Preface	vii
1 Score and Information	1
1.1 Score, Information, Information Bounds	2
1.2 Estimator Sequences, Asymptotics of Information Bounds	15
1.3 Heuristics on Maximum Likelihood Estimator Sequences	23
1.4 Consistency of ML Estimators via Hellinger Distances	30
2 Minimum Distance Estimators	42
2.1 Stochastic Processes with Paths in $L^p(T, \mathcal{T}, \mu)$	43
2.2 Minimum Distance Estimator Sequences	55
2.3 Some Comments on Gaussian Processes	68
2.4 Asymptotic Normality for Minimum Distance Estimator Sequences . .	75
3 Contiguity	85
3.1 Le Cam's First and Third Lemma	86
3.2 Proofs for Section 3.1 and some Variants	92
4 L^2-differentiable Statistical Models	108
4.1 L^r -differentiable Statistical Models	109
4.2 Le Cam's Second Lemma for i.i.d. Observations	119
5 Gaussian Shift Models	127
5.1 Gaussian Shift Experiments	127
5.2 *Brownian Motion with Unknown Drift as a Gaussian Shift Experiment	141
6 Quadratic Experiments and Mixed Normal Experiments	148
6.1 Quadratic and Mixed Normal Experiments	148
6.2 *Likelihood Ratio Processes in Diffusion Models	160
6.3 *Time Changes for Brownian Motion with Unknown Drift	168

7	Local Asymptotics of Type LAN, LAMN, LAQ	178
7.1	Local Asymptotics of Type LAN, LAMN, LAQ	179
7.2	Asymptotic optimality of estimators in the LAN or LAMN setting	191
7.3	Le Cam's One-step Modification of Estimators	200
7.4	The Case of i.i.d. Observations	206
8	*Some Stochastic Process Examples for Local Asymptotics of Type LAN, LAMN and LAQ	212
8.1	*Ornstein–Uhlenbeck Process with Unknown Parameter Observed over a Long Time Interval	213
8.2	*A Null Recurrent Diffusion Model	227
8.3	*Some Further Remarks	240
	*Appendix	243
9.1	*Convergence of Martingales	244
9.2	*Harris Recurrent Markov Processes	247
9.3	*Checking the Harris Condition	253
9.4	*One-dimensional Diffusions	258
	Bibliography	267
	Index	275
