

Contents

Computational and Robotic Models of the Hierarchical Organization of Behavior: An Overview 1
Gianluca Baldassarre and Marco Mirolli

Part I Hierarchical Organization of Behavior in Robots

Behavioral Hierarchy: Exploration and Representation 13
Andrew G. Barto, George Konidaris, and Christopher Vigorito

Self-Organized Functional Hierarchy Through Multiple Timescales: Neuro-dynamical Accounts for Behavioral Compositionality 47
Yuichi Yamashita and Jun Tani

Autonomous Representation Learning in a Developing Agent 63
Jonathan Mugan and Benjamin Kuipers

Hierarchies for Embodied Action Perception 81
Dimitri Ognibene, Yan Wu, Kyuhwa Lee, and Yiannis Demiris

Learning and Coordinating Repertoires of Behaviors with Common Reward: Credit Assignment and Module Activation 99
Constantin A. Rothkopf and Dana H. Ballard

Part II Hierarchical Organization of Animal Behavior

Modular, Multimodal Arm Control Models 129
Stephan Ehrenfeld, Oliver Herbort, and Martin V. Butz

Generalization and Interference in Human Motor Control 155
Luca Lonini, Christos Dimitrakakis, Constantin A. Rothkopf, and Jochen Triesch

A Developmental Framework for Cumulative Learning Robots	177
Mark Lee, James Law, and Martin Hülse	
The Hierarchical Accumulation of Knowledge in the Distributed Adaptive Control Architecture	213
Encarni Marcos, Milanka Ringwald, Armin Duff, Martí Sánchez-Fibla, and Paul F.M.J. Verschure	
 Part III Hierarchical Organization of Animal Brain	
The Hierarchical Organisation of Cortical and Basal-Ganglia Systems: A Computationally-Informed Review and Integrated Hypothesis	237
Gianluca Baldassarre, Daniele Caligiore, and Francesco Mannella	
Divide and Conquer: Hierarchical Reinforcement Learning and Task Decomposition in Humans	271
Carlos Diuk, Anna Schapiro, Natalia Córdova, José Ribas-Fernandes, Yael Niv, and Matthew Botvinick	
Neural Network Modelling of Hierarchical Motor Function in the Brain	293
Juan M. Galeazzi and Simon M. Stringer	
Restoring Purpose in Behavior	319
Henry H. Yin	
Index	349
