

Contents

1	Introduction	1
1.1	Motivation	1
1.2	How to Read This Book	3
1.3	Software Quality	5
1.3.1	Garvin's Quality Approaches	6
1.3.2	Product Quality vs. Process Quality	8
1.3.3	Product Quality	10
1.3.4	Cost of Quality	12
1.3.5	Dependable Software Systems	15
1.3.6	Quality Changes Over Time	17
1.4	Terms and Definitions	18
1.4.1	Quality Assurance	19
1.4.2	Quality Models	22
1.4.3	Quality Evaluation	22
1.4.4	Software Evolution	23
1.5	Overview of the SQuaRE Series of Standards	23
1.5.1	Quality Management	24
1.5.2	Quality Model	24
1.5.3	Quality Measurement	24
1.5.4	Quality Requirements	25
1.5.5	Quality Evaluation	26
1.6	Summary and Outline	26
2	Quality Models	29
2.1	Quality Models Set into Context	29
2.1.1	A Short History of Software Quality Models	29
2.1.2	Definitions and Classifications	33
2.1.3	Definition Models	35
2.1.4	Assessment Models	36
2.1.5	Prediction Models	37
2.1.6	Multi-Purpose Models	38

2.1.7	Critique	40
2.1.8	Usage Scenarios	42
2.1.9	Summary	43
2.2	Software Measures	43
2.2.1	Basics.....	43
2.2.2	Aggregation	46
2.3	ISO/IEC 25010	60
2.3.1	Concepts and Meta-Model	60
2.3.2	Product Quality Model	61
2.3.3	Quality in Use Model.....	63
2.3.4	Summary and Appraisal	64
2.4	Quamoco Quality Models	64
2.4.1	Usage of Quality Models	65
2.4.2	Concepts.....	66
2.4.3	Meta-Model	69
2.4.4	Product Entities and Product Factors	70
2.4.5	Measures and Instruments.....	72
2.4.6	Quality Aspects: Product Quality Attributes	73
2.4.7	Quality Aspects: Activity Based or Quality in Use	74
2.4.8	Tool Support	77
2.4.9	Summary	79
2.5	Quality Model Maintenance	80
2.5.1	Sources for Model Changes	80
2.5.2	Analysis and Implementation	81
2.5.3	Test	81
2.5.4	Checklist	82
2.6	Detailed Examples	82
2.6.1	Performance Efficiency Part of the Quamoco Base Model ...	82
2.6.2	Web Security Model	84
2.6.3	Reliability Model	87
3	Quality Planning	91
3.1	Model Building and Quality Requirements.....	91
3.1.1	Step by Step	93
3.1.2	Example: Web Shop	99
3.1.3	Example: Instrument Cluster	101
3.1.4	Checklist	104
3.1.5	Further Readings.....	104
3.2	V&V Planning	105
3.2.1	Step by Step	106
3.2.2	Example: Instrument Cluster	107
3.2.3	Checklist	109
3.2.4	Further Readings.....	110

4	Quality Control	111
4.1	Quality Control Loop	111
4.1.1	Product Quality Control	111
4.1.2	Tool Support and Dashboards	114
4.1.3	Summary	117
4.2	Quality Evaluation and Measurement	118
4.2.1	Four Steps	118
4.2.2	Interpretation Schema	120
4.3	Walk-Throughs, Reviews and Inspections	121
4.3.1	Different Techniques	121
4.3.2	Effectiveness and Efficiency	124
4.3.3	Automation	125
4.3.4	Usage	126
4.3.5	Checklist	127
4.3.6	Further Readings	128
4.4	Static Analysis Tools	128
4.4.1	Different Tools	128
4.4.2	Clone Detection	130
4.4.3	Effectiveness and Efficiency	132
4.4.4	Usage	132
4.4.5	Checklist	133
4.4.6	Further Readings	134
4.5	Testing	134
4.5.1	Regression Testing	134
4.5.2	Different Techniques	135
4.5.3	Effectiveness and Efficiency	142
4.5.4	Automation	142
4.5.5	Usage	144
4.5.6	Checklist	145
4.5.7	Further Readings	145
4.6	Product and Process Improvement	145
4.6.1	Lean Development	146
4.6.2	Derivation of Improvement Steps	147
4.6.3	Implementation of Improvement Steps	148
4.6.4	Checklist	150
4.6.5	Further Readings	150
5	Practical Experiences	153
5.1	Quamoco Base Model	153
5.1.1	Context	153
5.1.2	Building the Model	154
5.1.3	Quality Evaluation and Measurement	156
5.1.4	Applications and Effects	157
5.1.5	Lessons Learned	160

5.2	MAN Truck and Bus	160
5.2.1	Context	161
5.2.2	Building the Model	161
5.2.3	Effects	164
5.2.4	Usage of the Model	165
5.2.5	Lessons Learned	166
5.3	Capgemini TS	167
5.3.1	Context	167
5.3.2	Building the Model	167
5.3.3	Effects	170
5.3.4	Usage of the Model	171
5.3.5	Lessons Learned	171
5.4	Telecommunications Company	171
5.4.1	Context	172
5.4.2	Building the Model	172
5.4.3	Effects	174
5.4.4	Lessons Learned	174
5.5	Siemens COM	175
5.5.1	Context	175
5.5.2	Quality Model	175
5.5.3	Stochastic Model	176
5.5.4	Time Component	177
5.5.5	Parameter Estimation	178
5.5.6	Suitability Analysis	179
5.5.7	Results	179
5.5.8	Lessons Learned	181
5.6	Five SMEs	182
5.6.1	Context	182
5.6.2	Introduction of Static Analysis	183
5.6.3	Experiences with Bug Pattern Detection	185
5.6.4	Experiences with Code Clone Detection	187
5.6.5	Experiences with Architecture Conformance Analysis	190
5.6.6	Lessons Learned	192
6	Summary	195
6.1	Continuous Quality Control	195
6.2	Further Readings	197
6.2.1	Software Engineering	197
6.2.2	Quality Assurance and Quality Control	197
6.2.3	Quality Models	198
6.2.4	Defect Detection Techniques	198
	References	199
	Index	209
