Foreword	v
Preface	vii
1 Introduction	1
1.1 Revision process	1
1.2 Scope of revision	1
1.3 Overview of changes	3
1.3.1 Contracts	4
1.3.2 Expressions	9
1.3.3 Structure and visibility	15
1.3.4 Tasking and real-time facilities	18
1.3.5 General improvements	21
1.3.6 Standard library	25
1.4 Conclusions	30
2 Contracts and Aspects	33
2.1 Overview of changes	33
2.2 Aspect specifications	34
2.3 Preconditions and postconditions	42
2.4 Type invariants	51
2.5 Subtype predicates	56
2.6 Default initial values	61
2.7 Storage occupancy checks	63
3 Expressions	65
3.1 Overview of changes	65
3.2 If expressions	66
3.3 Case expressions	70
3.4 Quantified expressions	71
3.5 Expression functions	73
3.6 Membership tests	77
3.7 Qualified expressions	80
4 Structure and Visibility	83
4.1 Overview of changes	83
4.2 Subprogram parameters	84
4.3 Incomplete types	88
4.4 Discriminants	92

4.5	Use clauses	92
4.6	Extended return statements	95
5	Tasking and Real-Time	99
5.1	Overview of changes	99
5.2	Scheduling	100
5.3	Multiprocessors	103
5.4	Interrupt timers and budgets	108
5.5	Volatile	109
5.6	Synchronized interfaces and requeue	110
6	Iterators, Pools, etc.	115
6.1	Overview of changes	115
6.2	Position of pragmas and labels	116
6.3	Iteration	120
6.4	Access types and storage pools	132
6.5	Restrictions	139
6.6	Miscellanea	143
7	Predefined Library	147
7.1	Overview of changes	147
7.2	Strings and characters	148
7.3	Directories	152
7.4	Locale	155
7.5	Hashing and comparison	156
7.6	Miscellanea	156
8	Containers	159
8.1	Overview of changes	159
8.2	Bounded and unbounded containers	159
8.3	Iterating and updating containers	164
8.4	Multiway tree containers	168
8.5	The holder container	178
8.6	Queue containers	180
8.7	Sorting	187
8.8	Streaming	189
9	Epilogue	191
9.1	Compatibility	191
9.1.1	Incompatibilities with Ada 2005	191
9.1.2	Inconsistencies with Ada 2005	193
9.2	Retrospective changes to Ada 2005	193
9.2.1	Incompatibilities with original Ada 2005	194
9.2.2	Inconsistencies with original Ada 2005	194

9.3	Unfinished topics from Ada 2005	195
9.3.1	Aggregates for private types	195
9.3.2	Partial generic instantiation	196
9.3.3	Support for IEEE 559: 1989	196
9.3.4	Defaults for generic parameters	196
9.3.5	Pre/post conditions for subprograms	197
9.3.6	Type and package invariants	197
9.3.7	Exceptions as types	197
9.3.8	Sockets operations	197
9.3.9	In out parameters for functions	197
9.3.10	Application defined scheduling	198
9.4	Unfinished topics for Ada 2012	198
9.4.1	Integrated packages	198
9.4.2	Cyclic fixed point	198
9.4.3	Global annotations	199
9.4.4	Shorthand for assignments	199
9.5	Postscript	199
	References	205
	Index	207
