Based Solutions 254

 10.6 Advance Protocol Based Solutions 258

 10.7 Commercial RFID Security 260

 10.8 Conclusion 264

 References 265

Index 269
