

Contents

1 Transgenic Crop Plants for Resistance to Biotic Stress	1
N. Ferry and A.M.R. Gatehouse	
2 Transgenic Plants for Abiotic Stress Resistance	67
Margaret C. Jewell, Bradley C. Campbell, and Ian D. Godwin	
3 Transgenic Crops for Herbicide Resistance	133
Stephen O. Duke and Antonio L. Cerdeira	
4 Understanding and Manipulation of the Flowering Network and the Perfection of Seed Quality	167
Stephen L. Goldman, Sairam Rudrabhatla, Michael G. Muszynski, Paul Scott, Diaa Al-Abed, and Shobha D. Potlakayala	
5 Biotechnological Interventions to Improve Plant Developmental Traits	199
Avtar K. Handa, Alka Srivastava, Zhiping Deng, Joel Gaffe, Ajay Arora, Martín-Ernesto Tiznado-Hernández, Ravinder K. Goyal, Anish Malladi, Pradeep S. Negi, and Autar K. Mattoo	
6 Transgenics for Biofuel Crops	249
Anjanabha Bhattacharya, Pawan Kumar, and Rippy Singh	
7 Plant Produced Biopharmaceuticals	269
Jared Q. Gerlach, Michelle Kilcoyne, Peter McKeown, Charles Spillane, and Lokesh Joshi	
8 Biotech Crops for Ecology and Environment	301
Saikat Kumar Basu, François Eudes, and Igor Kovalchuk	

9	Algal Biotechnology: An Emerging Resource with Diverse Application and Potential	343
	Cunningham Stephen and Joshi Lokesh	
10	Transgenic Crops and Functional Genomics	359
	Narayana M. Upadhyaya, Andy Pereira, and John M. Watson	
11	Deployment: Regulations and Steps for Commercialization	391
	Kelly D. Chenault Chamberlin	
12	Patent and Intellectual Property Rights Issues	411
	Jim M. Dunwell	
13	Transgenic Crop Plants: Contributions, Concerns, and Compulsions	435
	Brian R. Shmaefsky
